Minimum Acceptable Bid: $73,723.90

Plots were taken on a 3 chain grid and plot data includes measuring individual tree diameter and # of 8’ sticks per tree to calculate volumes.

¹ MX pulp and logs contains 94% red maple and 6% white birch
² Red pine contains 38.66 MBF red pine sawtimber
³ Jack Pine contains jack pine (89%) and white pine(11%)

Sale Conditions:
- Mill Scale Sale
- No bid bond required
- A performance bond of 15% of the total sale bid value required
- The cutting area is approximately 111 acres
- The contract period is 2 years
- Sale bounded by Orange paint. See sale maps for specifics
- Do not harvest trees, drop slash, or operate equipment across Orange paint line
- No cutting or skidding in areas outlined with 2 or 3 Orange Dots
- Damage to any residual trees will not be tolerated
- Leave all standing snag and den trees that do not pose a safety hazard
- Utilization will be to a 4" top
- All slash shall be lopped and scattered as it lies within 2’ of the ground.

Cutting Prescription:
Red Pine Thinning: Stands 4072-015,018,023, 4070-008 (34 acres First Thinning / 34 acres Second thinning)
- In All Stands: Harvest all marked trees with **Blue Paint**.

Jack Pine/Oak Clear-Cut Harvest: Stand 4073-031 (9 acres)
- Harvest all trees 1” and greater except designated leave trees and trees marked with **Orange Paint. White Pine is designated as a leave trees as well as all advance regeneration of red pine, white pine, and oak.**

Hardwood Shelterwood Harvest: Stands 4072-020,024,037 (34 acres)
- Harvest all trees 1” and greater except designated reserve trees and trees marked with **Orange Paint. Hemlock, white cedar, yellow birch and beech are designated as a reserve trees as well as all advance regeneration of red pine, white pine, and oak.**

Special Conditions:
- **NO SALE MAY BEGIN WITHOUT PRIOR NOTIFICATION AND AN ON-SITE MEETING WITH A WISCONSIN DNR SALE ADMINISTRATOR.**
- Purchaser required to post signs on USFS roads alerting recreationalists of logging activities.
- Equipment must be cleaned before entering and leaving sale area to prevent the introduction/spread of invasive species.
- **Stands 4072-015,018,023, 40703-008,031 require Special HRD Treatment** - To prevent the introduction and/or spread of Heterobasidion Root Disease also known as Annosum root rot, borax-based products, such as Sporax® or Cellu-Treat® should be applied (according to label instructions and FS Special Provision R9-CT6.41#) to all conifer stumps within 24 hours of harvest. Treatment is required during harvest activities from April 1 to Dec 31.
- All pine products cut between May 1 and September 1 must be removed from the sale area within three weeks from time of cutting. Pine products cut during the remainder of the year must be removed prior to May 1 of each year.
- In Stands 4072-031, Harvest will only be allowed between September 1 until April 1 to prevent Oak Wilt
- **Harvest will only be allowed in Stands 4072-020,024,037 during FROZEN GROUND CONDITIONS ONLY to prevent excessive rutting and damage due to the high-water table in these stands**
- Within a 10’ wide strip from the edge of the opening along Riverview Road and Airport Road all slash resulting from Purchaser’s operations shall be removed.
- Chequamegon-Nicolet Forest Plan requires that all native surfaced approaches to paved or graveled roads have 100 ft. of gravel, 6 in. deep, 12 ft. wide put down when used during non-frozen conditions.
- Purchaser required to obtain necessary permits and permissions to forward, deck, and or haul any timber products on LK-Pipeline. Contact DNR timber sale administrator for more information on restrictions.
- The location and clearing widths of all Temporary Roads shall be agreed to in writing before construction is started. “Temporary Roads” are roads other than Specified Roads that are constructed by Purchaser for the purpose of harvesting included timber.
- When two or more commercial users are simultaneously using the same road, the commercial users will develop maintenance responsibilities and arrangements for accomplishing the work. Seller must agree to this plan. If the commercial users cannot agree on maintenance responsibilities, seller shall resolve the differences.
- The following roads will be decommissioned after use and closed with a berm. Berms must be constructed at designated locations by DNR Sale Administrator and shall be created using the following design features: Berms must be at least four feet in height and must be made with dirt mixed with rocks, stumps, logs, root-wads, or slash and shall be created without creating a defined trench.
  - Road 941451

**Road Maintenance Requirements Summary**

Purchaser shall maintain roads, commensurate with Purchaser’s use. Roads must be left in as good or better condition than existed prior to harvest. Performance of road maintenance work by Purchaser may be required prior to, during, or after each period of use. The timing of work accomplishment shall be based on Purchaser’s operating schedule and road conditions. Specific required road maintenance specifications are included below.

Purchaser shall maintain roads in accordance with the following Contract Road Maintenance Requirements Summary:

Specification No. Specification Title
T-8110 Maintenance Blading/Grading
T-8420 Cutting Roadway Vegetation
T-8130 Spot Surface Course Placement/Replenishment

**T-8110:** Maintenance Blading/Grading is keeping an aggregate surfaced Roadbed in a condition to facilitate traffic and provide proper drainage. It includes maintaining the Crown, Inslope or Outslope of the Traveled Way, Turnouts, and Shoulder; repairing Berms; blending approach road intersections; and cleaning Drainage Dips and Lead-off Ditches.

**T-8420:** This work includes removal of brush, trees and other vegetative growth from within the clearing limits. This may include brush mowing of shoulders to prevent larger growth which would inhibit travel in the future.

**T-8130:** This work includes subgrade preparation, furnishing, hauling, spreading, and shaping materials in accordance with USFS requirements. Only commercial sources of aggregate will be accepted, except surfacing material may also be purchased from the government, where available, by filling out a form, 2600, paying the required fees, and obtaining a permit.
