Volume Estimates

Species	Pulp/Bolts	Minimum Bid Value:	\$2,500.00
Oak*	400 Tons	Biomass Harvesting:	Not allowed
White Pine**	180 Tons	Scaling Method:	Mill Scale (Tons)
		Contract End Date:	June 30, 2029
Totals	580 Tons		

* Oak includes black oak (87%), white oak (10%), and black cherry (3%). Approx. 9 MBF oak logs.

**White pine volume includes a small amount of Jack pine (4%). Approx. 2 MBF pine logs.

Cutting Specifications

Intermediate Thinning. 26 acres. Cut all trees marked in orange paint. Do not cut boundary trees marked with red, blue, or purple paint.

Operational Considerations-

1. This sale is located mainly on dry, sandy upland ground. Year round harvesting allowed on the majority of the sale. A small portion of the sale (less than 1 acre, north of the purple boundary line) is winter-only and **optional** due to resource concerns.
2. The harvest area boundary is marked in red paint to separate forest stands and in blue paint to separate property boundaries. Do not cut red or blue-painted trees.
3. All pine products cut between March 1st and August 31st must be removed from the sale area within three weeks from time of cutting to control bark beetle populations. Pine products cut during the remainder of the year must be removed before March 15th.
4. All roads and trails used by logging equipment/ trucks should be repaired to condition satisfactory to property manager.
5. Slash must be evenly lopped/scattered within the sale boundary and shall be deposited a minimum of 10 feet from the mowed right-of-way of any highway, town road, or recreational trail. Slash within 50 feet of all town roads and recreational trails must lie within 2 feet of the ground. Do not bury seedlings or saplings with slash.
6. This sale requires the Purchaser to complete HRD preventive treatment 4/1- 11/30. Treatment must be performed by a Certified Pesticide Applicator. This involves chemically treating all fresh-cut stumps of merchantable size pine by applying either RotstopC (*Phlebiopsis gigantea*) or CELLU-TREAT (disodium octaborate tetrahydrate). Treatment shall be made the same day as harvest and a dye product shall be added to liquid solutions for inspection purposes. The cost of this application can vary based on application method and harvest conditions, but should be considered when submitting bids.

General Requirements:

1. All landings must be approved by a DNR forester before operations begin.
2. All designated tree species must be cut and forwarded concurrently with the sale.
3. All stumps shall be no higher than the stump diameter, or 10 inches, whichever is less.
4. Utilization: cut and use all designated trees with one or more 100" sticks to a 4" top diameter.
5. Any new roads and all landings must be approved by a DNR forester before operations begin.
6. Any berms removed during contract period must be restored to the satisfaction of the DNR Forester.
7. Any trees cut or pushed over for roads or landings must be removed to the DNR Forester's satisfaction.
8. Wisconsin's Best Management Practices for Invasive Species applies – contractor must clean equipment before entering and leaving the sale area! Brush away all dirt and clean air intakes of debris.
