### Meeting Information

The first hour and a half of the meeting was very busy and all DNR staff were in breakout rooms continuously during this time talking with community members. Some local officials were present and joined the breakout rooms with their community member. A wide variety of questions were asked relating to flood insurance, mapping and engineering, and general concerns with the impacts they might see because of this latest map update in the Milwaukee River Watershed. The last half of the time frame was quiet with no additional community members joining the meeting.
