

**DEPARTMENT OF NATURAL RESOURCES
Black River Falls, Wisconsin**

**PUBLIC NOTICE
Timber for Sale - Invitation for Bids**

Sealed bids will be received by the Black River State Forest Property Manager at the Black River State Forest Headquarters (Castle Mound), W10325 Hwy 12, Black River Falls, Wisconsin 54615; up to 9:00 a.m. on Wednesday, October 23, 2019. A timber sale prospectus, map, bid forms and detailed information on each timber tract can be obtained by the internet at: <http://dnr.wi.gov/topic/TimberSales/salesBlackRiver.html> or by contacting the Forester at the above address, or by calling 715-410-8839.

Results from the bid opening and information on any un-sold tracts can be obtained by checking our website or calling the numbers listed above. Tracts not sold on October 23, 2019 will be available for re-bid up to 9:00 a.m. on Wednesday, October 30, 2019.

The Department of Natural Resources reserves the right to reject any or all bids. Bids will be opened publicly at the Black River State Forest Headquarters (Castle Mound), Black River Falls, at 9:00 a.m. on October 23, 2019 and October 30, 2019.

Tract Information

There are seven tracts of timber for sale on the Black River State Forest in T20N-R1W, T20N-R2W, T21N-R2W, T22N-R2W and T22N-R3W. The tracts comprise 687 acres and contain an estimated 22,725 tons of pine and hardwood pulp and sawtimber.

Additionally, there is one tract of timber for sale on Other State Lands in T29N-R6W. This tract is 30 acres and contains an estimated 760 tons of pine pulp. For questions regarding Other State Lands contact Matt Raabe at: 715-896-0536.

These lands are third party certified.

Bidding Requirements

All bids must be submitted as sealed bids, in individual envelopes for each tract, and labeled with the tract number. Use Department Timber Sale Bid Form (updated 2016 version 2400-49) and include the following:

1. Tract number
2. List of all species to be cut, utilization specifications (4" top for all sales in this bid opening), and estimated volumes as listed on the timber sale prospectus.
3. Bid price per unit for each species and product listed. No "zero" bids for any species will be accepted.
4. Check off the type of performance bond to be used in the appropriate box on the bid form.
5. Signature, address and phone number of bidder. E-mail contact information is optional.
6. **Lump sum bids will not be accepted.**
7. **Bids must be legible and accurate. If we cannot determine the price per unit, totals, or other required information, your bid may not be accepted.**
8. At any time prior to the reading aloud of any bids for a particular sale, bidders may withdraw their bid from consideration. This can be done in person or by written instruction to the Property Manager or DNR Forester conducting the bid opening.

****No Bid Bonds are required for this bid opening. However, if the winning bidder fails to execute the contract and submit an acceptable performance bond, the bidder shall be required to forfeit to the department an amount equal to 10% of the total bid amount. Failure to forfeit the 10% penalty will result in the bidder being considered ineligible to bid on any state timber sales for a two-year period.**

***All sawlog volumes are included with the tonnage volume estimates, unless noted otherwise, but estimates are listed on the prospectus. All Black River State Forest Sales will be scaled by the ton or converted to tons (from either cords or board feet) by the conversion rates in the contract. ***

Additional Requirements

Performance Bond of a minimum of \$1,000.00 or 15% of the total bid value is required upon the signing of a timber sale contract. Contracts must be signed within 2 weeks of the bid opening and performance bonds **must be received within 6 weeks of the bid opening**. An Irrevocable Letter of Credit issued as a Performance Bond will be required to be 4 years in length. Letters of Credit for sales awarded this bid opening should be written to expire on **December 1, 2023**. **If this is not possible through your lender, contact the DNR Forester as soon as possible for other options.**

Worker's Compensation Law: The contractor (purchaser) shall provide the Department with an original Certificate of Insurance indicating that Worker's Compensation Insurance coverage is provided for all of the contractor's (purchaser's) employees working under the contract during its duration. This shall be in the Department's file prior to any performance under the contract. The purchaser shall notify the Department in writing, immediately upon any change in or cancellation of insurance coverage required under the contract.

Payments: Timber will not be removed from any sale area until paid for or a satisfactory guarantee for payment is made. However, qualifying contractors have the option to sign a contract under the deferred payment program. Under this option, payment shall be received at the payment lock box in Milwaukee or by the DNR Forester within 30 days from billing. **(Deferred payment is not allowed with lump sum sales.)**

Late payment—Failure to pay within the 30-day period shall result in:

- The contractor being required to prepay stumpage on the remainder of the sale.
- The payment breach being documented by forwarding the contractor's name to the County Forest Specialist in Madison.
- A 1.5% every 30 days late interest penalty being assessed on stumpage due.

Sales Tax Exempt Status: The purchaser must also furnish a completed copy of the Department of Revenue Sales and Use Tax Exemption Certificate. (New filing requirement for DNR timber sales in 2016.)

Training Requirement: The purchaser is responsible for ensuring that the actual logging contractor complies with the Wisconsin SFI training standard as adopted by the SFI Implementation Committee (SIC). Criteria for the standards can be found at the Web site: www.fistausa.org/sfi_standards.html, or by contacting the Forest Industry Safety & Training Alliance (FISTA). Purchaser must provide documentation to Seller that training has been attained.

For timber sales that require stump treatment for Heterobasidial Root Disease (Annosum), treatment must be performed by a Certified Pesticide Applicator through Wisconsin Department of Agriculture, Trade and Consumer Protection. **Proof of Certification will be required prior to beginning any areas requiring treatment.** More information can be found at: http://datcp.wi.gov/Plants/Pesticides/Licenses/Commercial_Applicator_Certification. **Reporting of type and amount of chemical used will be required.**

Additional information and forms for bidding, including pre-filled bid sheets, can be obtained from the Forester, Black River State Forest, W10325 Hwy 12, Black River Falls, Wisconsin, 54615 or at our website: <http://dnr.wi.gov/topic/TimberSales/salesBlackRiver.html>. For questions regarding Other State Lands contact Matt Raabe at: 715-896-0536.

The Department of Natural Resources reserves the right to reject any or all bids.

NOTE: An updated 2016 Bid form (2400-49) is enclosed. Feel free to make your own copies if you need more.

Black River State Forest Fall 2019 Timber Sale Location Map

**Black River State Forest
General Sale Conditions**

The following conditions apply on all timber sales unless otherwise stated on the individual timber sale prospectus. These lands are third party certified.

Contracts and Extensions:

1. All contracts will be issued for a period of 2 years, unless otherwise noted. It is understood that all contracts are expected to be completed during the initial contract. Extensions are not automatic.
2. Requests for extensions must be submitted prior to the expiration date of the contract. The performance bond may be retained if requests are not submitted by the expiration date.

Cutting and Utilization:

1. All designated species for harvest must be cut concurrently within the sale. This includes any non-merchantable 2-4" dbh trees if designated. Care must be taken to not damage any residual trees.
2. All decked or cut pine must be removed from the sale area within 3 weeks of cutting from March 1st to August 30th to prevent bark beetle damage, this includes red pine, jack pine and white pine. Pine products cut during the remainder of the year must be removed before March 15th.
3. No scarring or debarking of residual trees from harvesters or skidders in excess of 10% on red pine plantations being thinned for the first time, or in excess of 3% on plantations thinned second, third, or fourth times.
4. Pulpwood: Cut all designated trees with one (1) or more 100" sticks to a 4" top diameter for hardwoods and softwoods, unless sold as a whole tree harvest. Only sales advertised with whole tree harvest volumes are eligible for whole tree utilization. Whole tree harvests require 10% of topwood (<4" diameter) volume to be left scattered in the sale area and Wisconsin's Forestland Woody Biomass Harvesting Guidelines must be followed.
5. Sawlogs: Cut all designated trees with one (1) or more 8'6" logs to a top diameter of 10" for hardwoods and 9" for softwoods.

Roads, Trails, and Landings:

1. The location and building of roads and landings are always subject to advanced approval and conditions of the seller (DNR Forester). A DNR Forester must be contacted at least 48 hours in advance for an appointment.
2. All logging debris accumulated at landings, including bark, tops, and slash, shall be scattered within the sale area to the satisfaction of the seller.
3. Berms (piles of dirt, debris, stumps, slash, etc.) constructed on the seller's property (Black River State Forest) shall be leveled to restore the area to the seller's satisfaction unless they are constructed at the direction of the seller. (In other words, do not pile or push dirt up with debris and slash around the edge of landings or along trails and roads, especially against standing trees and the edges of dense woods.)
4. Any road work or maintenance involving more than leveling / grading must be pre-approved by a DNR Forester. No borrow pits will be allowed.
5. Roads and landings shall be graded and leveled upon completion of the timber sale and restored to seller's satisfaction. Any trees pushed over or cut down for making roads or landings must be utilized or cleaned up to the DNR Forester's satisfaction.

Aesthetic & Ecological Considerations:

The seller reserves the right to change (add or subtract) marked or designated timber to be cut at anytime for aesthetic, ecological, BMP's or to protect endangered resources without mutual agreement of the buyer provided it does not affect 10% or more of the estimated volume.

The purchaser shall comply with all recommended Forestry BMPs for Invasive Species as described in "*Wisconsin's Forestry Best Management Practices for Invasive Species*" published by the Wisconsin Department of Natural Resources, publication Pub-FR-444-09, unless specifically provided otherwise.

Specifically: BMP 4.4: Prior to moving equipment onto and off of a harvest area, scrape or brush soil and debris from exterior surfaces, to the extent practical, to minimize the risk of transporting invasive species.

Preferred locations for cleaning equipment areas are those where:

- Equipment is unloaded and loaded.
- Invasives are less likely to spread from cleaned equipment (such as undisturbed areas).
- Invasive species are already established
- Equipment with the ability to run fans in reverse should use this feature to clean air intakes. Fans and air intakes can harbor plant materials and insects. Reversing the fan direction and blowing loose material out of equipment before leaving a site can reduce the likelihood of moving species to another site. Heat exhausted from the engine when fans are reversed may kill some insects and plant parts.
- In areas where invasive species are present, it is a good practice to routinely remove soil, seeds, vegetative matter, or other debris from shoes, clothing, and tools.
- The purchaser will follow BMPs for Water Quality. They will maintain a fully stocked spill kit on site whenever equipment is being used. This kit will include at least the following items: shovel, container for collecting spilled material, plugs & clamps for equipment and absorbent materials as described in the BMP for Water Quality Manual.

Scaling Specification:

1. The mill scale ticket system will be required for pulp and logs, unless otherwise stated in the prospectus. Contractor is required to deposit a scale ticket in the lock box placed on the sale. These tickets are provided by the State Forest and will be filled out in their entirety. The contractor is also required to deliver a mill ticket to the mill purchasing the forest product. This mill ticket will be returned to the Black River State Forest along with a copy of the mill’s scale. The contractor is responsible for having these mill tickets and scale slips returned to the Black River State Forest within 14 days of hauling. **The contractor may not scale his own wood without authorization from the DNR Forester.** An independent mill scale or weight or DNR scale shall be used at all times.
2. The seller reserves the right and may for any reason, decide to stick scale all products on the sale area. The contractor may also put in a request for stick scaling with at least 48 hours advance notice for reasonable circumstances.
3. Contractors that are required to prepay must at a minimum, purchase 5 or more scale tickets at a time, but it is encouraged that a full booklet of 25 scale tickets be purchased.
4. When there is no sawlog volume listed on the timber sale prospectus, bolts and logs may be scaled as cordwood. Scale sheets with tie logs or board feet volumes (using the Scribner Decimal “C” log rule) will be converted to cordwood volume using standard DNR conversion factors.
5. Pine and hardwood sawbolts, which normally would have been cut into sawlogs, will be scaled by weight (tons) or by the cord. The conversion factor for cordwood to MBF is 2.44 cords per MBF for softwoods, and 2.20 cords per MBF for hardwoods.
6. When peeled cordwood is measured, it is agreed that 12.5% will be added to hand peeled and stroke delimeter/processor peeled volume and 16% to ring debarked volume.
7. Lump Sum Sales require pre-payment prior to any harvesting or work on the sale begins. See individual prospectus for specifics on each sale.

Weight Conversion Factors: All wood will be scaled by the ton or converted to tons, unless advertised otherwise.

The following weight conversion factors will be used in the conversion of a standard 4’ x 4’ x 100” cord to tons. Factors for a mix of species may be developed by weighted average of cruise estimates based on species volume distribution and/or ocular estimate.

CORDWOOD WEIGHT CONVERSION FACTORS (POUNDS PER CORD)

Species	Weight (tons)	Weight (lbs)	Species	Weight (tons)	Weight (lbs)
Tamarack	2.325	4650	Hard maple	2.550	5100
Red pine	2.250	4500	Elm	2.500	5000
Jack pine	2.125	4250	White birch	2.400	4800
White pine	2.100	4200	Ash	2.300	4600
Spruce	2.000	4000	Soft maple	2.275	4550
White oak	2.925	5850	Aspen	2.250	4500
Red/black oak	2.750	5500	Basswood	1.925	3850
Hickory	2.700	5400	Locust	2.650	5300
Yellow birch	2.675	5350			

Survey Corners: Do not damage any survey corners or witness trees. No witness trees may be cut. It is the sale purchaser’s responsibility to pay for costs of damage, removal, or repair to any land survey monuments or accessories.

Slash: (including leaning trees due to damage by skidders or harvesters)

1. Slash falling in any lake, stream, marsh, flowage, road right-of-way, or on adjoining land shall be removed immediately and pulled back at least 10 feet inside the sale boundary.
2. All trees shall be completely felled and not left leaning or hanging in other trees. Tops from felled trees may not be left hanging in standing trees.
3. Slash must be evenly scattered across the sale area to within 2 feet of the ground concurrently with cutting. No large piles are allowed. Slash along state highways, county, town, and state forest roads, and recreational trails, must be pulled back a minimum of 10 feet within the sale edge.
4. Trees cut along the edges of any marsh, creeks, or flowages by harvesting machines must be felled to high ground to keep the slash out of wet areas. Machines operating along marshes, creeks or flowages must remain on high ground during the cutting to prevent rutting in wetlands. Do not cut across or through small marshes or wetlands with equipment, but rather work around them.
5. No slash is to be piled on any existing pine (red, white, or jack) reproduction in the understory. Do not bury seedlings and saplings.

Soil Disturbance and Rutting:

- a. The Purchaser agrees to take all steps and precautions to avoid and minimize soil disturbances, such as soil compaction and rutting. If soil disturbances occur, the Purchaser agrees to work cooperatively to mitigate and repair any and all instances of soil disturbance.
- b. Excessive soil disturbance (as defined in Table 1) shall not be permitted. Purchaser agrees to contact Seller in the event of an excessive soil disturbance.

Table 1. Thresholds for soil disturbances.

Timber Sale Infrastructure	Soil disturbances are excessive if:
Roads, Landings, Skid Trails, and General Harvest Area	<ul style="list-style-type: none">▪ A gully or rut is 6 inches deep or more and is resulting in channelized flow to a wetland, stream, or lake.
Roads, Landings, and Primary Skid Trails	<ul style="list-style-type: none">▪ In a riparian management zone (RMZ) or wetland, a gully or rut is 6 inches deep or more and 100 feet long or more.▪ In an upland area (outside of RMZ), a gully or rut is 10 inches deep or more and 66 feet long or more.
Secondary Skid Trails and General Harvest Area	<ul style="list-style-type: none">▪ A gully or rut is 6 inches deep or more and 100 feet long or more.

Note: The depth is to be measured from the original soil surface to the bottom of the depression. If individual lug depressions are visible, the depth would be measured to the lesser of the two depths (the "top" of the lug). The length is measured from the start of the "too deep" section to the end of the "too deep" section. Measurements are not cumulative.

- c. Prior to sale completion the Purchaser shall mitigate and repair soil disturbances to the Seller's satisfaction.

Heterobasidial Root Disease (Annosum) Treatment: (Only for sales that require it and when cut between April 1 and November 30.) Harvest areas listed as requiring treatment must be treated concurrently with harvesting by a DATCP Certified Pesticide Applicator. Proof of Certification will be required. Stumps must be treated within 12 hours of cutting. Blue or red dye (such as Hi-Light) shall be added to the liquid chemical treatment in a manner consistent with the label. The DNR forester may inspect any or all stumps and must be able to validate that treatment has been done successfully. Slash, sawdust and other debris shall be kept off treated stumps so that these inspections can be done. The DNR reserves the right to inspect and test the contractor's chemical tank at any time during the harvesting operations to make sure that proper treatment procedures are being followed. Missed stumps, poor chemical coverage, or stumps that are inaccessible for inspection may be considered a contract violation and may lead to termination of harvesting operations until the situation can be remedied to the satisfaction of the DNR. Additionally, the type and amount of chemical used will need to be reported to the DNR on forms provided by the Department.

High Fence Pine Sale
Jackson County State Lands Tract 1-19
North Bend Bottoms Wildlife Area
T19N R6W S34

Sale size: 30 Acres
Contract Period: 2 years

Estimated Volume

<u>Species</u>	<u>Cord Equivalent</u>	<u>Tons</u>	<u>MBF</u>	<u>Advertised Value/Ton</u>	<u>Advertised Value/MBF</u>
Red Pine	(340)	760		\$9.10	

Estimated Price for Entire Sale = \$ 6,916.00

Purpose of Sale:

Red pine plantation thinnings to improve overall stand vigor and health, while lowering basal area for better spacing.

Cutting Specifications:

Cut all trees marked in orange paint. Blue paint indicates boundary to private land; do not cut blue-marked trees. Harvest period is October 16 – March 31 due to multiple threatened species near site.

Special Operating Requirements and Slash Disposal:

1. This sale is located mainly on dry ground. Stands should be harvested during dry or frozen ground conditions. Care should be taken to avoid rutting and soil compaction.
2. The sale harvest boundaries are the edges of the red pine plantations, as well as marked in blue paint. Blue paint lines are property boundaries to private lands. Do not fell trees across blue paint lines and do not cut painted boundary trees.
3. No biomass harvesting is allowed on this sale due to nutrient-poor soil types.
4. All pine products cut between March 1st and August 30 must be removed from the sale area within three weeks from time of cutting to control bark beetle populations. Pine products cut during the remainder of the year must be removed before March 15th.
5. No recreational trails run through the sale area, but all roads used by logging equipment should be left in condition satisfactory to property manager.
6. Slash must be evenly lopped/scattered within the sale boundary and shall be deposited a minimum of 10 feet from the mowed right-of-way of any highway, town road, or recreational trail. Slash within 50 feet of all town roads and recreational trails must lie within 2 feet of the ground. Do not bury seedlings or saplings with slash.
7. The red pine plantations are located within the 25-mile Heterobasidial Root Disease (Annosum) area, and require stump treatment unless harvested between December 1 and March 31. Treatment must be performed by a Certified Pesticide Applicator. Treatment involves chemically treating all fresh-cut stumps of pines of merchantable size by applying either CELLU-TREAT (disodium octaborate tetrahydrate) or Rotstop C (biological fungicide). Treatment shall be made as soon as possible and no later than one day after harvest and a dye product shall be added to liquid solutions for inspection purposes. The cost of this application can vary based on application method and harvest conditions, but should be considered when submitting bids on these timber sales.

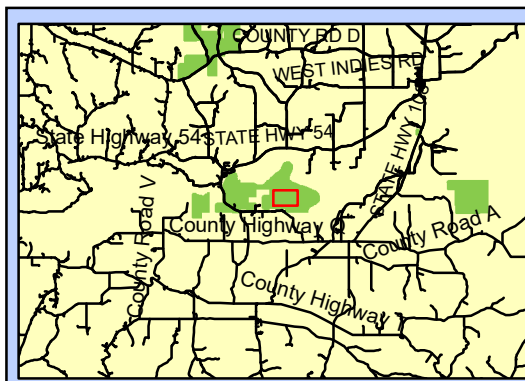

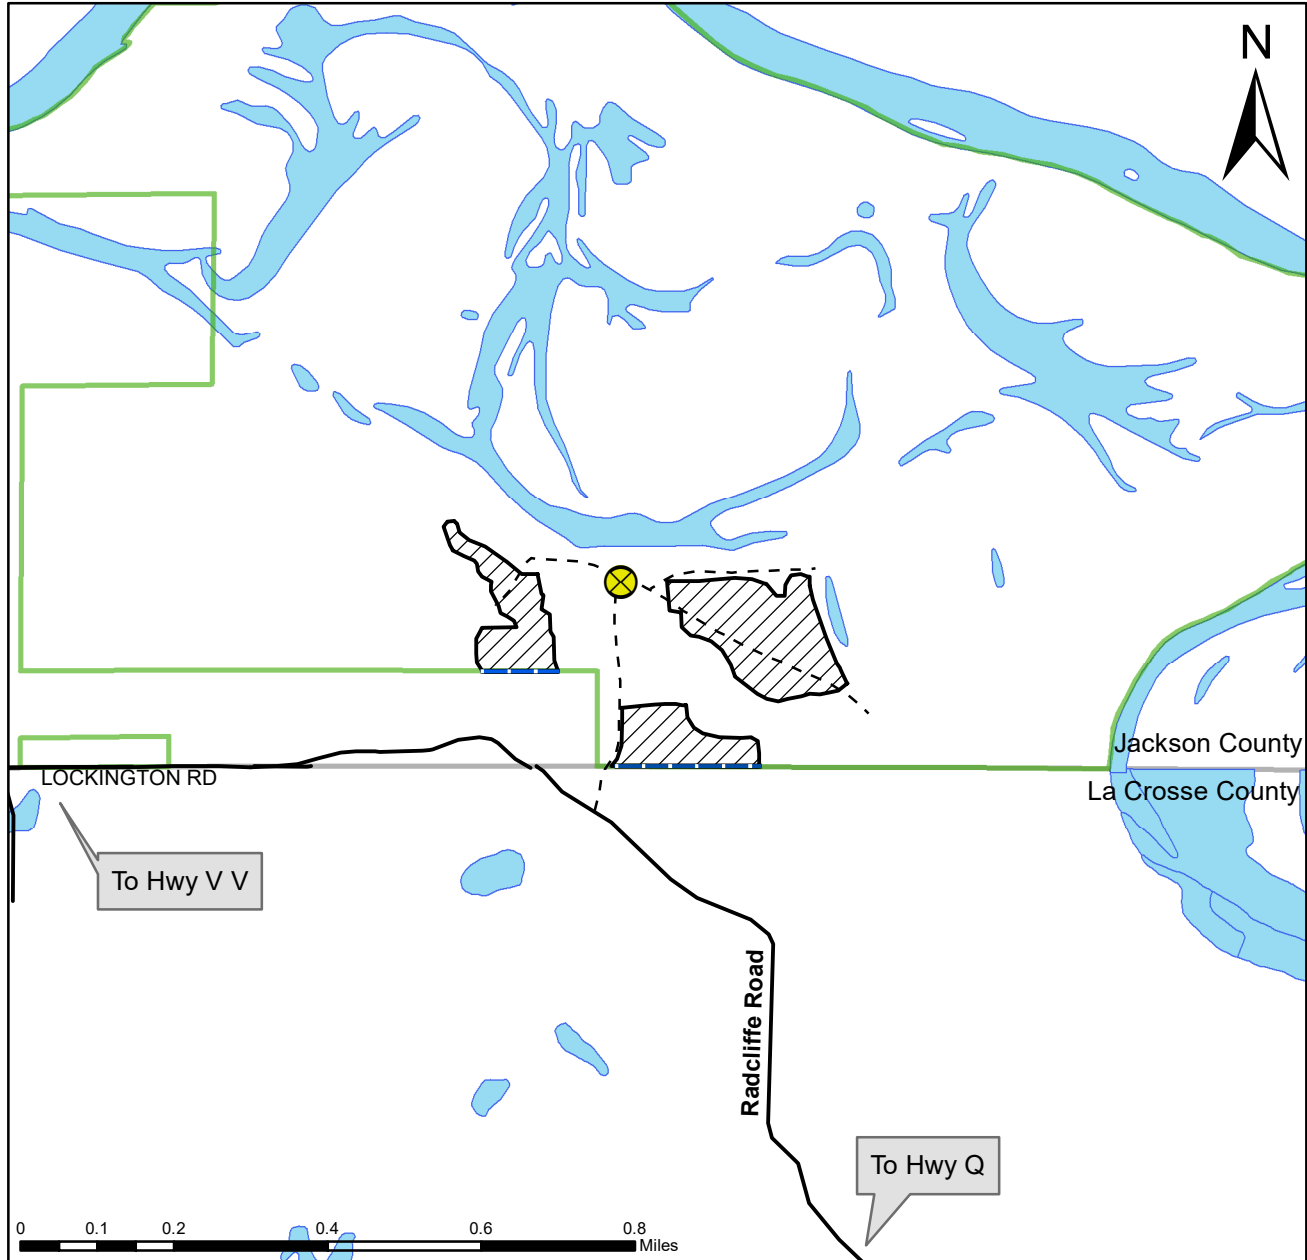

General Requirements:

1. All landings must be approved by a DNR forester before operations begin.
2. All designated tree species must be cut and forwarded concurrently with the sale.
3. All stumps shall be no higher than the stump diameter, or 10 inches, whichever is less.
4. Do not cut or knock down any dead or hollow trees. These are important wildlife habitat. Any that must be cut shall be left in big pieces on the forest floor.
5. Utilization: cut and use all designated trees with one or more 100” sticks to a 4” top diameter.
6. Notify the DNR forester before you start the job, and each time you pull out or return to the job.
7. Any new roads and all landings must be approved by a DNR forester before operations begin.
8. Any berms removed during harvesting operations must be put back to the satisfaction of the DNR Forester.
9. Any trees cut or pushed over for new roads or landings must be utilized or cleaned up to the DNR Forester’s satisfaction.
10. Wisconsin’s Best Management Practices for Invasive Species applies – contractor must clean equipment before entering and leaving the sale area! This involves brushing away all dirt and cleaning air intakes of debris.

High Fence Pine Sale 1-19

North Bend Bottoms Wildlife Area
 T19N R06W S34
 Jackson County, WI
 30 Acres

These lands are 3rd party certified

Legend

-  Blue Line
-  Harvest Boundary
-  State Land
-  Trails
-  Waterbodies
-  Roads
-  Landing

Cut all orange marked trees within harvest boundary. Blue marked trees are boundary to private lands. Do not cut blue marked trees. Harvest period is October 16 - March 31.

Notice: Completion of this form is mandatory. The Department will not recognize your bid unless you complete and submit this form. Personal information collected will be used for program administration and may be provided to requesters as required by Wisconsin's Open Records law [ss. 19.31-19.39, Wis. Stats.].

BRSF Tract 1-20
Deer Haven Jack Pine
T22N-R2W Sec 7

Sale size: 110 Acres
Contract Period: 2 years

Estimated Volume

<u>Species</u>	<u>Cord</u> <u>Equivalent</u>	<u>Tons</u>	<u>Advertised</u> <u>Value/Ton</u>
Jack Pine *	1630	3300	\$ 7.10
Red Maple ⁺	275	650	\$ 5.70
Aspen	280	650	\$ 5.00

* Jack pine volumes includes approx. 10 MBF red pine sawlogs, 60 tons of red pine pulp and 50 tons of white pine pulp.

+ Red maple volume includes approx. 80 tons white birch pulp and 180 tons oak pulp.

Estimated Price for Entire Sale = \$ 30,385.00

Purpose of Sale: To regenerate a jack pine stand and thin a small area of red pine.

Special Operating Requirements and Slash Disposal:

1. The sale boundaries are red paint lines, young saplings, open wetlands and the town road.
2. About one half of the sale is on wet ground and will need dry or frozen conditions and extra care or brushing to prevent rutting.
3. Any open wet areas in the sale should be avoided by equipment unless the ground is frozen.
4. No biomass harvesting is allowed on this sale due to the need to use slash to armor the forest floor.
5. All pine products cut between March 1st and August 30 must be removed from the sale area within three weeks from time of cutting. Pine products cut during the remainder of the year must be removed before March 15th.
6. Slash must be evenly lopped/scattered within the sale boundary and shall be deposited a minimum of 10 feet from the mowed right-of-way of any highway, town road, or recreational trail. Slash within 50 feet of all town roads and recreational trails must lie within 2 feet of the ground. Do not bury seedlings or saplings with slash.

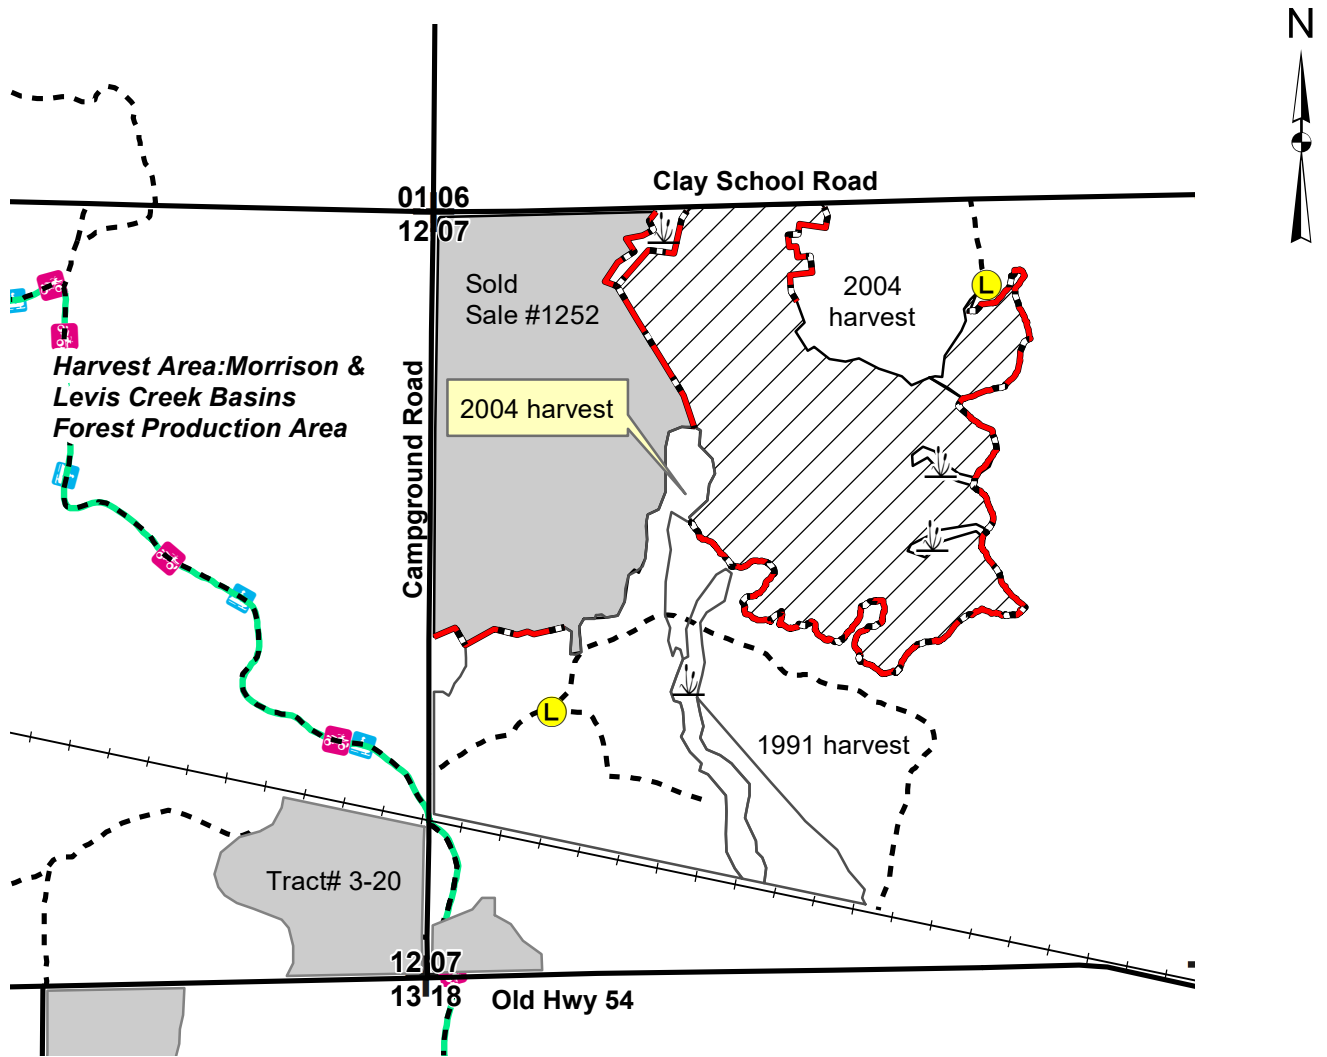

General Requirements:

1. All designated tree species must be cut and forwarded concurrently with the sale.
2. All stumps shall be no higher than the stump diameter, or 10 inches, whichever is less.
3. Do not cut or knock down any dead or hollow trees. These are important wildlife habitat. Any that must be cut shall be left in big pieces on the forest floor.
4. Utilization: cut and use all designated trees with one or more 100" sticks to a 4" top diameter.
5. Notify the DNR forester before you start the job, and each time you pull out or return to the job.
6. Any new roads and all landings must be approved by a DNR forester before operations begin.
7. Any berms removed during harvesting operations must be put back to the satisfaction of the DNR Forester.
8. Any trees cut or pushed over for new roads or landings must be utilized or cleaned up to the DNR Forester's satisfaction.
9. Contact the Town of Komensky at 715-299-0093 prior to beginning logging operations. A permit is required for hauling heavy loads and equipment on all town roads year-round. Any new road approaches along town roads require approval by the Town Patrolman.
10. **Wisconsin's Best Management Practices for Invasive Species applies – contractor must clean equipment before entering and leaving the sale area! This involves brushing away all dirt and cleaning air intakes of debris.**

I understand that any or all bids may be rejected and that consideration and awarding of a contract will be based upon my past performance and ability to complete contracts. **I also understand that if I am the winning bidder, I have 6 weeks from the date of the bid opening to submit an acceptable performance bond. I also understand that if I am awarded the contract and fail to execute it or work under it, I will be required to forfeit to the Department an amount equal to 10% of my total bid amount.** Failure to forfeit the 10% penalty will result in being considered ineligible to bid on any state timber sales for a two-year duration. In the event the highest bidder can not or will not sign the contract, the award will be made to the next highest qualified bid.

Notice: I understand:

Utilization specifications and estimated volumes are listed in the prospectus which is available upon request from the Department.

A copy of the standard timber sales contract which must be entered into is available upon request from the Department.

BRSF Tract 2-20
Rattlesnake Ridge
T20N-R2W Sec 25

Sale size: 124 Acres
Contract Period: 2 years

Estimated Volume

<u>Species</u>	<u>Cord Equivalent</u>	<u>Tons</u>	<u>Advertised Value/Unit</u>
White Pine*	(1285)	2700	\$ 6.30
Oak ⁺	(700)	1940	\$ 6.10
Red Maple**	(580)	1365	\$ 6.70
Aspen	(45)	100	\$ 5.20

* includes approx. 94 MBF white pine sawlog volume and approx. 20 tons red pine pulp

+includes approx. 36 MBF oak sawlog volume

** includes approx. 21 MBF red maple sawlog volume and 15 tons white birch pulp

Estimated Price for Entire Sale = \$ 38,509.50

Purpose of Sale: To thin a white pine stand, and to regenerate an oak stand and a maple stand. The sale will also improve habitat for rare species.

Special Operating Requirements and Slash Disposal:

1. This sale is mainly on dry ground (<15 acres wet), but logging operations will be **restricted to November 16 – March 30** to protect rare species.
2. Biomass harvesting is not allowed due to poor soils.
3. The sale boundaries are red and purple paint lines, woods roads and a red pine plantation. Do not cut painted boundary trees.
4. Access into the sale is on existing woods trails. The State Forest will provide rock to improve the road enough for hauling. The contractor will be expected to spread the rock and do some leveling and widening of the trails.
5. Some old moss drying beds and openings exist that can be used as landings. Additional landings are encouraged on this sale, as they can be used to improve habitat for a rare species. The DNR Forester will work with the contractor to be sure that landings will work well for both the contractor and the rare species.
6. In the Oak Seed Tree Area, slashing of non-merchantable trees is not required. We do encourage the contractor to run over, or pile slash onto existing maple and white pine regeneration, as it is not desired for the future stand.
7. All pine products cut between March 1st and August 30 must be removed from the sale area within three weeks from time of cutting. Pine products cut during the remainder of the year must be removed before March 15th.
8. Slash must be evenly lopped/scattered within the sale boundary and shall be deposited a minimum of 10 feet from the mowed right-of-way of any highway, town road, or recreational trail. Slash within 50 feet of all town roads and recreational trails must lie within 2 feet of the ground. Do not bury seedlings or saplings with slash.

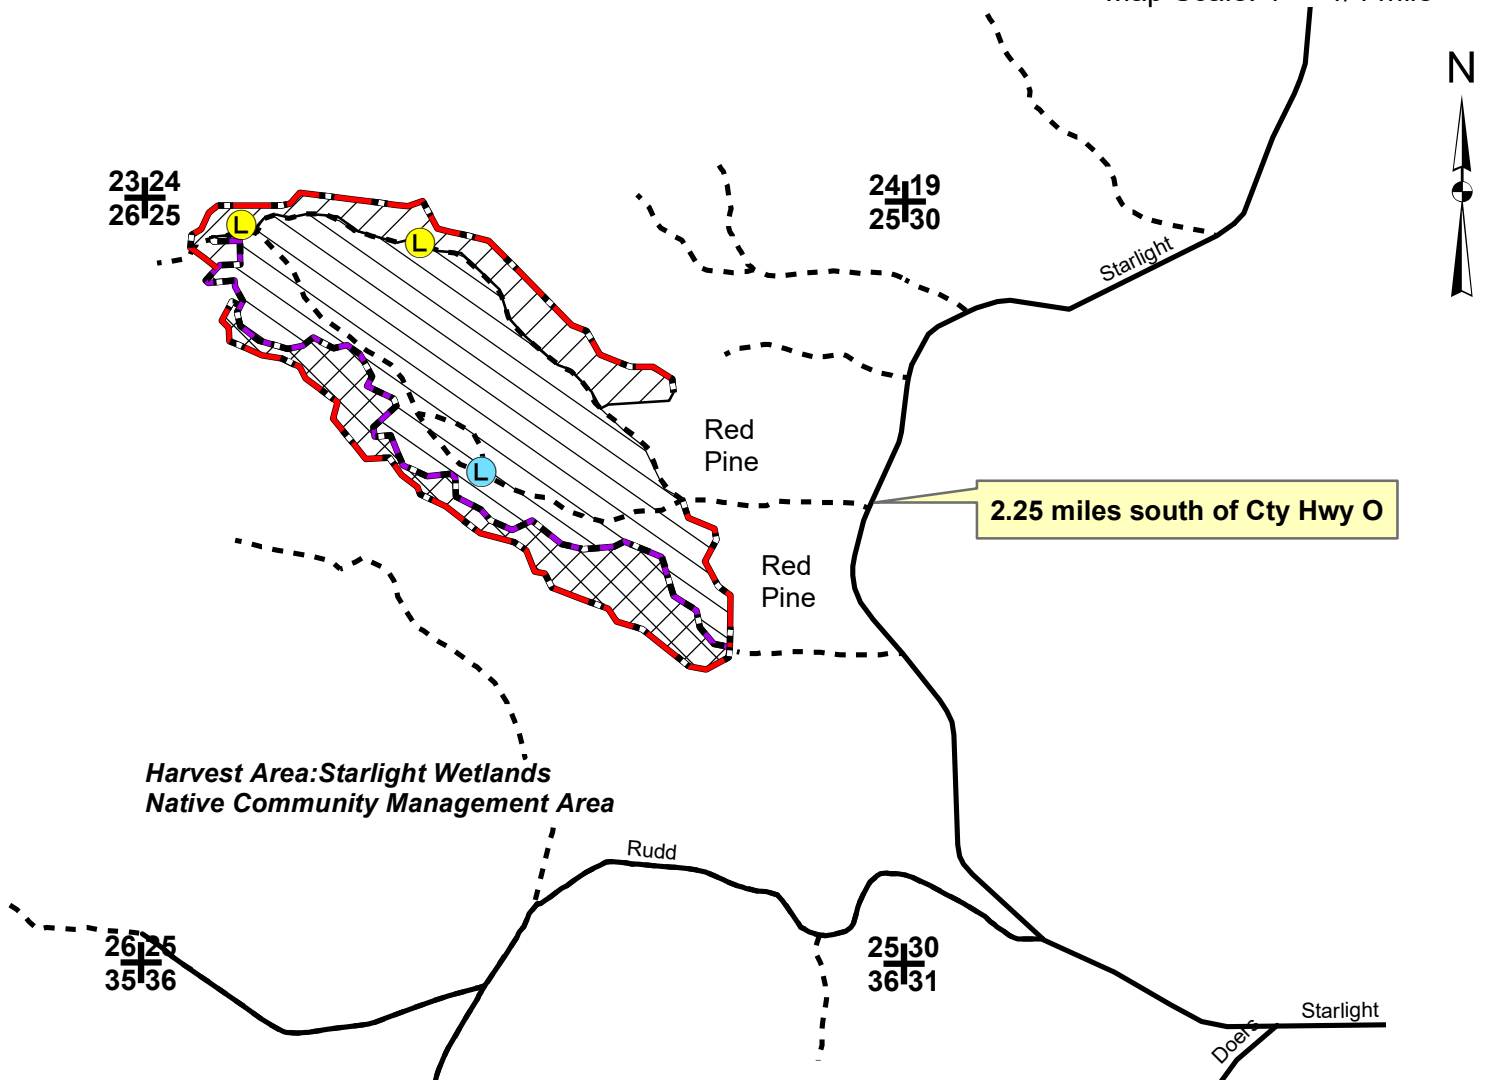

General Requirements:

1. All designated tree species must be cut and forwarded concurrently with the sale.
2. All stumps shall be no higher than the stump diameter, or 10 inches, whichever is less.
3. Do not cut or knock down any dead or hollow trees. These are important wildlife habitat. Any that must be cut shall be left in big pieces on the forest floor.
4. **Utilization:** cut and use all designated trees with one or more 100” sticks to a 4” top diameter.
5. Any new roads and all landings must be approved by a DNR forester before operations begin.
6. Any berms removed during harvesting operations must be put back to the satisfaction of the DNR Forester.
7. Notify the DNR forester before you start the job, and each time you pull out or return to the job.
8. Any trees cut or pushed over for new roads or landings must be utilized or cleaned up to the DNR Forester’s satisfaction.
9. There are no township permits needed for hauling on Starlight Road. Contact the town chairman at 608-343-4603 if you have any questions or issues with the roads in the Town of Knapp.
10. **Wisconsin’s Best Management Practices for Invasive Species applies – contractor must clean equipment before entering and leaving the sale area! This involves brushing away all dirt and cleaning air intakes of debris.**

**BRSF Tract 3-20
Cordwood Crossing**

T22N-R2W Sec 7; T22N-R3W Sec 12, 13

Sale size: 65 Acres
Contract Period: 2 years

Estimated Volume

<u>Species</u>	<u>Cord Equivalent</u>	<u>Tons</u>	<u>Advertised Value/Ton</u>
Jack Pine *	1500	3200	\$8.00
Red Maple ⁺	145	330	\$6.00
Oak	70	200	\$5.60
Aspen	30	75	\$5.00

* Jack pine volumes includes approx. 150 tons of red pine pulp and 250 tons of white pine pulp.

+ Red maple volume includes approx. 30 tons white birch pulp

Estimated Price for Entire Sale = \$ 29,075.00

Purpose of Sale: To regenerate two jack pine stands and a small stand of mixed pine.

Special Operating Requirements and Slash Disposal:

1. The sale boundaries are red paint lines, blue paint lines, roads and the railroad. Trees painted with red or blue shall not be harvested.
2. Portions of the sale are on wet ground and will need dry or frozen conditions and extra care or brushing to prevent rutting.
3. Any open wet areas in the sale should be avoided by equipment unless the ground is frozen.
4. The ATV/Snowmobile trail runs through the northeast portion of the sale. The trail can be used for decking and hauling, but must remain useable by recreational vehicles any time the trails are open. Any slash must be cleaned up regularly and the trail must be returned to original condition following harvest and hauling. The DNR Forester has signage available to post for safety.
5. No biomass harvesting is allowed on this sale due to the need to use slash to armor the forest floor.
6. All pine products cut between March 1st and August 30 must be removed from the sale area within three weeks from time of cutting. Pine products cut during the remainder of the year must be removed before March 15th.
7. Slash must be evenly lopped/scattered within the sale boundary and shall be deposited a minimum of 10 feet from the mowed right-of-way of any highway, town road, or recreational trail. Slash within 50 feet of all town roads and recreational trails must lie within 2 feet of the ground. Do not bury seedlings or saplings with slash.

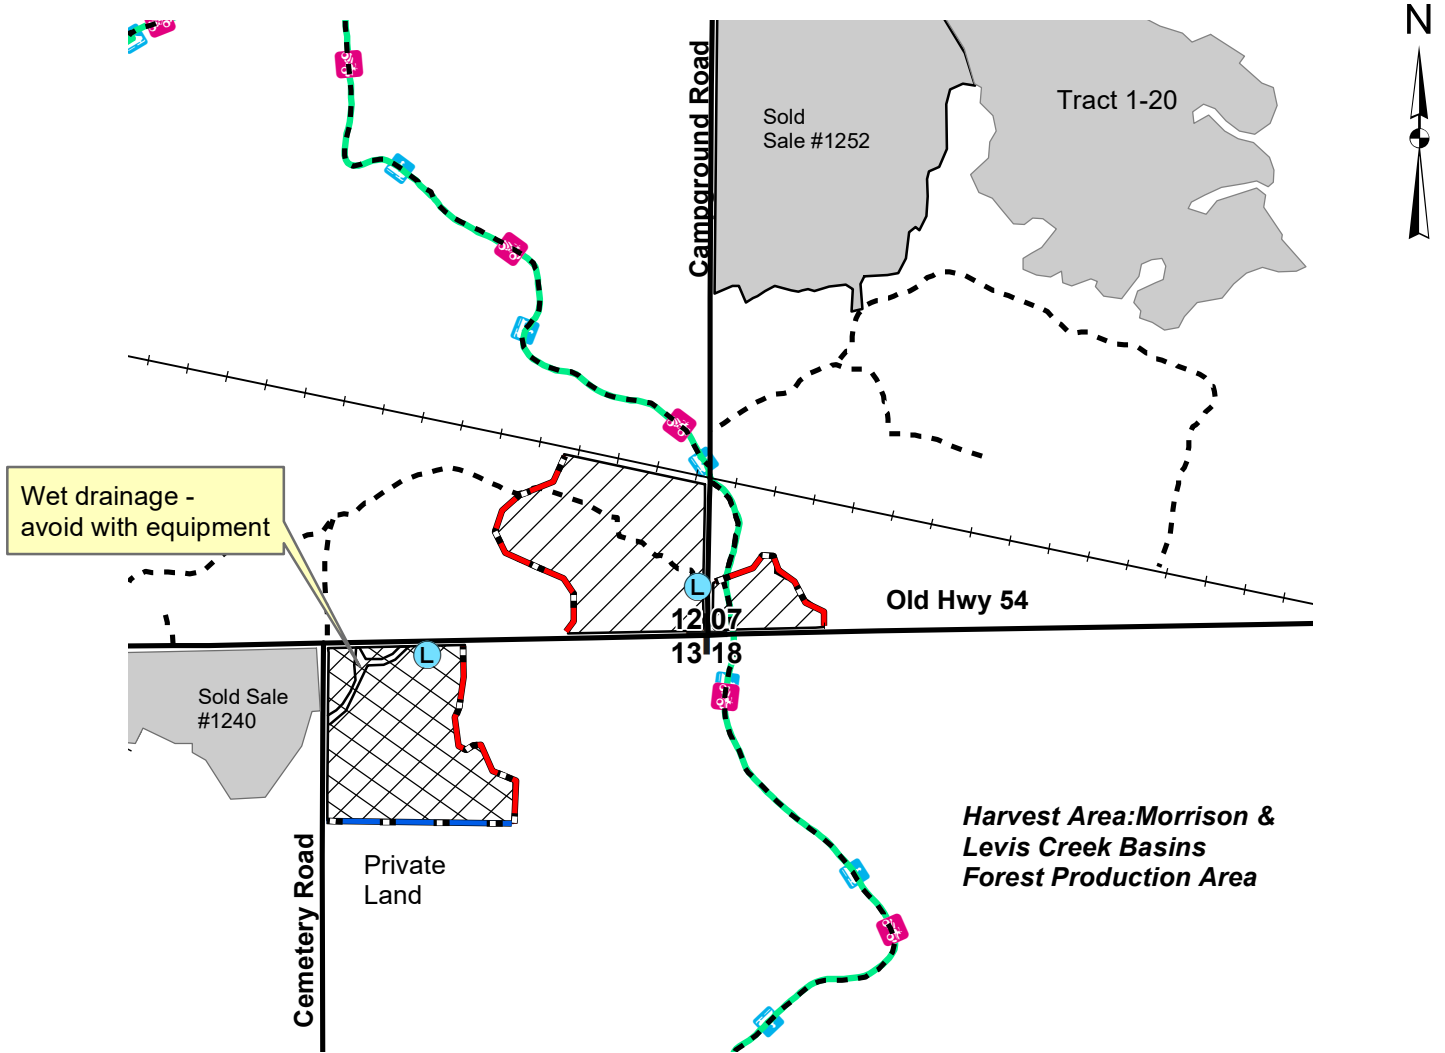

General Requirements:

1. All designated tree species must be cut and forwarded concurrently with the sale.
2. All stumps shall be no higher than the stump diameter, or 10 inches, whichever is less.
3. Do not cut or knock down any dead or hollow trees. These are important wildlife habitat. Any that must be cut shall be left in big pieces on the forest floor.
4. Utilization: cut and use all designated trees with one or more 100" sticks to a 4" top diameter.
5. Notify the DNR forester before you start the job, and each time you pull out or return to the job.
6. Any new roads and all landings must be approved by a DNR forester before operations begin.
7. Any berms removed during harvesting operations must be put back to the satisfaction of the DNR Forester.
8. Any trees cut or pushed over for new roads or landings must be utilized or cleaned up to the DNR Forester's satisfaction.
9. Contact the Town of Komensky at 715-299-0093 prior to beginning logging operations. A permit is required for hauling heavy loads and equipment on all town roads year-round. Any new road approaches along town roads require approval by the Town Patrolman.
10. **Wisconsin's Best Management Practices for Invasive Species applies – contractor must clean equipment before entering and leaving the sale area! This involves brushing away all dirt and cleaning air intakes of debris.**

BRSF Tract 4-20
Highline Oaks Sale
T22N R3W S1

Sale size: 73 Acres
Contract Period: 2 years

Estimated Volume

<u>Species</u>	<u>Cord Equivalent</u>	<u>Tons</u>	<u>Advertised Value/Ton</u>
Oak*	(280)	1020	\$13.50
Red Maple**	(335)	760	\$7.20

*Includes approx. 60 MBF Red Oak/Black Oak Mix sawlog volume and 200 tons pulp and 15 MBF sawlog volume White Oak

**Includes approx. 19 MBF Red Maple sawlog volume

Estimated Price for Entire Sale = \$19,242.00

Purpose of Sale: Low thinning of mid-rotation oak stand to perpetuate older oak in the area, as well as to promote health and growth of the stand while eliminating less desirable species such as red maple; limiting their seed source.

Cutting Specifications:

Oak Thinning, 66 acres. Cut all trees marked with orange paint.

Oak Clearcut, 7 acres. Cut all trees >2" DBH. Limit damage to seedlings and saplings wherever possible.

Special Operating Requirements and Slash Disposal:

1. This oak stand is mainly upland, with one lower ground drainage that should be avoided by logging equipment.
2. **Harvesting will not be allowed April 1 – July 31** to prevent oak wilt and protect a rare species.
3. Sale boundaries include red paint line to the west as well as red pine plantations to the east. Trees painted with red shall not be harvested.
4. There is a combination lock on the gate at the end of Klima Road. The DNR can provide the code to the contractor. Access into the sale area is from the west or south only. No access off Campground Road.
5. Biomass harvesting is not allowed due to poor soil suitability.
6. All trails used by logging equipment must be left to satisfaction of DNR Forester and Property Manager.
7. Caution should be used as a powerline runs through the south and west edges of the sale.
8. Slash must be evenly lopped/scattered within the sale boundary and shall be deposited a minimum of 10 feet from the mowed right-of-way of any highway, town road, or recreational trail. Slash within 50 feet of all town roads and recreational trails must lie within 2 feet of the ground. Do not bury seedlings or saplings with slash.

General Requirements:

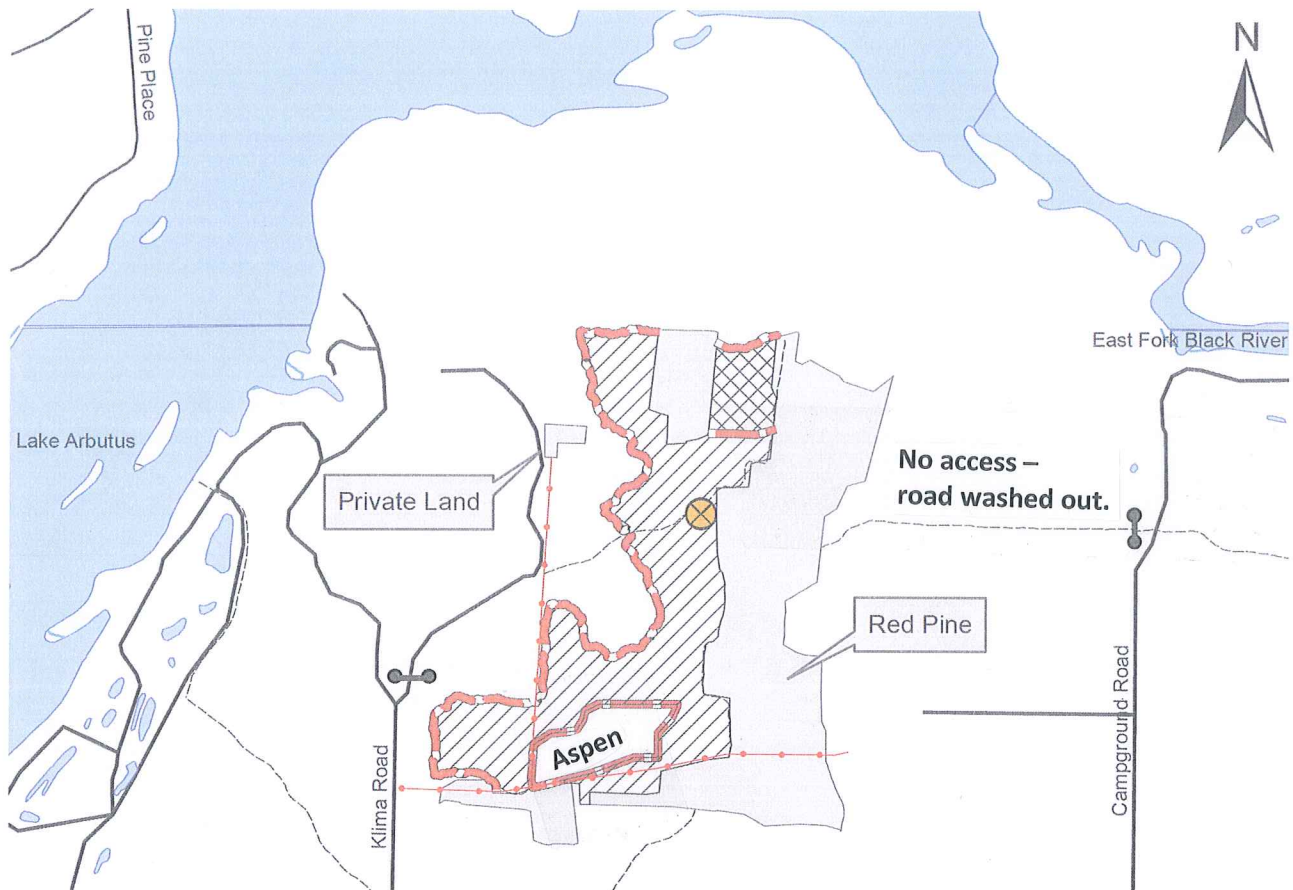

1. All landings must be approved by a DNR forester before operations begin.
2. All designated tree species must be cut and forwarded concurrently with the sale.
3. All stumps shall be no higher than the stump diameter, or 10 inches, whichever is less.
4. Do not cut or knock down any dead or hollow trees. These are important wildlife habitat. Any that must be cut shall be left in big pieces on the forest floor.
5. Utilization: cut and use all designated trees with one or more 100" sticks to a 4" top diameter.

BRSF Tract 5-20
Compass Point Pine
T20N-R2W Sec 7,8

Sale size: 146 Acres
Contract Period: 2 years

Estimated Volume

<u>Species</u>	<u>Cord Equivalent</u>	<u>Tons</u>	<u>Advertised Value/Unit</u>
Red Pine*	(890)	2000	\$14.10
White Pine ⁺	(110)	225	\$ 9.50
Oak**	(65)	170	\$ 7.20

* includes approx. 350 MBF sawlog volume

+ includes approx. 27 MBF sawlog volume

** includes approx. 3 MBF sawlog volume and 15 tons cherry pulp

Estimated Price for Entire Sale = \$ 31,561.50

Purpose of Sale: To thin two red pine plantations for the second time and one for the third time.

Special Operating Requirements and Slash Disposal:

1. This sale is entirely on dry ground and has no seasonal restrictions.
2. The red pine plantations are located within the 25-mile Heterobasidial Root Disease (Annosum) area, and require stump treatment unless harvested between December 1 and March 31. *Treatment must be performed by a Certified Pesticide Applicator. Treatment involves chemically treating all fresh-cut stumps of pines of merchantable size by applying either CELLU-TREAT (disodium octaborate tetrahydrate) or Rotstop C (biological fungicide). Treatment shall be made as soon as possible and no later than one day after harvest and a dye product shall be added to liquid solutions for inspection purposes. The cost of this application can vary based on application method and harvest conditions, but should be considered when submitting bids on these timber sales.*
3. Biomass harvesting is not allowed due to poor soils.
4. The sale boundaries are red paint lines, woods roads and town roads. Do not cut painted boundary trees.
5. **The gas pipeline area along the north end of the sale contains endangered species habitat and may not be used for decking or landing wood.** There are several existing and proposed landings that should be adequate for this sale.
6. All pine products cut between March 1st and August 30 must be removed from the sale area within three weeks from time of cutting. Pine products cut during the remainder of the year must be removed before March 15th.
7. Slash must be evenly lopped/scattered within the sale boundary and shall be deposited a minimum of 10 feet from the mowed right-of-way of any highway, town road, or recreational trail. Slash within 50 feet of all town roads and recreational trails must lie within 2 feet of the ground. Do not bury seedlings or saplings with slash.

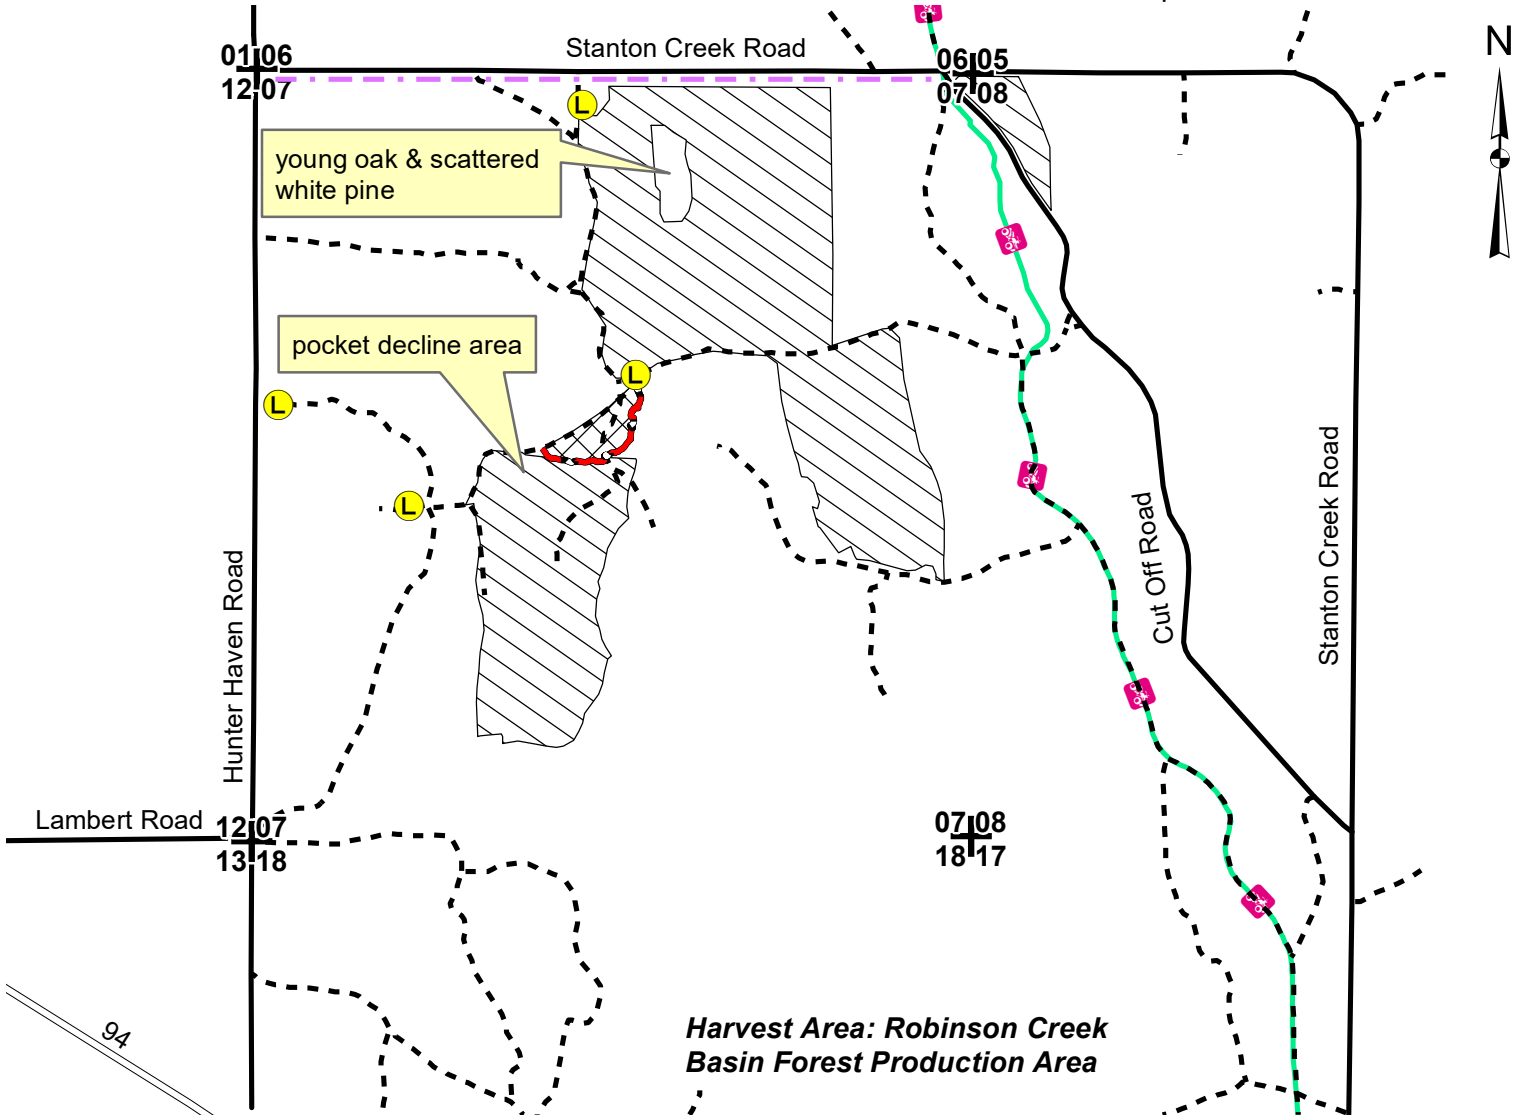

General Requirements:

1. All designated tree species must be cut and forwarded concurrently with the sale.

** White pine includes approx. 32 MBF sawlogs

⁺ Red maple includes approx. 5 MBF maple sawlogs and <30 tons white birch and cherry pulp

Estimated Price for Entire Sale* = \$28,227.00

Purpose of Sale: To regenerate a red pine stand and thin a red pine stand and a white pine stand.

Special Operating Requirements and Slash Disposal:

1. The sale boundaries are red paint lines, different cover types, town roads, woods roads, and wetland. Do not cut painted boundary trees.
2. There are some small drainages located in the northwest portion of the white pine thinning. These should be avoided by logging equipment unless ground is very dry or frozen. The ground is otherwise high and dry, so should be operable in all but very wet conditions.
3. Hauling on flowage dike is not allowed. **The 10-acre thinning in the northeast part of the sale will have to be forwarded either across the flowage dike to North Settlement, or west across the corduroy trail section (often wet).**
4. Operations in the Red Pine Regeneration area should limit damage to the residual stand as much as possible.
5. No biomass harvesting allowed due to poor soils.
6. All pine products cut between March 1st and August 30 must be removed from the sale area within three weeks from time of cutting. Pine products cut during the remainder of the year must be removed before March 15th.
7. Slash must be evenly lopped/scattered within the sale boundary and shall be deposited a minimum of 10 feet from the mowed right-of-way of any highway, town road, or recreational trail. Slash within 50 feet of all town roads and recreational trails must lie within 2 feet of the ground. Do not bury seedlings or saplings with slash.

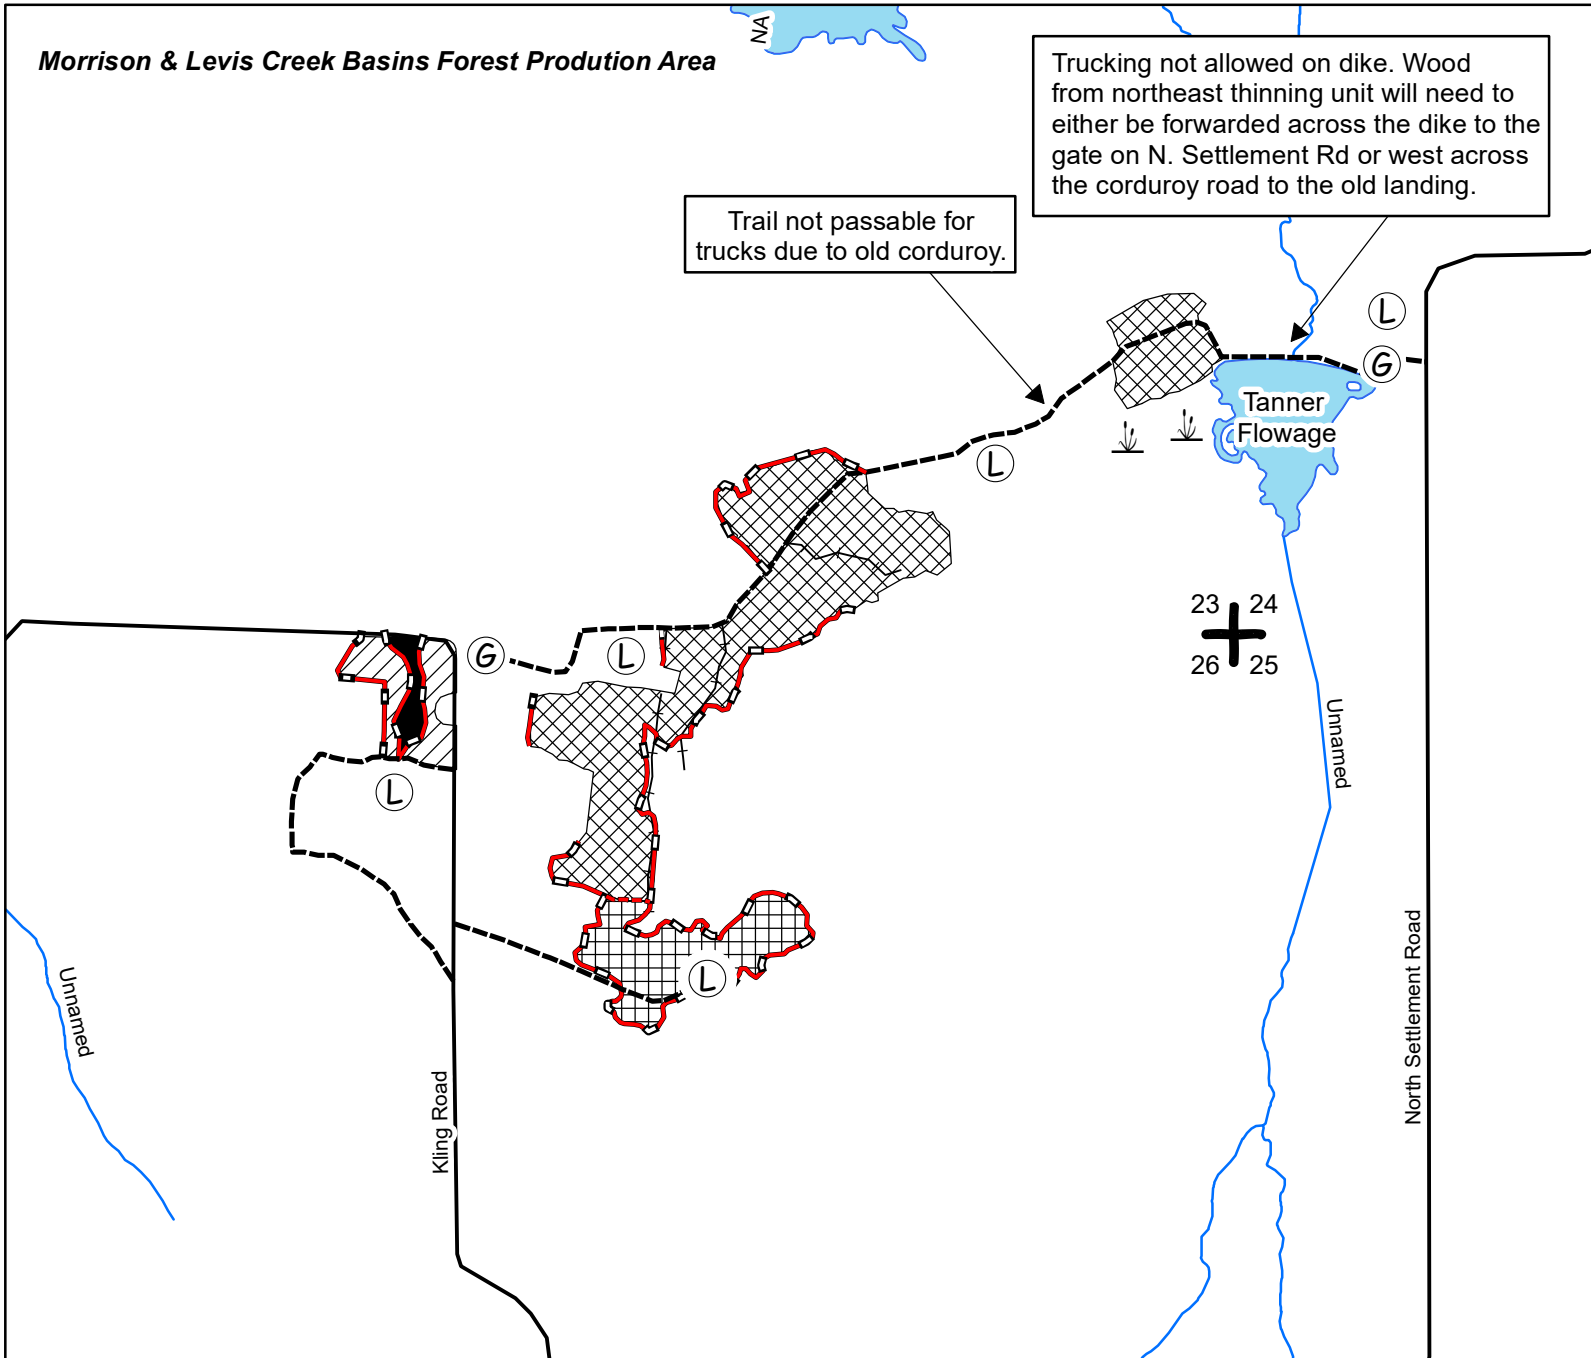

General Requirements:

1. All designated tree species must be cut and forwarded concurrently with the sale.
2. All stumps shall be no higher than the stump diameter, or 10 inches, whichever is less.
3. Do not cut or knock down any dead or hollow trees. These are important wildlife habitat. Any that must be cut shall be left in big pieces on the forest floor.
4. Utilization: cut and use all designated trees with one or more 100" sticks to a 4" top diameter.
5. Any new roads and all landings must be approved by a DNR forester before operations begin.
6. Any berms removed during harvesting operations must be put back to the satisfaction of the DNR Forester.
7. Notify the DNR forester before you start the job, and each time you pull out or return to the job.
8. Any trees cut or pushed over for new roads or landings must be utilized or cleaned up to the DNR Forester's satisfaction.
9. Contact the town of Millston prior to beginning logging operations at 284-0913. Permits are required for hauling heavy loads and equipment on all town roads year-round.
10. **Wisconsin's Best Management Practices for Invasive Species applies – contractor must clean equipment before entering and leaving the sale area! This involves brushing away all dirt and cleaning air intakes of debris.**

BLACK RIVER STATE FOREST
 TIMBER SALE MAP
 T21N-R2W SEC. 23, 26 & 27
 TRACT #6-20 TANNER PINES

These lands are
 third party certified

Sale Size: 92 acres
 Map Scale: 1" = 1/4 mile

Trucking not allowed on dike. Wood from northeast thinning unit will need to either be forwarded across the dike to the gate on N. Settlement Rd or west across the corduroy road to the old landing.

Trail not passable for trucks due to old corduroy.

23 + 24
 26 25

-  67 Acres, Red Pine 3rd & 4th Thinning: Harvest all trees marked with orange paint.
-  17 Acres, White Pine Thinning: Harvest all merchantable aspen, jack pine, mixed hardwood, and all trees marked with orange paint.
-  8 Acres, Red Pine Regeneration Harvest: Harvest all merchantable trees except oak > 12" DBH. Use care to limit damage to regeneration in this unit!

 Wetland	 Red Paint Line	 Woods Road	 Gate
 Landing/Turn Around	 Double-Sided Red Paint Line	 Stream	 Section Corner
	 Wildlife Island/RMZ (3 Acres)	 Skid Trail

I understand that any or all bids may be rejected and that consideration and awarding of a contract will be based upon my past performance and ability to complete contracts. **I also understand that if I am the winning bidder, I have 6 weeks from the date of the bid opening to submit an acceptable performance bond. I also understand that if I am awarded the contract and fail to execute it or work under it, I will be required to forfeit to the Department an amount equal to 10% of my total bid amount.** Failure to forfeit the 10% penalty will result in being considered ineligible to bid on any state timber sales for a two-year duration. In the event the highest bidder can not or will not sign the contract, the award will be made to the next highest qualified bid.

Notice: I understand:

Utilization specifications and estimated volumes are listed in the prospectus which is available upon request from the Department.

A copy of the standard timber sales contract which must be entered into is available upon request from the Department.

BRSF Tract 7-20
West Warrens Pine
T20N-R1W Sec 29

Sale size: 77 Acres
Contract Period: 2 years

Estimated Volume

<u>Species</u>	<u>Cord</u> <u>Equivalent</u>	<u>Tons</u>	<u>Advertised</u> <u>Value/Unit</u>
Red Pine*	(750)	1700	\$8.70

* includes approx. 6 MBF red pine sawlog volume and < 10 tons white pine pulp

Estimated Price for Entire Sale = \$ 14,790.00

Purpose of Sale: To thin a red pine plantation for the second time.

Special Operating Requirements and Slash Disposal:

1. This sale is entirely on dry ground and has no seasonal restrictions.
2. Biomass harvesting is not allowed due to poor soils.
3. The sale boundaries are blue paint lines and the plantation edge. Do not cut painted boundary trees.
4. **Access into the sale is across Jackson County Forest land.** This is on a poor sand road with one large mud hole. We will be working with JCF to provide adequate rock to improve the road for hauling, but we anticipate that the contractor will need to spread the rock and grade the woods road.
5. There are no existing landings in the sale area. The contractor can make more than one landing if desired, but the access road within the sale area is very sandy and unlikely to hold up to trucking. The DNR can provide rock to create a landing near the proposed landing site on the map, but not for additional landings. The DNR Forester can work with the contractor to make some access lanes across the rows to allow for shorter skids.
6. All pine products cut between March 1st and August 30 must be removed from the sale area within three weeks from time of cutting. Pine products cut during the remainder of the year must be removed before March 15th.
7. Slash must be evenly lopped/scattered within the sale boundary and shall be deposited a minimum of 10 feet from the mowed right-of-way of any highway, town road, or recreational trail. Slash within 50 feet of all town roads and recreational trails must lie within 2 feet of the ground. Do not bury seedlings or saplings with slash.

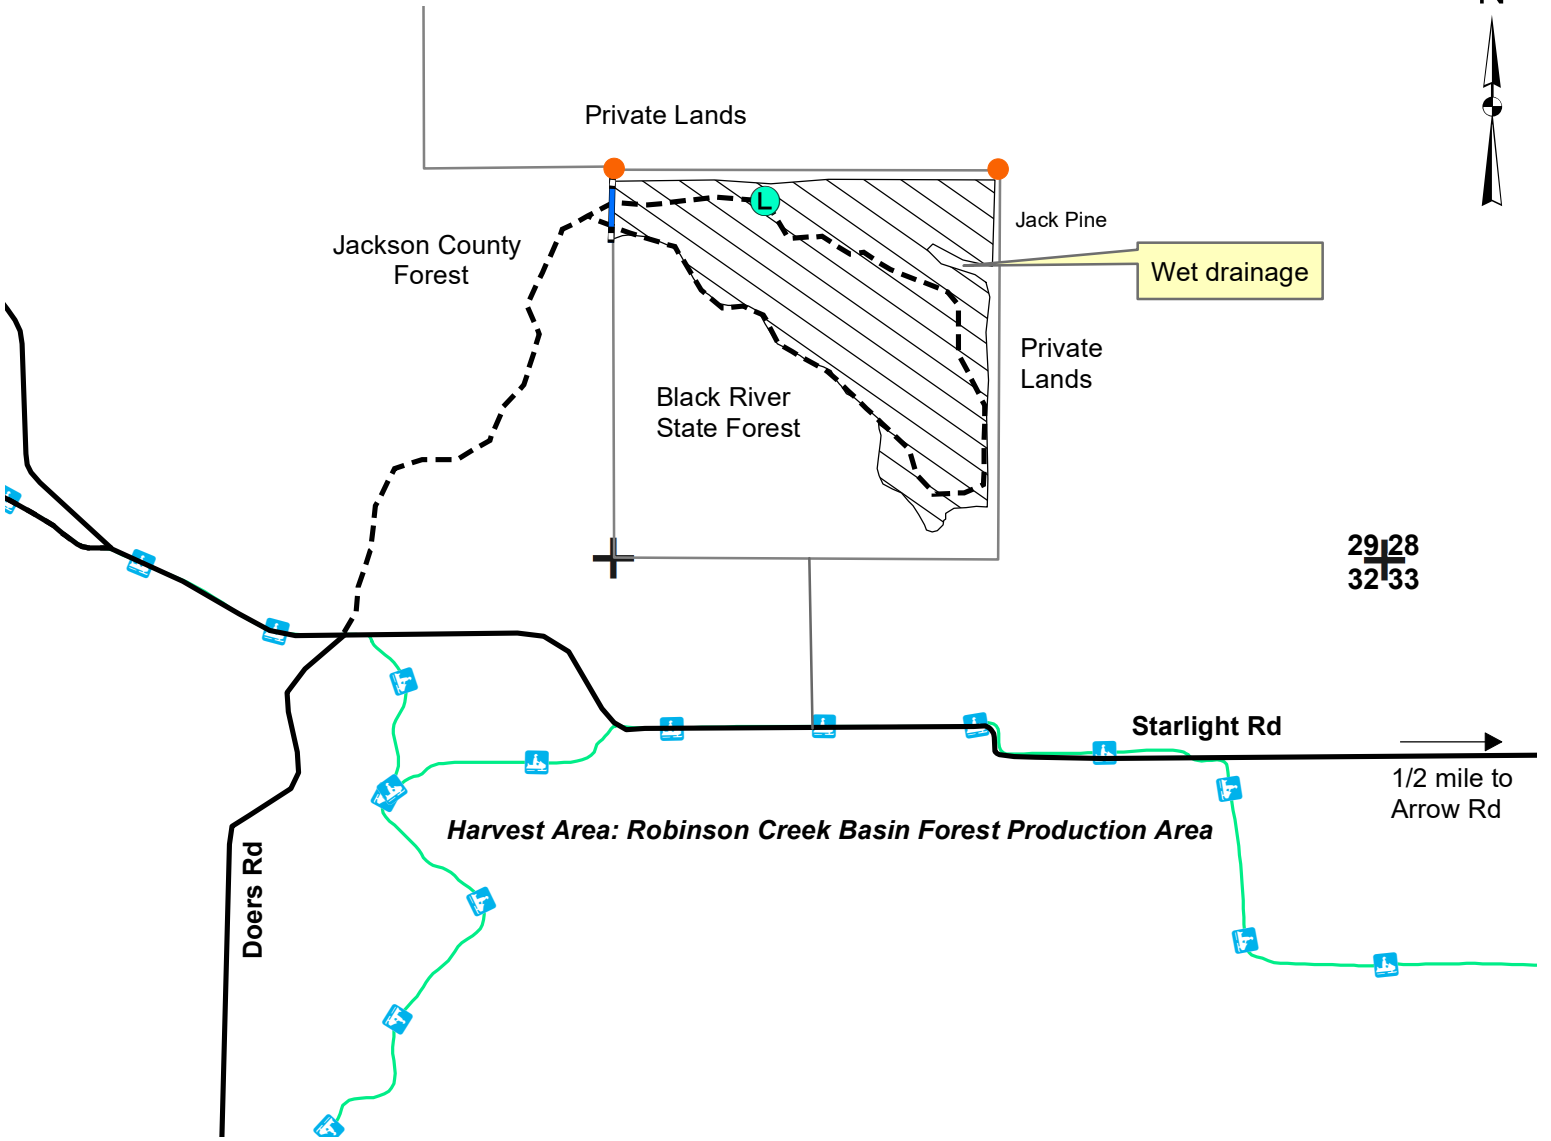

General Requirements:

1. All designated tree species must be cut and forwarded concurrently with the sale.
2. All stumps shall be no higher than the stump diameter, or 10 inches, whichever is less.
3. Do not cut or knock down any dead or hollow trees. These are important wildlife habitat. Any that must be cut shall be left in big pieces on the forest floor.
4. Utilization: cut and use all designated trees with one or more 100" sticks to a 4" top diameter.

6. Any berms removed during harvesting operations must be put back to the satisfaction of the DNR Forester.
7. Notify the DNR forester before you start the job, and each time you pull out or return to the job.
8. Any trees cut or pushed over for new roads or landings must be utilized or cleaned up to the DNR Forester's satisfaction.
9. There are no township permits needed for hauling on Starlight Road. Contact the town chairman at 608-343-4603 if you have any questions or issues with the roads in the Town of Knapp.
10. **Wisconsin's Best Management Practices for Invasive Species applies – contractor must clean equipment before entering and leaving the sale area! This involves brushing away all dirt and cleaning air intakes of debris.**
