Fleet Reporting

Definitions: For the purposes of this application: **Catch** means the pounds of a particular fish harvested by species and zone. **Fleet reporting** means putting all licenses issued to the same individual under a common fleet number for the purposes of reporting the harvest and disposition of the fish, the marking and operation of nets, and licensing of crew members.

Licenses to be Included in Fleet Reporting: Enter the numbers of all your Wisconsin Great Lakes commercial fishing licenses and the name or registration number of all boats listed on each license. **Special Note:** Section NR 25.135(2)(a), Wis. Adm. Code, requires all licenses to be included under fleet reporting to be issued in your name. To qualify for a fleet reporting number, s. NR 25.135(2)(a)3., Wis. Adm. Code, further requires that all commercial fishing licenses in your name must be included under fleet reporting.

Catch Allocation Order: All daily harvest will be credited by species and zone to the eligible licenses in the order you list them. [Section NR 23.135(2)(a)1.c., Wis. Adm. Code.]

Select how you would like the daily catch credited under your fleet reporting number by completing either the:

➤ **Percent of Daily Catch Credited to Each License:** Enter the percentage of your daily catch, by species and zone, that you would like credited to each eligible license until the allocated quota is met for that license or the applicable racehorse fisheries closes.

or the:

➤ **License Order:** Enter the order of your licenses to which all of your daily reported catch, by species and zone, should be applied until the allocated quota is met for that license or the applicable racehorse fisheries closes.

Special Note: The choice between these two options is required by s. NR 25.135(2)(a)1.d., and is intended to allow you to create or maintain the desired catch history for each license.
