

**DEPARTMENT OF NATURAL RESOURCES
Black River Falls, Wisconsin**

**PUBLIC NOTICE
Timber for Sale - Invitation for Bids**

Sealed bids will be received by the Black River State Forest Property Manager at the Black River State Forest Headquarters (Castle Mound), W10325 Hwy 12, Black River Falls, Wisconsin 54615; up to 9:00 a.m. on Thursday, November 1, 2018. A timber sale prospectus, map, bid forms and detailed information on each timber tract can be obtained by the internet at: <http://dnr.wi.gov/topic/TimberSales/salesBlackRiver.html> or by contacting the Forester at the above address, or by calling 715-410-8839.

Results from the bid opening and information on any un-sold tracts can be obtained by checking our website or calling the numbers listed above. Tracts not sold on November 1, 2018 will be available for re-bid up to 9:00 a.m. on Tuesday, December 4, 2018.

The Department of Natural Resources reserves the right to reject any or all bids. Bids will be opened publicly at the Black River State Forest Headquarters (Castle Mound), Black River Falls, at 9:00 a.m. on November 1, 2018 and December 4, 2018.

Tract Information

There are eight tracts of timber for sale on the Black River State Forest in T20N-R2W, T21N-R2W, T22N-R2W and T22N-R3W. The tracts comprise 578 acres and contain an estimated 22,795 tons of pine and hardwood pulp. Additionally, there are three tracts of timber for sale on Other State Lands in T19N-R6W, T21N-3W and 23N-4W. These tracts comprise 128 acres and contain an estimated 3920 tons of pine and hardwood pulp. For questions regarding Other State Lands (tract#1-18, 2-18 and 3-18), contact Clint Gilman at: 715-896-0536.

These lands are third party certified.

Bidding Requirements

All bids must be submitted as sealed bids, in individual envelopes for each tract, and labeled with the tract number. Use Department Timber Sale Bid Form (updated 2016 version 2400-49) and include the following:

1. Tract number
2. List of all species to be cut, utilization specifications (4" top for all sales in this bid opening), and estimated volumes as listed on the timber sale prospectus.
3. Bid price per unit for each species and product listed. No "zero" bids for any species will be accepted.
4. Check off the type of performance bond to be used in the appropriate box on the bid form.
5. Signature, address and phone number of bidder. E-mail contact information is optional.
6. **Lump sum bids will not be accepted, except for Other State Lands Tract 2-18.**
7. **Bids must be legible and accurate. If we cannot determine the price per unit, totals, or other required information, your bid may not be accepted.**
8. At any time prior to the reading aloud of any bids for a particular sale, bidders may withdraw their bid from consideration. This can be done in person or by written instruction to the Property Manager or DNR Forester conducting the bid opening.

****No Bid Bonds are required for this bid opening. However, if the winning bidder fails to execute the contract and submit an acceptable performance bond, the bidder shall be required to forfeit to the department an amount equal to 10% of the total bid amount. Failure to forfeit the 10% penalty will result in the bidder being considered ineligible to bid on any state timber sales for a two-year period.**

***All sawlog volumes are included with the tonnage volume estimates, unless noted otherwise, but estimates are listed on the prospectus. All Black River State Forest Sales will be scaled by the ton or converted to tons (from either cords or board feet) by the conversion rates in the contract. ***

Additional Requirements

Performance Bond of a minimum of \$1,000.00 or 15% of the total bid value is required upon the signing of a timber sale contract. Contracts must be signed within 2 weeks of the bid opening and performance bonds **must be received within 6 weeks of the bid opening**. An Irrevocable Letter of Credit issued as a Performance Bond will be required to be 4 years in length. Letters of Credit for sales awarded this bid opening should be written to expire on **December 1, 2022**. **If this is not possible through your lender, contact the DNR Forester as soon as possible for other options.**

Worker's Compensation Law: The contractor (purchaser) shall provide the Department with an original Certificate of Insurance indicating that Worker's Compensation Insurance coverage is provided for all of the contractor's (purchaser's) employees working under the contract during its duration. This shall be in the Department's file prior to any performance under the contract. The purchaser shall notify the Department in writing, immediately upon any change in or cancellation of insurance coverage required under the contract.

Payments: Timber will not be removed from any sale area until paid for or a satisfactory guarantee for payment is made. However, qualifying contractors have the option to sign a contract under the deferred payment program. Under this option, payment shall be received at the payment lock box in Milwaukee or by the DNR Forester within 30 days from billing. **(Deferred payment is not allowed with lump sum sales.)**

Late payment—Failure to pay within the 30-day period shall result in:

- The contractor being required to prepay stumpage on the remainder of the sale.
- The payment breach being documented by forwarding the contractor's name to the County Forest Specialist in Madison.
- A 1.5% every 30 days late interest penalty being assessed on stumpage due.

Sales Tax Exempt Status: The purchaser must also furnish a completed copy of the Department of Revenue Sales and Use Tax Exemption Certificate. (New filing requirement for DNR timber sales in 2016.)

Training Requirement: The purchaser is responsible for ensuring that the actual logging contractor complies with the Wisconsin SFI training standard as adopted by the SFI Implementation Committee (SIC). Criteria for the standards can be found at the Web site: www.fistausa.org/sfi_standards.html, or by contacting the Forest Industry Safety & Training Alliance (FISTA). Purchaser must provide documentation to Seller that training has been attained.

For timber sales that require stump treatment for Heterobasidial Root Disease (Annosum), treatment must be performed by a Certified Pesticide Applicator through Wisconsin Department of Agriculture, Trade and Consumer Protection. **Proof of Certification will be required prior to beginning any areas requiring treatment.** More information can be found at: http://datcp.wi.gov/Plants/Pesticides/Licenses/Commercial_Applicator_Certification. **Reporting of type and amount of chemical used will be required.**

Additional information and forms for bidding, including pre-filled bid sheets, can be obtained from the Forester, Black River State Forest, W10325 Hwy 12, Black River Falls, Wisconsin, 54615 or at our website: <http://dnr.wi.gov/topic/TimberSales/salesBlackRiver.html>. For questions regarding Other State Lands contact Clint Gilman at: 715-896-0536.

The Department of Natural Resources reserves the right to reject any or all bids.

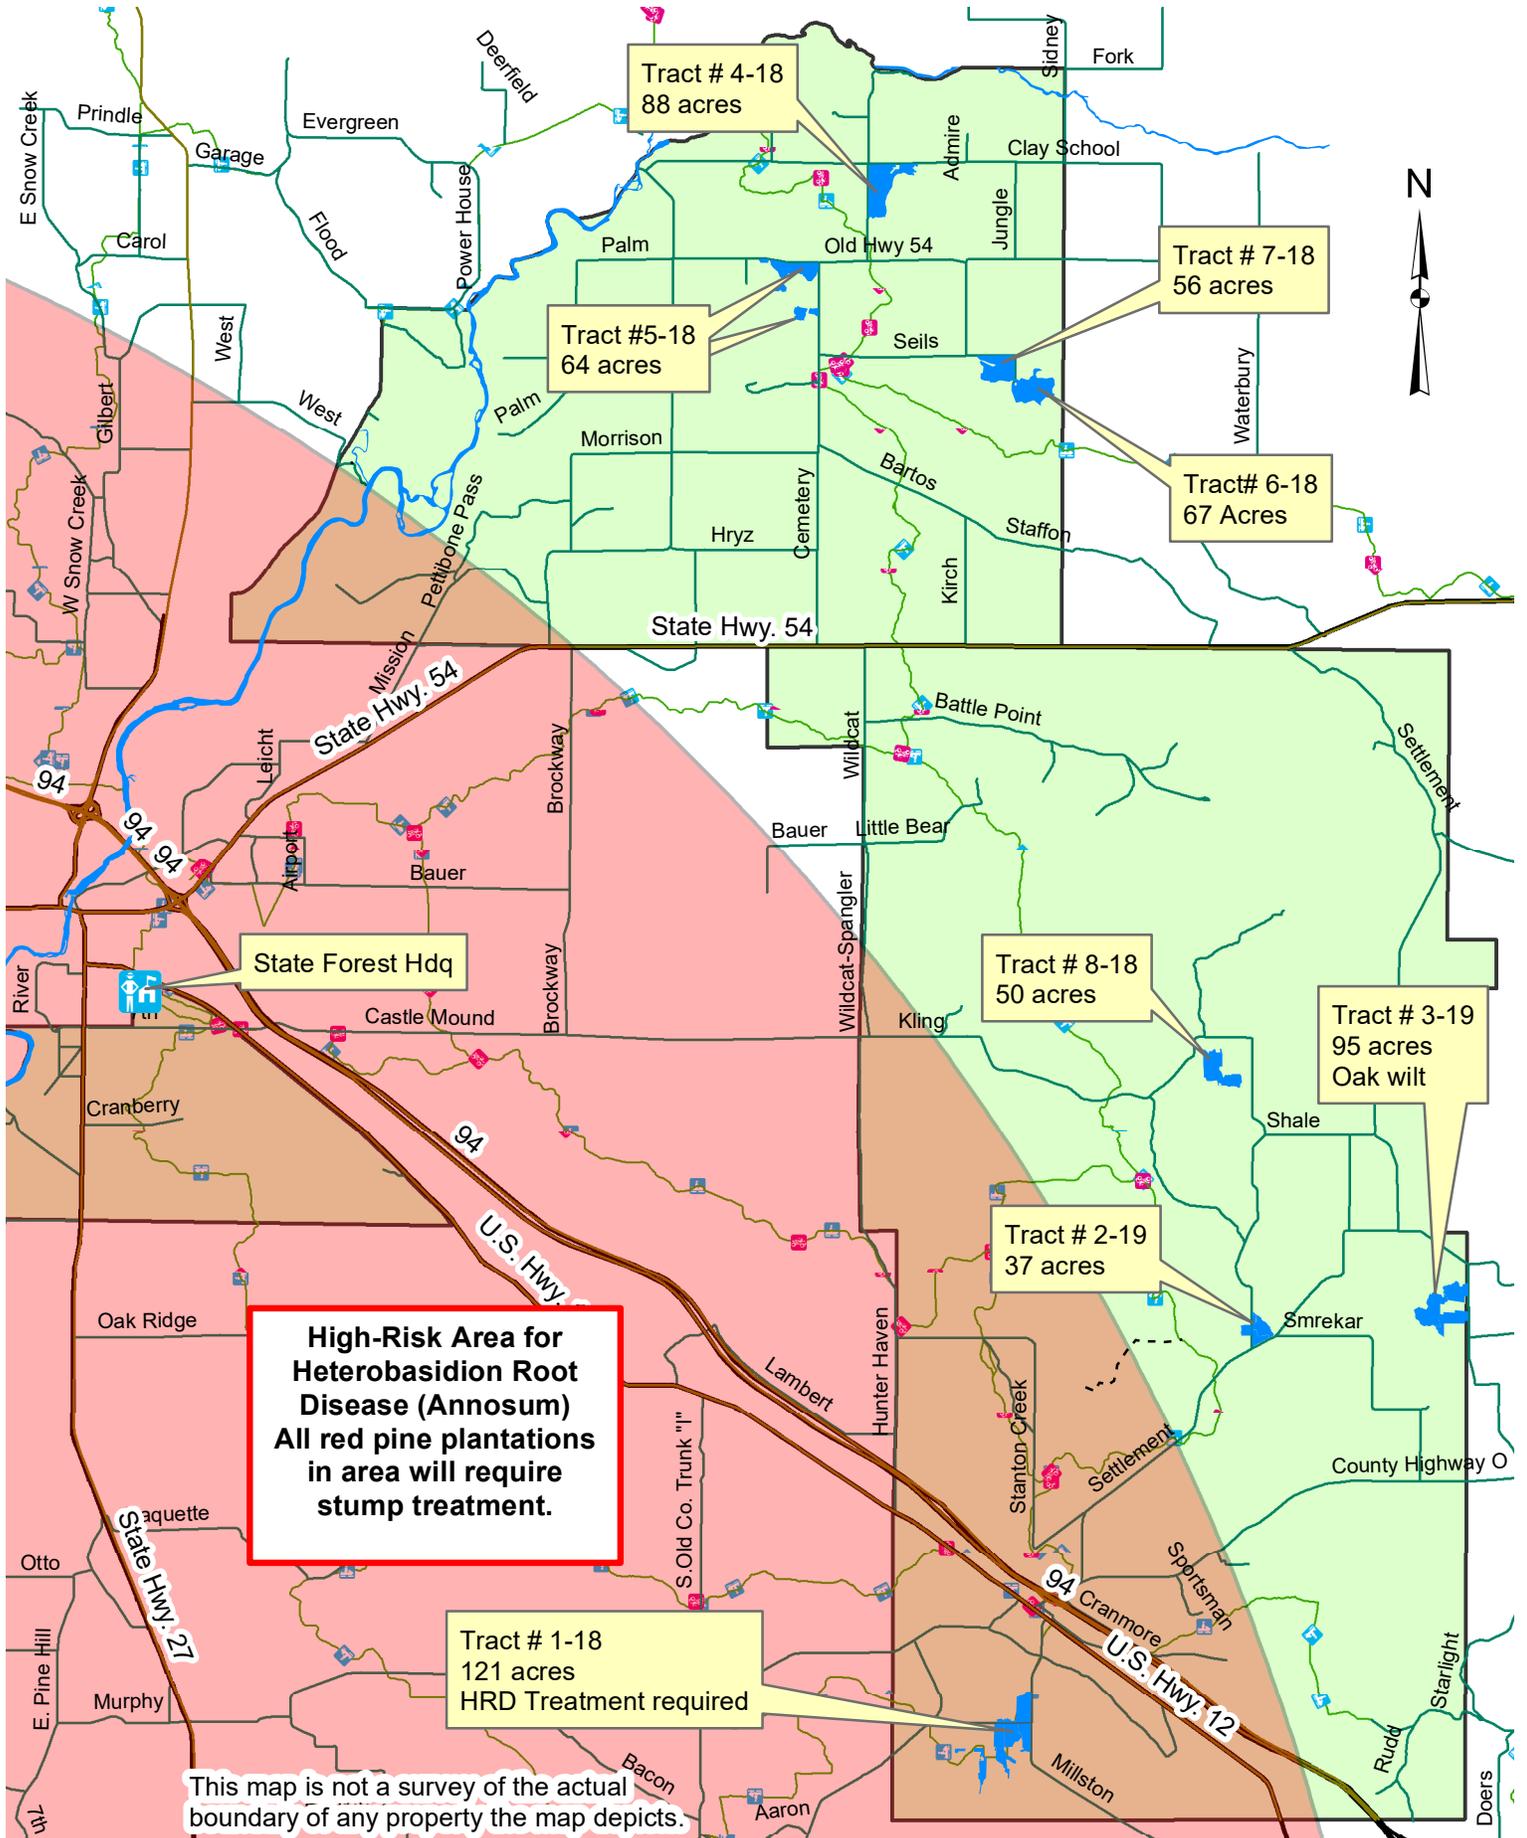

NOTE: An updated 2016 Bid form (2400-49) is enclosed. Feel free to make your own copies if you need more.

Black River State Forest Fall 2018 Timber Sale Location Map

High-Risk Area for Heterobasidion Root Disease (Annosum)
All red pine plantations in area will require stump treatment.

This map is not a survey of the actual boundary of any property the map depicts.

**Black River State Forest
General Sale Conditions**

The following conditions apply on all timber sales unless otherwise stated on the individual timber sale prospectus. These lands are third party certified.

Contracts and Extensions:

1. All contracts will be issued for a period of 2 years, unless otherwise noted. It is understood that all contracts are expected to be completed during the initial contract. Extensions are not automatic.
2. Requests for extensions must be submitted prior to the expiration date of the contract. The performance bond may be retained if requests are not submitted by the expiration date.

Cutting and Utilization:

1. All designated species for harvest must be cut concurrently within the sale. This includes any non-merchantable 2-4" dbh trees if designated. Care must be taken to not damage any residual trees.
2. All decked or cut pine must be removed from the sale area within 3 weeks of cutting from March 1st to August 30th to prevent bark beetle damage, this includes red pine, jack pine and white pine. Pine products cut during the remainder of the year must be removed before March 15th.
3. No scarring or debarking of residual trees from harvesters or skidders in excess of 10% on red pine plantations being thinned for the first time, or in excess of 3% on plantations thinned second, third, or fourth times.
4. Oak trees may not be cut during the period April 1st to July 15th to prevent oak wilt infestation, unless specified otherwise in the prospectus. Other exceptions may be considered on a case by case basis.
5. Pulpwood: Cut all designated trees with one (1) or more 100" sticks to a 4" top diameter for hardwoods and softwoods, unless sold as a whole tree harvest. Only sales advertised with whole tree harvest volumes are eligible for whole tree utilization. Whole tree harvests require 10% of topwood (<4" diameter) volume to be left scattered in the sale area and Wisconsin's Forestland Woody Biomass Harvesting Guidelines must be followed.
6. Sawlogs: Cut all designated trees with one (1) or more 8'6" logs to a top diameter of 10" for hardwoods and 9" for softwoods.

Roads, Trails, and Landings:

1. The location and building of roads and landings are always subject to advanced approval and conditions of the seller (DNR Forester). A DNR Forester must be contacted at least 48 hours in advance for an appointment.
2. All logging debris accumulated at landings, including bark, tops, and slash, shall be scattered within the sale area to the satisfaction of the seller.
3. Berms (piles of dirt, debris, stumps, slash, etc.) constructed on the seller's property (Black River State Forest) shall be leveled to restore the area to the seller's satisfaction unless they are constructed at the direction of the seller. (In other words, do not pile or push dirt up with debris and slash around the edge of landings or along trails and roads, especially against standing trees and the edges of dense woods.)
4. Any road work or maintenance involving more than leveling / grading must be pre-approved by a DNR Forester. No borrow pits will be allowed.
5. Roads and landings shall be graded and leveled upon completion of the timber sale and restored to seller's satisfaction. Any trees pushed over or cut down for making roads or landings must be utilized or cleaned up to the DNR Forester's satisfaction.

Aesthetic & Ecological Considerations:

The seller reserves the right to change (add or subtract) marked or designated timber to be cut at anytime for aesthetic, ecological, BMP's or to protect endangered resources without mutual agreement of the buyer provided it does not affect 10% or more of the estimated volume.

The purchaser shall comply with all recommended Forestry BMPs for Invasive Species as described in "*Wisconsin's Forestry Best Management Practices for Invasive Species*" published by the Wisconsin Department of Natural Resources, publication Pub-FR-444-09, unless specifically provided otherwise.

Specifically: BMP 4.4: Prior to moving equipment onto and off of a harvest area, scrape or brush soil and debris

from exterior surfaces, to the extent practical, to minimize the risk of transporting invasive species.

Preferred locations for cleaning equipment areas are those where:

- Equipment is unloaded and loaded.
- Invasives are less likely to spread from cleaned equipment (such as undisturbed areas).
- Invasive species are already established
- Equipment with the ability to run fans in reverse should use this feature to clean air intakes. Fans and air intakes can harbor plant materials and insects. Reversing the fan direction and blowing loose material out of equipment before leaving a site can reduce the likelihood of moving species to another site. Heat exhausted from the engine when fans are reversed may kill some insects and plant parts.
- In areas where invasive species are present, it is a good practice to routinely remove soil, seeds, vegetative matter, or other debris from shoes, clothing, and tools.

Scaling Specification:

1. The mill scale ticket system will be required for pulp and logs, unless otherwise stated in the prospectus. Contractor is required to deposit a scale ticket in the lock box placed on the sale. These tickets are provided by the State Forest and will be filled out in their entirety. The contractor is also required to deliver a mill ticket to the mill purchasing the forest product. This mill ticket will be returned to the Black River State Forest along with a copy of the mill’s scale. The contractor is responsible for having these mill tickets and scale slips returned to the Black River State Forest within 14 days of hauling. **The contractor may not scale his own wood without authorization from the DNR Forester.** An independent mill scale or weight or DNR scale shall be used at all times.
2. The seller reserves the right and may for any reason, decide to stick scale all products on the sale area. The contractor may also put in a request for stick scaling with at least 48 hours advance notice for reasonable circumstances.
3. Contractors that are required to prepay must at a minimum, purchase 5 or more scale tickets at a time, but it is encouraged that a full booklet of 25 scale tickets be purchased.
4. When there is no sawlog volume listed on the timber sale prospectus, bolts and logs may be scaled as cordwood. Scale sheets with tie logs or board feet volumes (using the Scribner Decimal “C” log rule) will be converted to cordwood volume using standard DNR conversion factors.
5. Pine and hardwood sawbolts, which normally would have been cut into sawlogs, will be scaled by weight (tons) or by the cord. The conversion factor for cordwood to MBF is 2.44 cords per MBF for softwoods, and 2.20 cords per MBF for hardwoods.
6. When peeled cordwood is measured, it is agreed that 12.5% will be added to hand peeled and stroke delimeter/processor peeled volume and 16% to ring debarked volume.
7. Lump Sum Sales require pre-payment for the entire sale amount prior to any harvesting or work on the sale begins. See individual prospectus for specifics on each sale.

Weight Conversion Factors: All wood will be scaled by the ton or converted to tons, unless advertised otherwise.

The following weight conversion factors will be used in the conversion of a standard 4’ x 4’ x 100” cord to tons. Factors for a mix of species may be developed by weighted average of cruise estimates based on species volume distribution and/or ocular estimate.

CORDWOOD WEIGHT CONVERSION FACTORS (POUNDS PER CORD)

<u>Species</u>	<u>Weight (tons)</u>	<u>Weight (lbs)</u>	<u>Species</u>	<u>Weight (tons)</u>	<u>Weight (lbs)</u>
Tamarack	2.325	4650	Hard maple	2.550	5100
Red pine	2.250	4500	Elm	2.500	5000
Jack pine	2.125	4250	White birch	2.400	4800
White pine	2.100	4200	Ash	2.300	4600
Spruce	2.000	4000	Soft maple	2.275	4550
White oak	2.925	5850	Aspen	2.250	4500
Red/black oak	2.750	5500	Basswood	1.925	3850
Hickory	2.700	5400	Locust	2.650	5300
Yellow birch	2.675	5350			

Survey Corners:

Do not damage any survey corners or witness trees. No witness trees may be cut. It is the sale purchaser’s responsibility to pay for costs of damage, removal, or repair to any land survey monuments or accessories.

Slash: (including leaning trees due to damage by skidders or harvesters)

1. Slash falling in any lake, stream, marsh, flowage, road right-of-way, or on adjoining land shall be removed immediately and pulled back at least 10 feet inside the sale boundary.
2. All trees shall be completely felled and not left leaning or hanging in other trees. Tops from felled trees may not be left hanging in standing trees.
3. Slash must be evenly scattered across the sale area to within 2 feet of the ground concurrently with cutting. No large piles are allowed. Slash along state highways, county, town, and state forest roads, and recreational trails, must be pulled back a minimum of 10 feet within the sale edge.
4. Trees cut along the edges of any marsh, creeks, or flowages by harvesting machines must be felled to high ground to keep the slash out of wet areas. Machines operating along marshes, creeks or flowages must remain on high ground during the cutting to prevent rutting in wetlands. Do not cut across or through small marshes or wetlands with equipment, but rather work around them.
5. No slash is to be piled on any existing pine (red, white, or jack) reproduction in the understory. Do not bury seedlings and saplings.

Soil Disturbance and Rutting:

- a. The Purchaser agrees to take all steps and precautions to avoid and minimize soil disturbances, such as soil compaction and rutting. If soil disturbances occur, the Purchaser agrees to work cooperatively to mitigate and repair any and all instances of soil disturbance.
- b. Excessive soil disturbance (as defined in Table 1) shall not be permitted. Purchaser agrees to contact Seller in the event of an excessive soil disturbance.

Table 1. Thresholds for soil disturbances.

Timber Sale Infrastructure	Soil disturbances are excessive if:
Roads, Landings, Skid Trails, and General Harvest Area	<ul style="list-style-type: none">▪ A gully or rut is 6 inches deep or more and is resulting in channelized flow to a wetland, stream, or lake.
Roads, Landings, and Primary Skid Trails	<ul style="list-style-type: none">▪ In a riparian management zone (RMZ) or wetland, a gully or rut is 6 inches deep or more and 100 feet long or more.▪ In an upland area (outside of RMZ), a gully or rut is 10 inches deep or more and 66 feet long or more.
Secondary Skid Trails and General Harvest Area	<ul style="list-style-type: none">▪ A gully or rut is 6 inches deep or more and 100 feet long or more.

Note: The depth is to be measured from the original soil surface to the bottom of the depression. If individual lug depressions are visible, the depth would be measured to the lesser of the two depths (the "top" of the lug). The length is measured from the start of the "too deep" section to the end of the "too deep" section. Measurements are not cumulative.

- c. Prior to sale completion the Purchaser shall mitigate and repair soil disturbances to the Seller's satisfaction.

Heterobasidial Root Disease (Annosum) Treatment: (Only for sales that require it and when cut between April 1 and November 30.) Harvest areas listed as requiring treatment must be treated concurrently with harvesting by a DATCP Certified Pesticide Applicator. Proof of Certification will be required. Stumps must be treated within 12 hours of cutting. Blue or red dye (such as Hi-Light) shall be added to the liquid chemical treatment in a manner consistent with the label. The DNR forester may inspect any or all stumps and must be able to validate that treatment has been done successfully. Slash, sawdust and other debris shall be kept off treated stumps so that these inspections can be done. The DNR reserves the right to inspect and test the contractor's chemical tank at any time during the harvesting operations to make sure that proper treatment procedures are being followed. Missed stumps, poor chemical coverage, or stumps that are inaccessible for inspection may be considered a contract violation and may lead to termination of harvesting operations until the situation can be remedied to the satisfaction of the DNR. Additionally, the type and amount of chemical used will need to be reported to the DNR on forms provided by the Department.

BRSF Tract 1-19
Gobbler Gorge Sale
T20N-R2W Sec 29,32

Sale size: 121 Acres
Contract Period: 2 years

Estimated Volume

<u>Species</u>	<u>Cord Equivalent</u>	<u>Tons</u>	<u>Advertised Value/Ton</u>
Red Pine	(1110)	2500	\$20.40
White Pine*	(330)	700	\$16.10
Oak**	(40)	100	\$7.50

*Includes approx. 75 tons Jack Pine volume

**Includes approx. 60 tons black oak, 30 tons red maple, and 10 tons black cherry

Estimated Price for Entire Sale = \$63,020.00

Purpose of Sale: Intermediate thinning in mixed pine stands to improve health of stand and open up understory for regeneration of tree species and native plants. Intermediate thinning in red pine plantation to improve stand health, crop tree vigor, and spacing.

Cutting Specifications: Cut all trees marked with orange paint. All White Pine and Jack Pine >5" diameter are designated to be cut in Tract 1. Red paint lines are tract boundaries. Trees painted with red shall not be harvested.

Special Operating Requirements and Slash Disposal:

1. This sale is an upland, dry site with sandy soils.
2. Sale boundaries include red paint line, plantation boundaries, and town roads. Trees painted with red shall not be harvested.
3. Biomass harvesting is not allowed due to poor soils.
4. All pine products cut between March 1st and August 30 must be removed from the sale area within three weeks from time of cutting to control bark beetle populations. Pine products cut during the remainder of the year must be removed before March 15th.
5. A snowmobile trail runs through this sale. During winter harvesting, signs must be placed on trail access route where harvesting could be a safety hazard to those recreating. All trails used by logging equipment must be left to satisfaction of DNR Forester. No plowing snowmobile trails to bare mineral soil.
6. Slash must be evenly lopped/scattered within the sale boundary and shall be deposited a minimum of 10 feet from the mowed right-of-way of any highway, town road, or recreational trail. Slash within 50 feet of all town roads and recreational trails must lie within 2 feet of the ground. Do not bury seedlings or saplings with slash.
7. The red pine plantations are located within the 25-mile Heterobasidial Root Disease (Annosum) area, and require stump treatment unless harvested between December 1 and March 31. Treatment must be performed by a Certified Pesticide Applicator. Treatment involves chemically treating all fresh-cut stumps of pines of merchantable size by applying either CELLU-TREAT (disodium octaborate tetrahydrate) or Rotstop C (biological fungicide). Treatment shall be made as soon as possible and no later than one day after harvest and a dye product shall be added to liquid solutions for inspection purposes. The cost of this application can vary based on application method and harvest conditions, but should be considered when submitting bids on these timber sales.

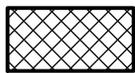

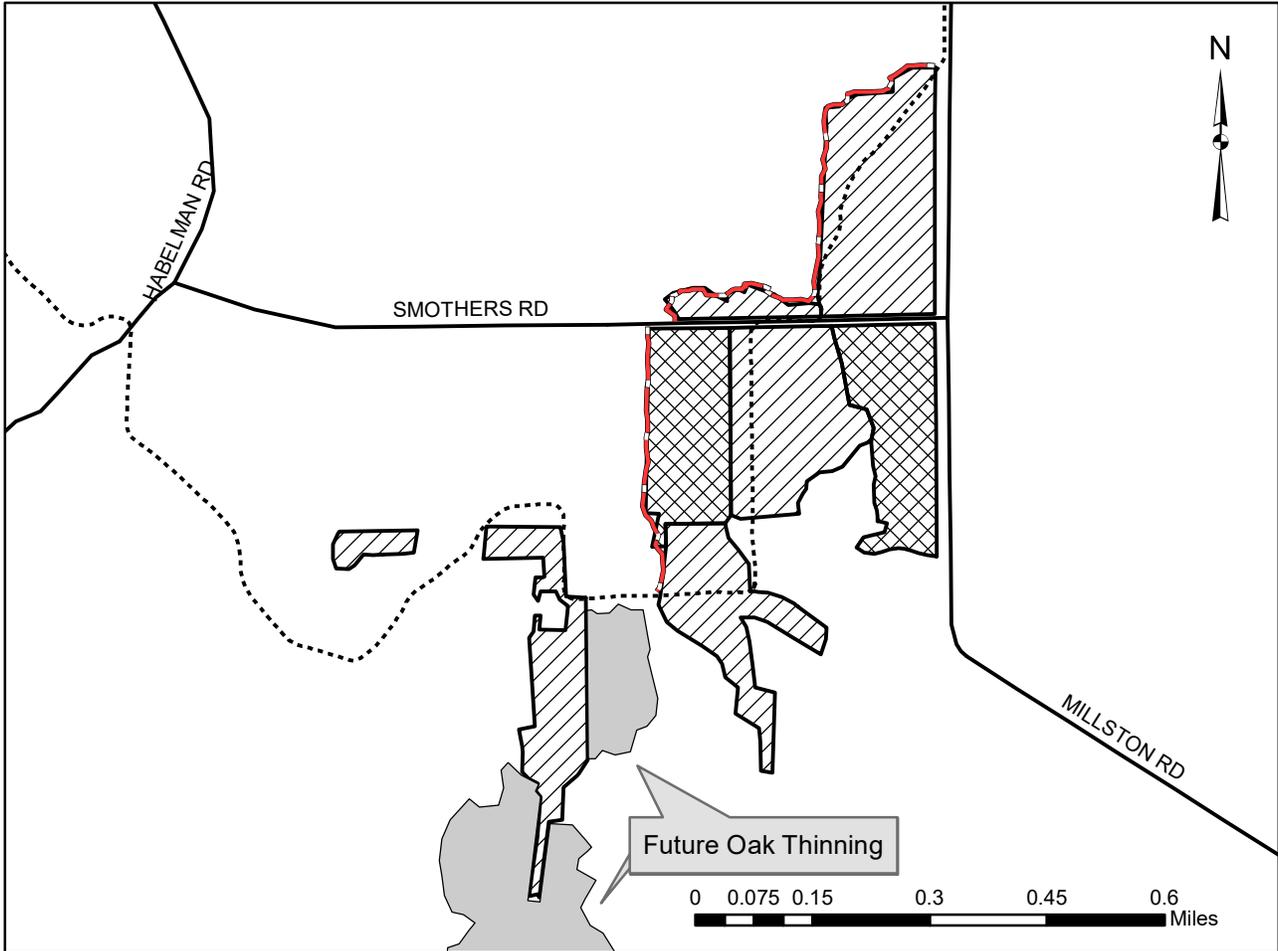

General Requirements:

1. All landings must be approved by a DNR forester before operations begin.
2. All designated tree species must be cut and forwarded concurrently with the sale.
3. All stumps shall be no higher than the stump diameter, or 10 inches, whichever is less.
4. Do not cut or knock down any dead or hollow trees. These are important wildlife habitat. Any that must be cut shall be left in big pieces on the forest floor.
5. Utilization: cut and use all designated trees with one or more 100" sticks to a 4" top diameter.
6. Notify the DNR forester before you start the job, and each time you pull out or return to the job.
7. Any new roads and all landings must be approved by a DNR forester before operations begin.
8. Any berms removed during harvesting operations must be put back to the satisfaction of the DNR Forester.
9. Any trees cut or pushed over for new roads or landings must be utilized or cleaned up to the DNR Forester's satisfaction.
10. Contact the town of Millston prior to beginning logging operations at: 715-284-0913
11. **Wisconsin's Best Management Practices for Invasive Species applies – contractor must clean equipment before entering and leaving the sale area! This involves brushing away all dirt and cleaning air intakes of debris.**

BRSF Tract 3-19
Town Line Oak
T20N-R2W Sec 1

Sale size: 95 Acres
Contract Period: 2 years

Estimated Volume

<u>Species</u>	<u>Cord Equivalent*</u>	<u>Tons</u>	<u>Advertised Value/Unit*</u>
Oak ⁺	(1450)	4000	\$13.90
Aspen	(490)	1100	\$11.80
Maple [*]	(240)	550	\$12.40
Red Pine ⁺⁺	(170)	380	\$15.10
White Pine ^{**}	(80)	170	\$11.80

⁺ Oak volume includes approx. 220 MBF sawlogs

^{*} Maple volume includes < 20 tons birch and cherry pulp

⁺⁺ Red pine volume includes approx. 20 MBF sawlogs

^{**} White pine volume includes approx. 12 MBF sawlogs and < 20 tons jack pine pulp

Estimated Price for Entire Sale* = \$ 83,144.00

Purpose of Sale:

To regenerate an even-aged oak stand and thin another oak stand.

Special Operating Requirements and Slash Disposal:

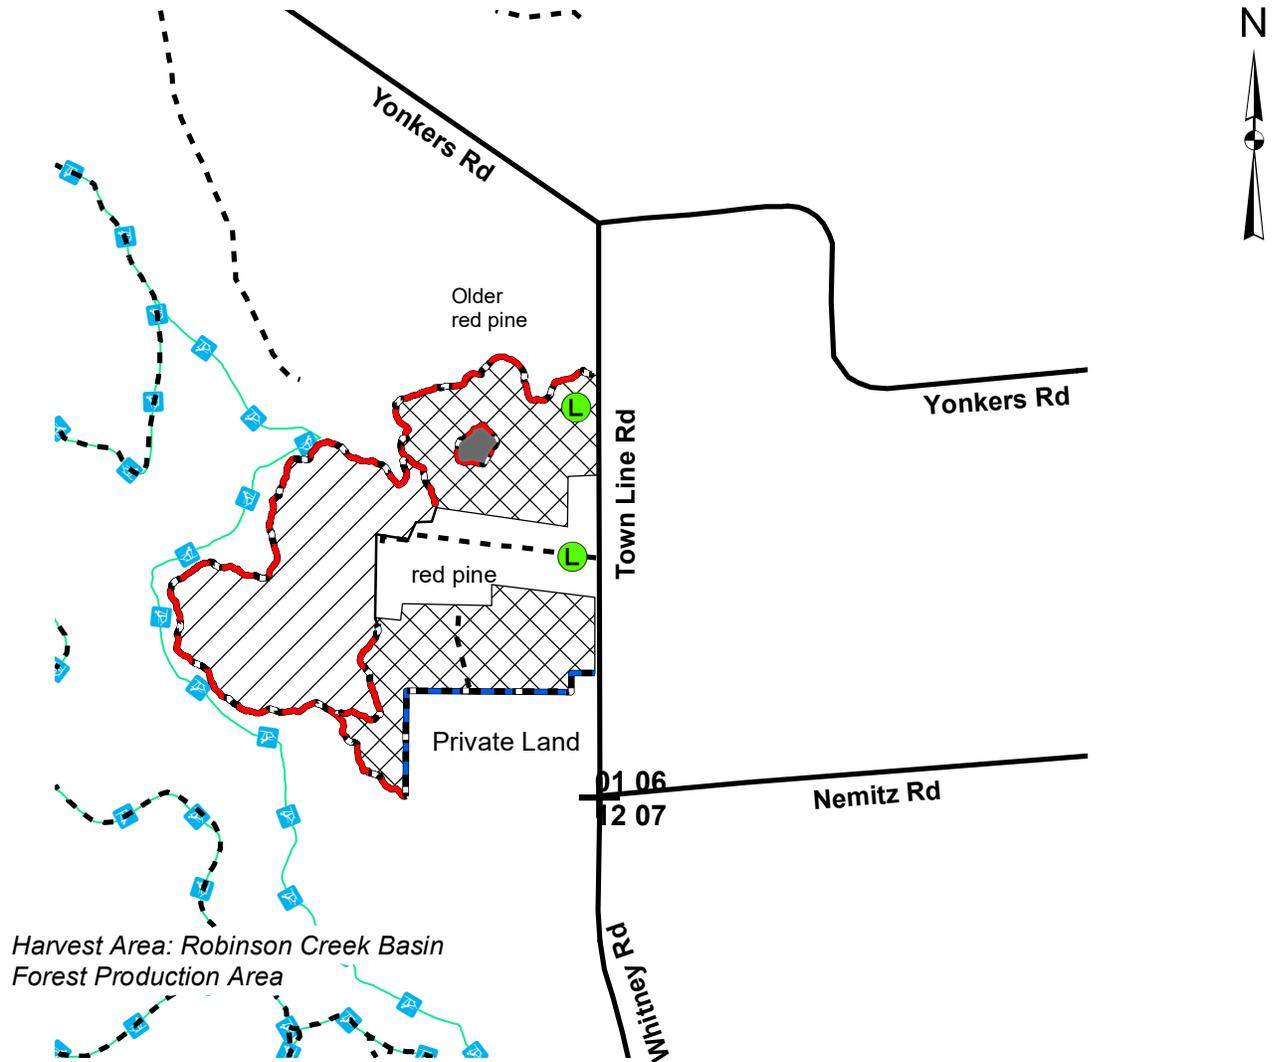

1. This sale has oak wilt restrictions on all portions. No harvesting on the sale between April 1 and July 15.
2. The sale area is all high, dry ground and includes some steep slopes. The DNR forester will work with the logger to determine if some of the slopes are too steep to cut with the equipment the logger has available.
3. The sale boundaries are red paint lines, blue paint lines, Town Line Road, and the red pine plantation edge. Do not cut painted boundary trees. Interior boundary lines are also painted red, but on both sides of the trees.
4. **Do not cross the blue painted line – private boundary. Do not fell trees or leave slash or tops hanging across the line.**
5. All pine products cut between March 1st and August 30 must be removed from the sale area within three weeks from time of cutting. Pine products cut during the remainder of the year must be removed before March 15th.
6. Slash must be evenly lopped/scattered within the sale boundary and shall be deposited a minimum of 10 feet from the mowed right-of-way of any highway, town road, or recreational trail. Slash within 50 feet of all town roads and recreational trails must lie within 2 feet of the ground. Do not bury seedlings or saplings with slash.

General Requirements:

1. All designated tree species must be cut and forwarded concurrently with the sale.
2. All stumps shall be no higher than the stump diameter, or 10 inches, whichever is less.
3. Do not cut or knock down any dead or hollow trees. These are important wildlife habitat. Any that must be cut shall be left in big pieces on the forest floor.
4. **Utilization:** cut and use all designated trees with one or more 100” sticks to a 4” top diameter.
5. Any new roads and all landings must be approved by a DNR forester before operations begin.
6. Any berms removed during harvesting operations must be put back to the satisfaction of the DNR Forester.
7. Notify the DNR forester before you start the job, and each time you pull out or return to the job.
8. Any trees cut or pushed over for new roads or landings must be utilized or cleaned up to the DNR Forester’s satisfaction.
9. Contact the town of Millston prior to beginning logging operations at: 715-284-0913.
10. **Wisconsin’s Best Management Practices for Invasive Species applies – contractor must clean equipment before entering and leaving the sale area! This involves brushing away all dirt and cleaning air intakes of debris.**

BRSF Tract 4-19
White Pine Connection
T22N-R2W Sec 6

Sale size: 88 Acres
Contract Period: 2 years

Estimated Volume

<u>Species</u>	<u>Cord</u> <u>Equivalent</u>	<u>Tons</u>	<u>Advertised</u> <u>Value/Ton</u>
Red Maple	(275)	630	\$ 9.90
White Pine*	(230)	525	\$12.30
Jack Pine	(230)	490	\$13.90
Oak ⁺	(170)	465	\$ 7.50
Aspen	(160)	360	\$ 7.80

* White pine volumes includes approx. 25 MBF sawlogs and 40 tons of red pine pulp

+ Oak volume includes approx. 20 MBF sawlogs

Estimated Price for Entire Sale = \$ 25,801.00

Purpose of Sale: To thin a white pine stand and harvest mature red maple, oak, jack pine and aspen.

Special Operating Requirements and Slash Disposal:

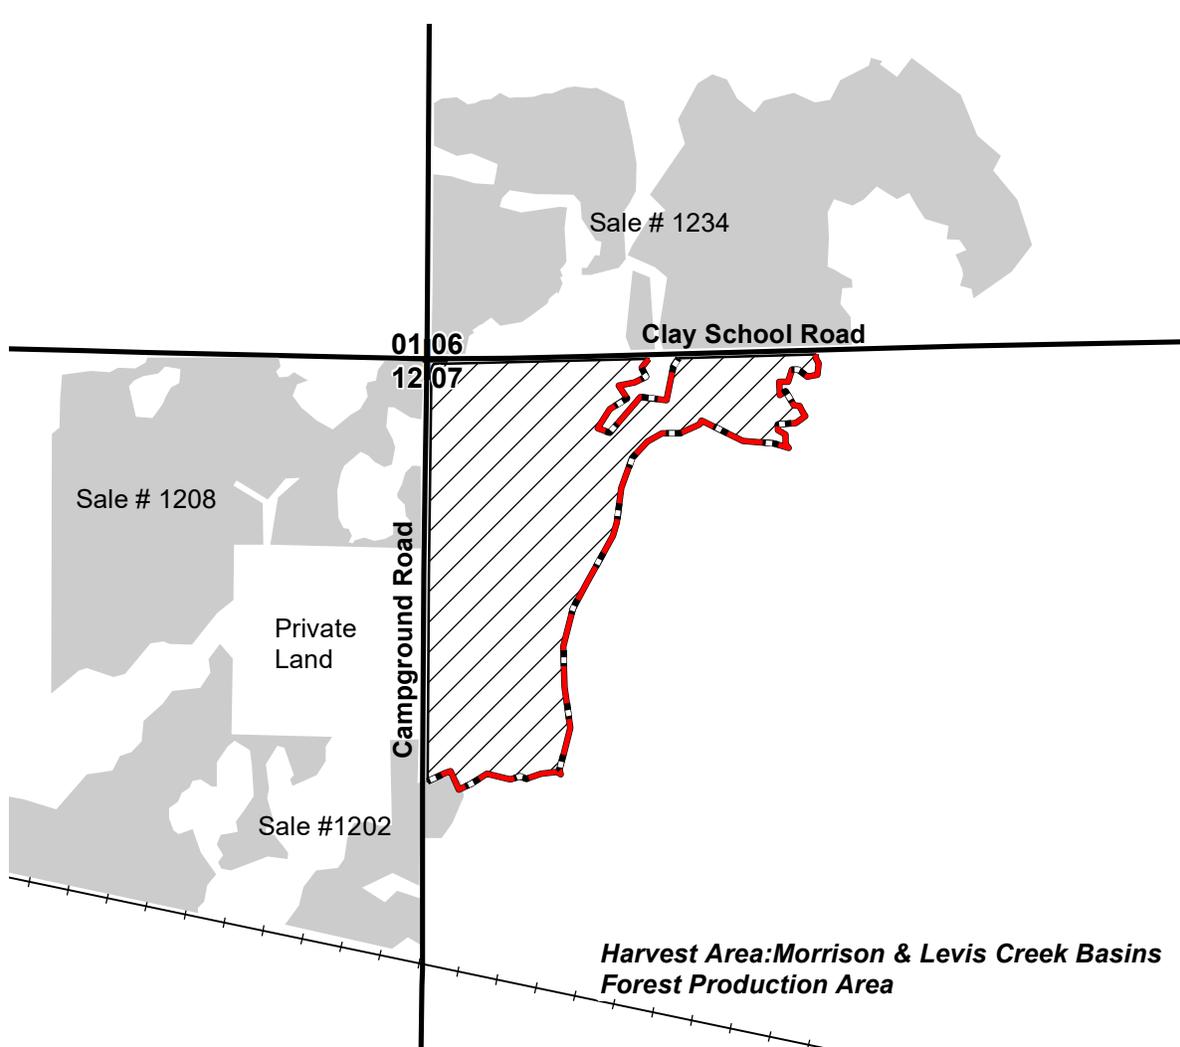

1. The sale boundaries are red paint lines and the town or state road.
2. Parts of the sale are on wet ground and will need dry or frozen conditions and extra care or brushing to prevent rutting.
3. Any open wet areas in the sale should be avoided by equipment unless the ground is frozen.
4. No biomass harvesting is allowed on this sale due to the need to use slash to armor the forest floor.
5. All pine products cut between March 1st and August 30 must be removed from the sale area within three weeks from time of cutting. Pine products cut during the remainder of the year must be removed before March 15th.
6. Slash must be evenly lopped/scattered within the sale boundary and shall be deposited a minimum of 10 feet from the mowed right-of-way of any highway, town road, or recreational trail. Slash within 50 feet of all town roads and recreational trails must lie within 2 feet of the ground. Do not bury seedlings or saplings with slash.

BRSF Tract 8-19

Lazy L Pine

T21N-R2W Sec 27

Sale size: 50 Acres
Contract Period: 2 years

Estimated Volume

<u>Species</u>	<u>Cord Equivalent</u>	<u>Tons</u>	<u>Advertised Value/Ton</u>
Red Pine*	(535)	1200	\$12.80
Oak**	(22)	60	\$ 6.90

* Red pine volume includes approx. 120 tons white pine and < 10 tons jack pine pulp.

** Oak volume includes approx. 15 tons aspen and < 10 tons maple pulp.

Estimated Price for Entire Sale = \$ 15,774.00

Purpose of Sale: To thin a red pine plantation for the first time.

Special Operating Requirements and Slash Disposal:

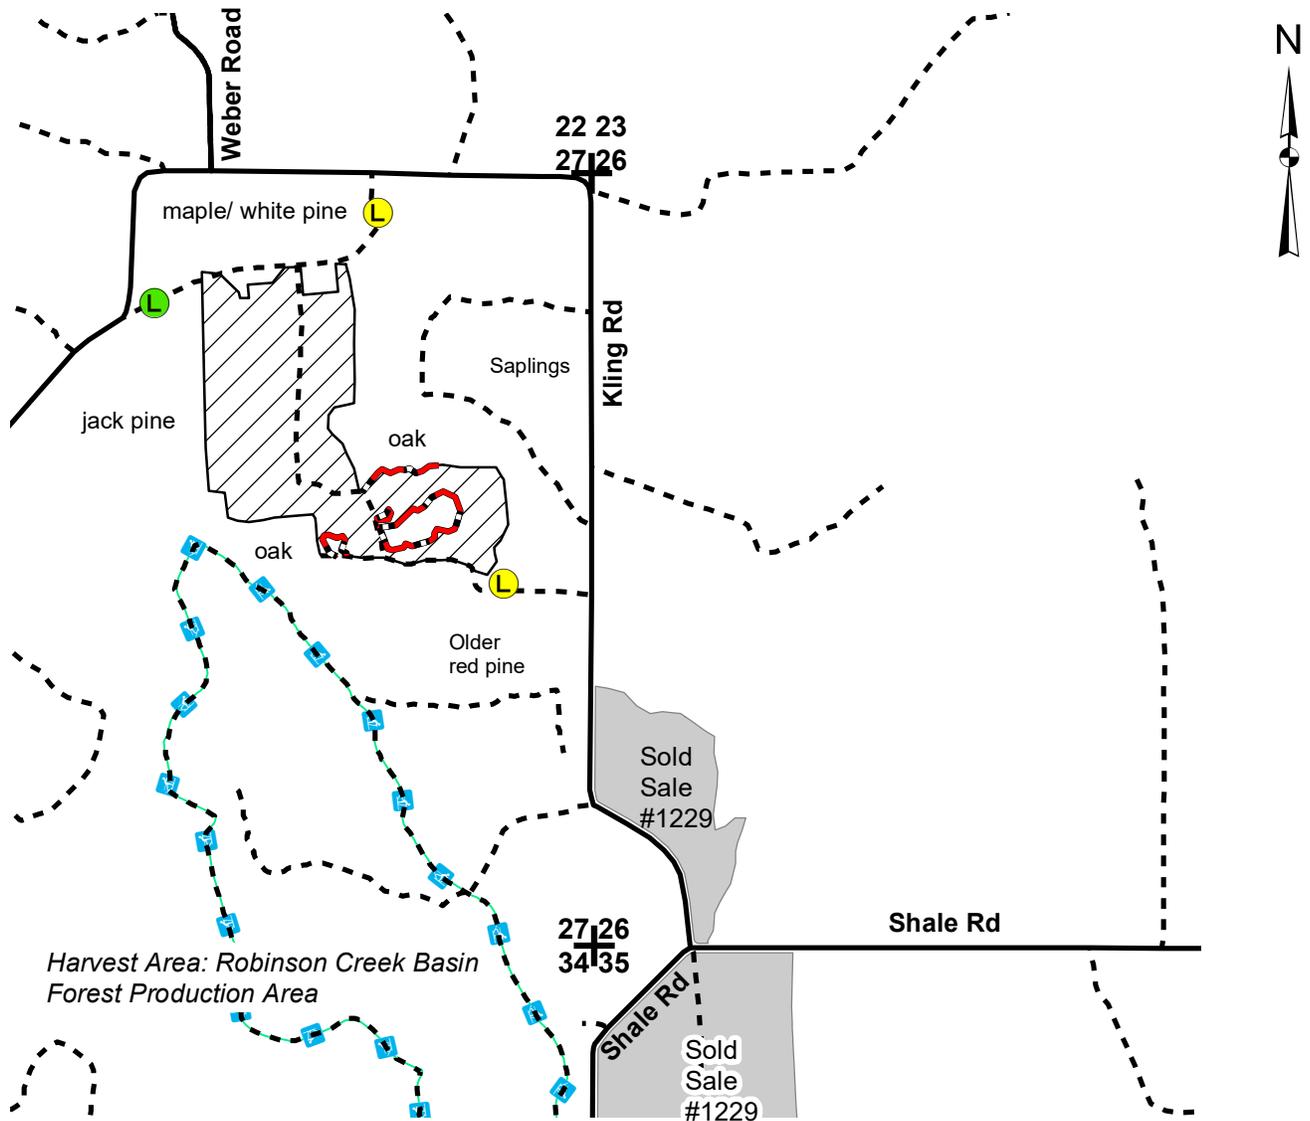

1. This is a first thinning, but on a very good site. **The red pine are generally 3 sticks or better and have diameters 5-12”.**
2. The sale boundaries are red paint lines, edges of pine plantations and woods roads. Do not fell trees across paint lines and do not cut painted boundary trees.
3. In some areas it is difficult to determine which direction the rows were planted. The harvester will just need to choose a direction and stick with it as much as possible. The bulk of the stand has rows running north and south.
4. A few areas of oak and aspen have been marked with red paint to exclude them from the sale. No equipment operation allowed inside these red painted areas.
5. No biomass harvesting is allowed on this sale due to poor soil fertility.
6. All pine products cut between March 1st and August 30 must be removed from the sale area within three weeks from time of cutting. Pine products cut during the remainder of the year must be removed before March 15th.
7. Slash must be evenly lopped/scattered within the sale boundary and shall be deposited a minimum of 10 feet from the mowed right-of-way of any highway, town road, or recreational trail. Slash within 50 feet of all town roads and recreational trails must lie within 2 feet of the ground. Do not bury seedlings or saplings with slash.

General Requirements:

1. All designated tree species must be cut and forwarded concurrently with the sale.
2. All stumps shall be no higher than the stump diameter, or 10 inches, whichever is less.
3. Do not cut or knock down any dead or hollow trees. These are important wildlife habitat. Any that must be cut shall be left in big pieces on the forest floor.
4. **Utilization:** cut and use all designated trees with one or more 100” sticks to a 4” top diameter.
5. Notify the DNR forester before you start the job, and each time you pull out or return to the job.
6. Any new roads and all landings must be approved by a DNR forester before operations begin.
7. Any berms removed during harvesting operations must be put back to the satisfaction of the DNR Forester.
8. Any trees cut or pushed over for new roads or landings must be utilized or cleaned up to the DNR Forester’s satisfaction.
9. The Township of Millston (phone # 715-284-0913) must be notified prior to sale start-up.
10. **Wisconsin’s Best Management Practices for Invasive Species applies – contractor must clean equipment before entering and leaving the sale area! This involves brushing away all dirt and cleaning air intakes of debris.**

I understand that any or all bids may be rejected and that consideration and awarding of a contract will be based upon my past performance and ability to complete contracts. **I also understand that if I am the winning bidder, I have 6 weeks from the date of the bid opening to submit an acceptable performance bond. I also understand that if I am awarded the contract and fail to execute it or work under it, I will be required to forfeit to the Department an amount equal to 10% of my total bid amount.** Failure to forfeit the 10% penalty will result in being considered ineligible to bid on any state timber sales for a two-year duration. In the event the highest bidder can not or will not sign the contract, the award will be made to the next highest qualified bid.

Notice: I understand:

Utilization specifications and estimated volumes are listed in the prospectus which is available upon request from the Department.

A copy of the standard timber sales contract which must be entered into is available upon request from the Department.

Popple Paradise Sale
Jackson County State Lands Tract 1-18
S. Beaver Creek Wildlife Area
T19N R6W S5,8

Sale size: 62 Acres
Contract Period: 3 years

Estimated Volume

<u>Species</u>	<u>Cord Equivalent</u>	<u>Tons</u>	<u>MBF</u>	<u>Advertised Value/Ton</u>	<u>Advertised Value/MBF</u>
Mixed Hardwoods*	(400)	1000		\$4.60	
Aspen	(288)	650		\$4.30	
Oak	(105)	290	32	\$3.70	\$84.00
Red Pine	(29)	65		\$8.30	

*Mixed Hardwood pulp includes approximately 400 tons of white birch, 225 tons of hickory, and 145 tons of red maple. Conversion factor will be 2.4 tons per cord for all mixed hardwood pulp.

Estimated Price for Entire Sale = \$ 11,695.50

Purpose of Sale:

A mix of coppice harvests to regenerate new oak growth while leaving large oaks as a seed source, as well as to regenerate aspen pockets and promote a variety of forest age classes on the property.

Cutting Specifications: (See tracts marked on map)

- Tract 1 – Cut all trees >2” diameter except for trees marked with green paint.
- Tract 2 – Cut all trees > 2” diameter except for trees marked with green paint.
- Tract 3 – Cut all trees >2” diameter except for all Oak species.

Special Operating Requirements and Slash Disposal:

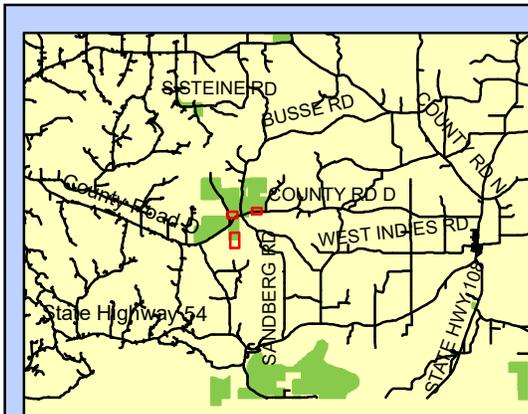

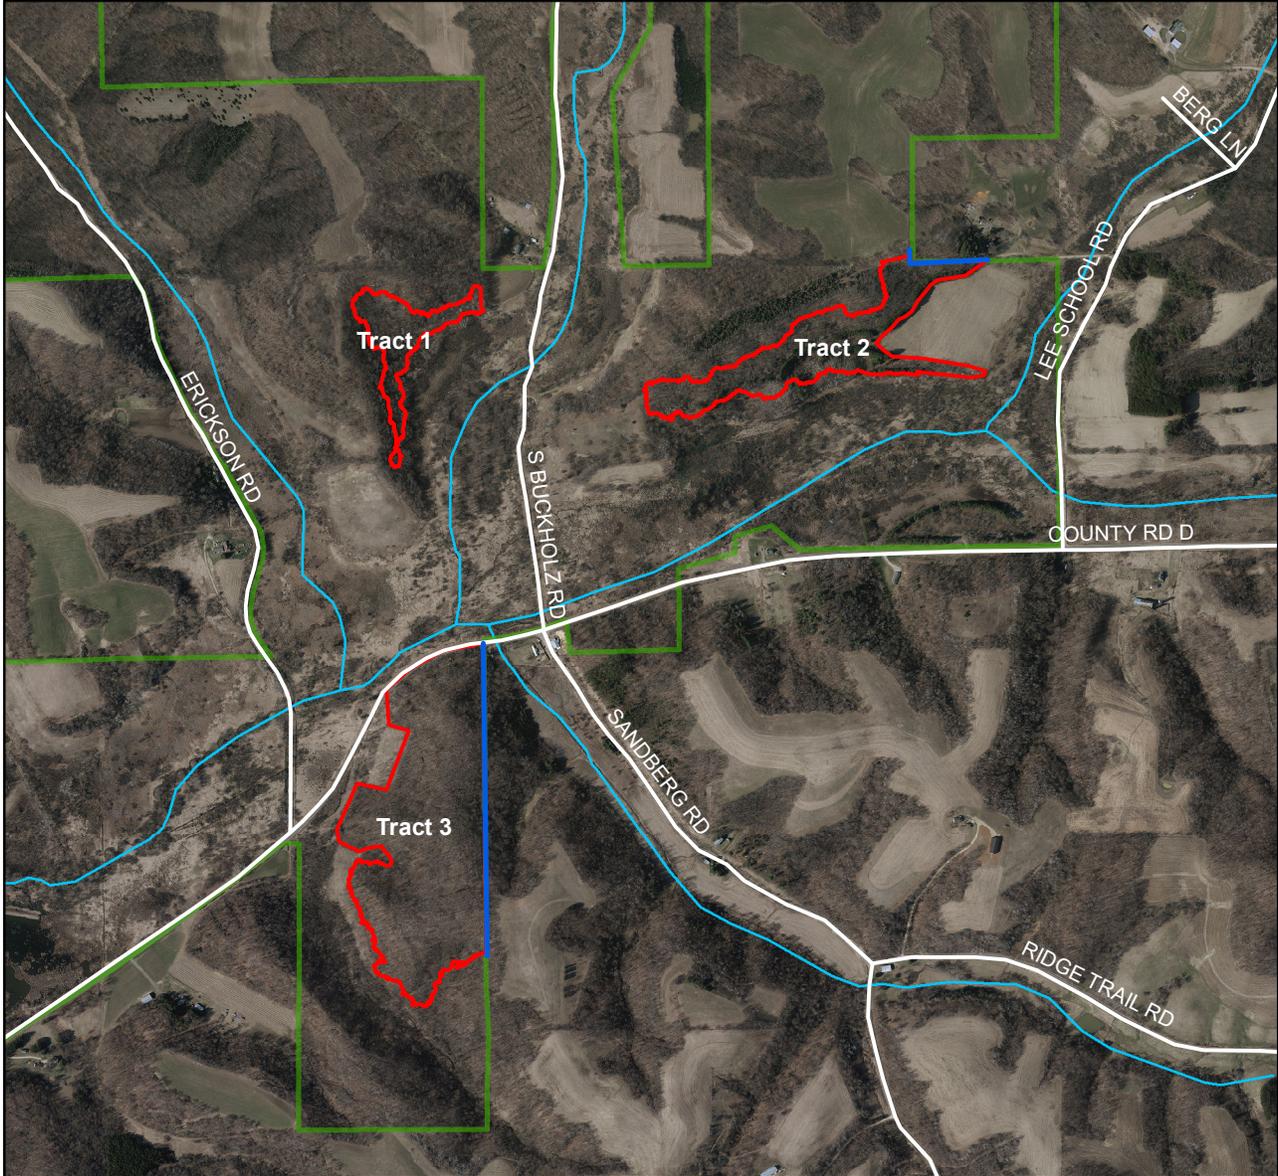

1. This sale is located mainly on dry ground. Care should be taken to avoid rutting and soil compaction.
2. The sale harvest boundaries are marked with red paint as well as blue paint. Blue paint lines are property boundaries to private lands. Do not fell trees across blue paint lines and do not cut painted boundary trees.
3. No biomass harvesting is allowed on this sale due to unsuitable soil types.
4. All pine products cut between March 1st and August 30 must be removed from the sale area within three weeks from time of cutting to control bark beetle populations. Pine products cut during the remainder of the year must be removed before March 15th.
5. No recreational trails run through the sale area, but all roads used by logging equipment should be left in good condition. Two private driveway easements lead to sale areas and shall be left in good condition once sale is harvested. Final condition of these roads must be left in a condition satisfactory to the DNR forester and wildlife property manager.
6. Slash must be evenly lopped/scattered within the sale boundary and shall be deposited a minimum of 10 feet from the mowed right-of-way of any highway, town road, or recreational trail. Slash within 50 feet of all town roads and recreational trails must lie within 2 feet of the ground. Do not bury seedlings or saplings with slash.

General Requirements:

1. All landings must be approved by a DNR forester before operations begin.
2. All designated tree species must be cut and forwarded concurrently with the sale.
3. All stumps shall be no higher than the stump diameter, or 10 inches, whichever is less.
4. Do not cut or knock down any dead or hollow trees. These are important wildlife habitat. Any that must be cut shall be left in big pieces on the forest floor.
5. Utilization: cut and use all designated trees with one or more 100” sticks to a 4” top diameter.
6. Notify the DNR forester before you start the job, and each time you pull out or return to the job.
7. Any new roads and all landings must be approved by a DNR forester before operations begin.
8. Any berms removed during harvesting operations must be put back to the satisfaction of the DNR Forester.
9. Any trees cut or pushed over for new roads or landings must be utilized or cleaned up to the DNR Forester’s satisfaction.
- 10. Wisconsin’s Best Management Practices for Invasive Species applies – contractor must clean equipment before entering and leaving the sale area! This involves brushing away all dirt and cleaning air intakes of debris.**

Biomass Basin Sale
Jackson County State Lands Tract 2-18
Bauer Brockway Barrens State Natural Area
T21N R3W S16

Sale size: 27 Acres
Contract Period: 2 years

<u>Species</u>	<u>Cord Equivalent</u>	<u>Estimated Volume</u>		<u>Advertised Value/Ton</u>	<u>Advertised Value/MBF</u>
		<u>Tons</u>	<u>MBF</u>		
Aspen	(200)	450		\$5.20	
Red Pine	(85)	190		\$8.10	
Mixed Hardwood*	(35)	100		\$5.30	
Jack Pine	(35)	75		\$7.10	

*Includes approximately 75 tons of black oak and 25 tons of red maple. Conversion factor will be 2.75 tons per cord for black oak and 2.275 tons per cord for red maple.

Estimated Price for Entire Sale = \$ 4,941.50

Purpose of Sale:

This sale is meant to improve barrens habitat on the state natural area property by cutting strips of Jack Pine as well as removing most red pine from the sale area. It also looks to regenerate aspen while creating a mosaic of age classes on the property.

Cutting Specifications:

- Unit A – Jack Pine and Black Oak, 4 acres - Cut all trees marked with orange slashes on either side of tree. Biomass required.
- Unit B – Red Pine, 5 acres - Cut all red pine trees except for those marked in green paint. Do not cut jack pine. Biomass required.
- Unit C – Aspen, Black Oak, Red Maple, 18 acres - Cut all trees inside of red paint boundary down to 2" diameter. Do not cut trees marked with green paint. Biomass optional.

Special Operating Requirements and Slash Disposal:

1. **This is a LUMP SUM sale. Pre-payment is required prior to beginning operations on the sale. Payment must be made for the entire Unit (see map) before any cutting or clearing can be done in that unit.**
 - a. **The payment for each unit will be based on its percentage of total acres – Unit A and Unit B combined will be 33% and Unit C will be 67% of the total sale value.**
2. This sale is located mainly on dry ground. Stands should be **harvested between the dates of Dec. 1 and March 15**, due to rare species present. Care should be taken to avoid rutting and soil compaction.
3. The sale harvest boundaries are marked with red paint or are where marked areas end. Blue paint lines are property boundaries to lands under other ownership. Do not fell trees across blue paint lines and do not cut painted boundary trees.
4. For biomass harvesting required units, all slash and non-merchantable wood must be removed from Units A and B. Any undesigned trees have to be approved for cutting by DNR Forester and must be piled and paid for separately.
5. All pine products cut between March 1st and August 30 must be removed from the sale area within three weeks from time of cutting to control bark beetle populations. Pine products cut during the remainder of the year must be removed before March 15th.
6. All roads used by logging equipment should be left in condition deemed satisfactory by DNR forester and property manager. There are two possible stream crossing locations shown on attached map. These are the only locations at which the stream can be crossed during harvest. Timber Mats must be used. DNR office has timber mats available for use that must be transported by contractor.
7. Slash must be evenly lopped/scattered within the sale boundary and shall be deposited a minimum of 10 feet from the mowed right-of-way of any highway, town road, or recreational trail. Slash within 50 feet of all town roads and recreational trails must lie within 2 feet of the ground. Do not bury seedlings or saplings with slash.

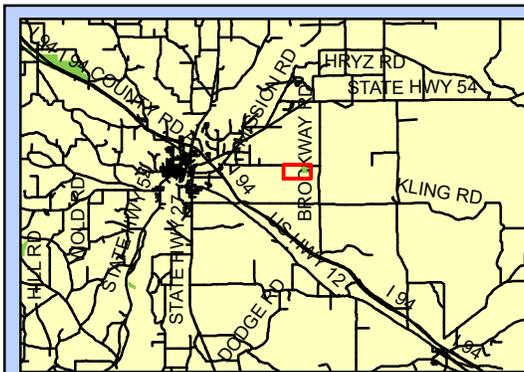

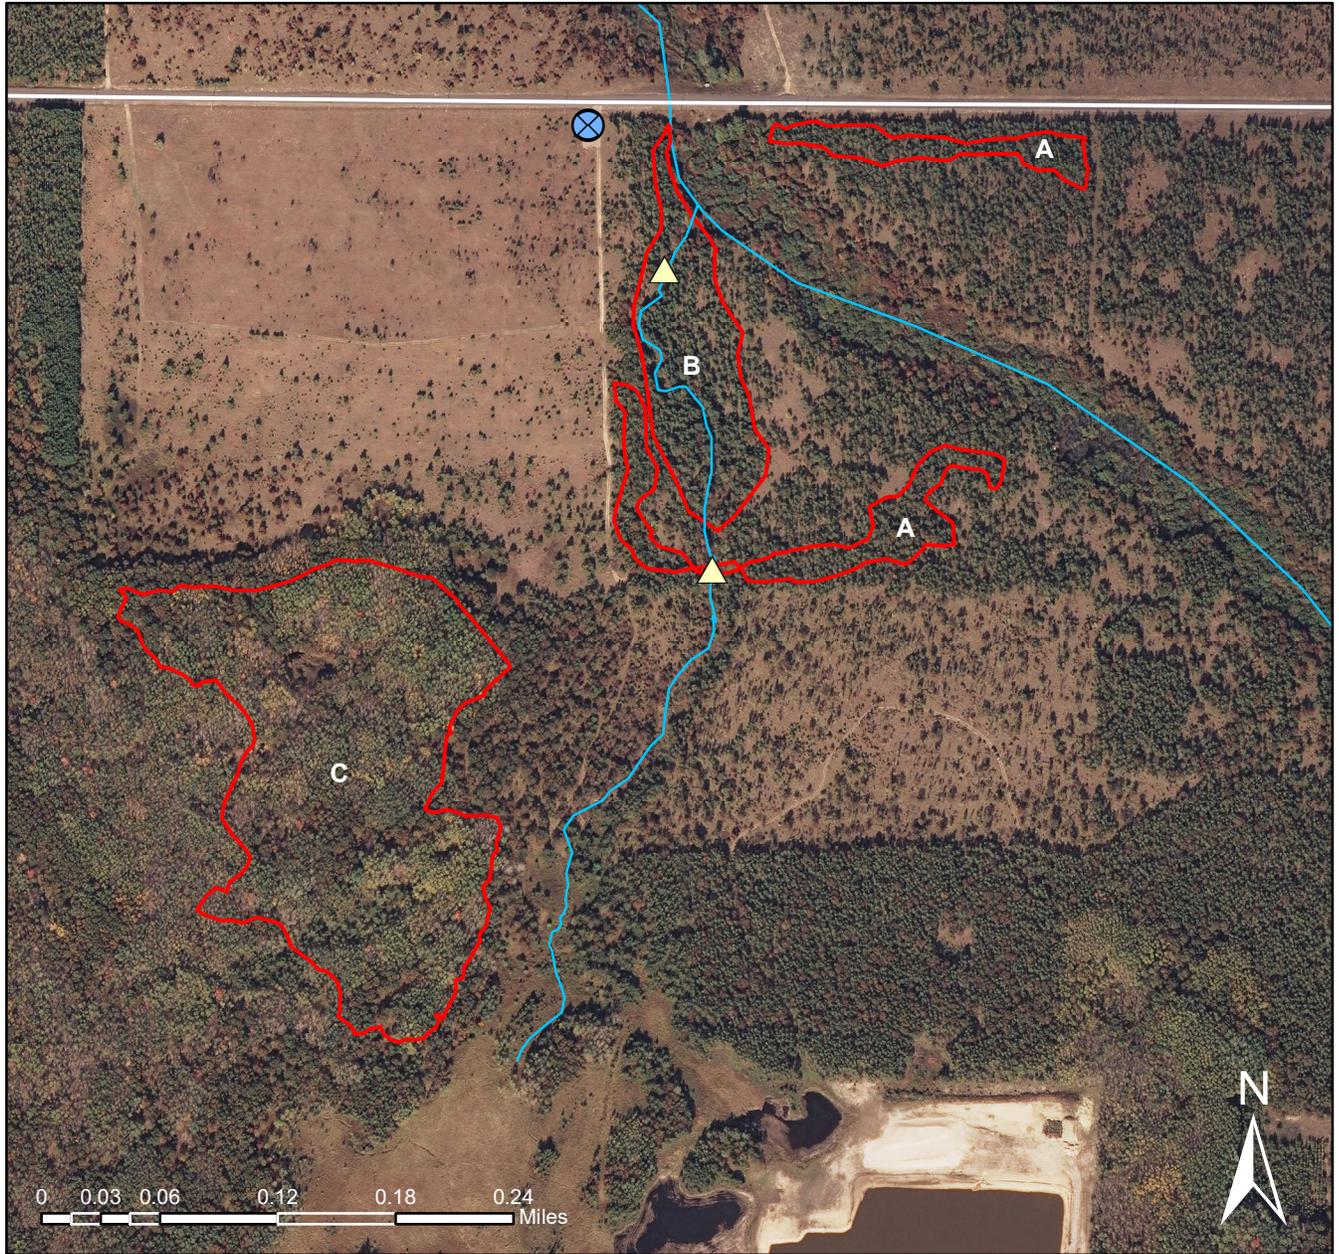

(Continued on next page)

General Requirements:

1. All landings must be approved by a DNR forester before operations begin.
2. All designated tree species must be cut and forwarded concurrently with the sale.
3. All stumps shall be no higher than the stump diameter, or 10 inches, whichever is less.
4. Do not cut or knock down any dead or hollow trees. These are important wildlife habitat. Any that must be cut shall be left in big pieces on the forest floor.
5. Utilization: cut and use all designated trees with one or more 100" sticks to a 4" top diameter.
6. Notify the DNR forester before you start the job, and each time you pull out or return to the job.
7. Any new roads and all landings must be approved by a DNR forester before operations begin.
8. Any berms removed during harvesting operations must be put back to the satisfaction of the DNR Forester.
9. Any trees cut or pushed over for new roads or landings must be utilized or cleaned up to the DNR Forester's satisfaction.
- 10. Wisconsin's Best Management Practices for Invasive Species applies – contractor must clean equipment before entering and leaving the sale area! This involves brushing away all dirt and cleaning air intakes of debris.**
- 11. These lands are 3rd party certified.**

Sunnyvale Pine Sale
Jackson County State Lands Tract 3-18
Hall Creek Fishery Area
T23N R4W S17,18

Sale size: 39 Acres
Contract Period: 2 years

Estimated Volume

<u>Species</u>	<u>Cord Equivalent</u>	<u>Tons</u>	<u>MBF</u>	<u>Advertised Value/Ton</u>	<u>Advertised Value/MBF</u>
Red Pine*	(535)	1200		\$12.90	

*Includes approximately 10 cords of red maple.

Estimated Price for Entire Sale = \$ 15,480.00

Purpose of Sale:

A mix of red pine thinnings to improve stand vigor for crop trees and lower basal area for better spacing.

Cutting Specifications:

Cut all trees marked in orange paint. Red paint indicates sale boundary on public land, blue paint indicates boundary to private land.

Special Operating Requirements and Slash Disposal:

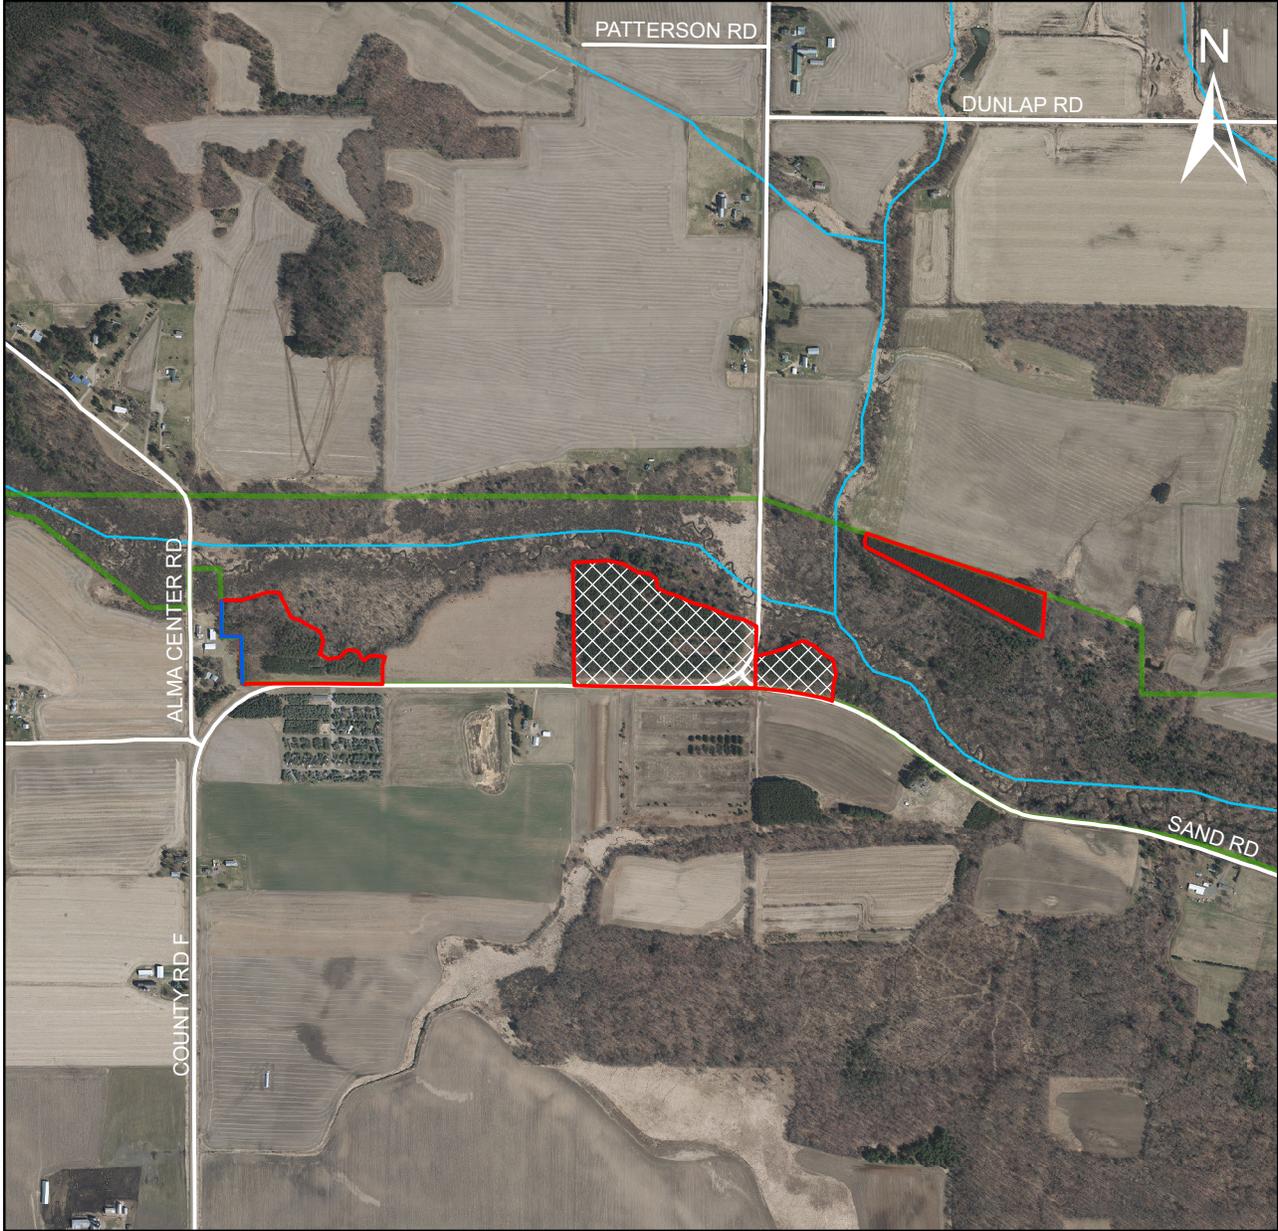

1. This sale is located mainly on dry ground. Stands should be harvested during dry or frozen ground conditions. Care should be taken to avoid rutting and soil compaction. **Stands cross-hatched on map must be harvested during well-frozen ground ONLY.**
2. The sale harvest boundaries are marked with red paint as well as blue paint. Blue paint lines are property boundaries to private lands. Do not fell trees across blue paint lines and do not cut painted boundary trees.
3. No biomass harvesting is allowed on this sale. Tops should be left on site and spread evenly to reduce erosion as this sale is near Halls Creek.
4. All pine products cut between March 1st and August 30 must be removed from the sale area within three weeks from time of cutting to control bark beetle populations. Pine products cut during the remainder of the year must be removed before March 15th.
5. No recreational trails run through the sale area, but all roads used by logging equipment should be left in good condition. Signage noting log truck hauling is required to ensure safety along Hwy F.
6. Slash must be evenly lopped/scattered within the sale boundary and shall be deposited a minimum of 10 feet from the mowed right-of-way of any highway, town road, or recreational trail. Slash within 50 feet of all town roads and recreational trails must lie within 2 feet of the ground. Do not bury seedlings or saplings with slash.

General Requirements:

1. All landings must be approved by a DNR forester before operations begin.
2. All designated tree species must be cut and forwarded concurrently with the sale.
3. All stumps shall be no higher than the stump diameter, or 10 inches, whichever is less.
4. Do not cut or knock down any dead or hollow trees. These are important wildlife habitat. Any that must be cut shall be left in big pieces on the forest floor.
5. Utilization: cut and use all designated trees with one or more 100" sticks to a 4" top diameter.
6. Notify the DNR forester before you start the job, and each time you pull out or return to the job.
7. Any new roads and all landings must be approved by a DNR forester before operations begin.
8. Any berms removed during harvesting operations must be put back to the satisfaction of the DNR Forester.
9. Any trees cut or pushed over for new roads or landings must be utilized or cleaned up to the DNR Forester's satisfaction.
- 10. Wisconsin's Best Management Practices for Invasive Species applies – contractor must clean equipment before entering and leaving the sale area! This involves brushing away all dirt and cleaning air intakes of debris.**
- 11. These lands are 3rd party certified.**
