**Summary:** This feature appears as a part of Lost Lake, which is a sprawling lake in the Town of Webb Lake, WI. This is the most north-western basin of the feature. Looking carefully at 24K Hydrology and USGS Topology, it appears these should be separated features instead of one continuous feature. There are 2 other Johnson Lakes in Burnett County, and 17 in Wisconsin.

When evaluating the plat maps for Burnett County, the surrounding private landowners do not share a common name with the proposed name for the feature. Most of the land surrounding the feature is owned by Burnett County.
