Dear Timber Purchaser,

You are invited to bid on the enclosed State of Wisconsin DNR timber sales located in: Columbia, Dodge, Jefferson, Juneau, Rock, Sauk, Walworth, Washington Counties. These lands are third party certified.

Sealed bids for the timber sales will be received no later than: 1:00 PM on November 17th, 2021

Attn: Zach Hylinski and Sale Name
Fitchburg Service Center
3911 Fish Hatchery Road
Fitchburg, WI 53711

Due to COVID-19, this bid opening will be “closed” to the public. DNR staff will collect and open all bids via Zoom. Interested parties may use the following information to join by phone: Toll-free number: + 1 312 626 6799, Meeting ID: 871 7637 7878, Password: 311496

Timber Sales Advertised for Bid can be viewed at: https://dnr.wisconsin.gov/topic/timbersales/statewide

The Wisconsin DNR will be accepting sealed bids on 6 timber sales listed in this invention to bid. Please read the timber sale prospectus carefully as each sale is different and bid accordingly. Walking the harvest units is advised. If you have questions regarding timber sale specifics, timber sale contracts, or access please contact the DNR forester listed on the prospectus.

BIDDING INSTRUCTIONS:

1. All bids must be submitted on the attached timber sale bid form (Form 2400-049) for each sale.
2. An acceptable bid must have a price for each species and product listed for each sale.
3. “Timber Sale SEALED BID” with Sale Name must be written on the outside of each separate envelope.
4. All bids must be made by species on per unit basis. Bid forms with a zero bid for any species will be rejected. Bid forms missing any of the advertised species will be rejected.
5. A bid bond not required. A performance bond is required. A minimum of $1,000 or 15 percent of the total bid value of any timber sale, whichever is greater, shall be submitted as a performance bond within 6 weeks from the date of the bid opening. If the winning bidder fails to execute the contract and submit an acceptable performance bond, the bidder shall be required to forfeit to The Department an amount equal to 10% of the total bid amount. Failure to forfeit the 10% penalty will result in the bidder being considered ineligible to bid on any state timber sales for a two-year period.
6. There is no guarantee of the quality or quantity of the wood products or volumes; therefore, bidders are encouraged to inspect each timber sale prior to bidding.
7. Bonds in the form of a Letter of Credit (LOC) for sold timber must exceed contract length by one year.
8. The Department of Natural Resources reserves the right to reject ANY and ALL bids.

ELIGIBILITY REQUIREMENTS:

1. Workers Compensation Insurance is required. Worker’s Compensation Law: The Contractor (purchaser) shall provide the Department with an original Certificate of Insurance indicating that Worker’s Compensation Insurance coverage is provided for all of the contractor’s (purchaser’s) employees working under the contract during its duration. This shall be in the Department’s file prior to any performance under the contract. The purchaser shall notify the Department in writing, immediately upon any change in or cancellation of insurance coverage required under contract.
   a. If the purchaser claims exemption from workman’s compensation insurance requirement because they do not have any employees, documentation of exempt/independent status is required. The contractor/purchaser will be required to submit a signed, notarized affidavit that affirms their exempt status pursuant to the criteria listed in section 102.07(7)(b), of the Wisconsin Statutes.
2. **Training Requirement:** The Purchaser shall ensure that at least one person in the woods actively engaged in performance of this contract and responsible for the logging site complies with 3rd party training standard and is FISTA certified. Criteria for the standards can be found at the website: [www.fistausa.org/sfi_standards.html](http://www.fistausa.org/sfi_standards.html) or by contacting the Forest Industry Safety & Training Alliance (FISTA) 715-282-4979. Purchaser must provide documentation to the Seller that training has been attained within 6 weeks of the bid opening.

3. Prior to commencement of any timber sale activity, including road work, a S211- tax exemption form must be completed and be on file at the forester’s office.

**CONTRACT:**

1. Contract must be signed within 6 weeks of the bid opening day.
2. Winning bidders will have 6 weeks from the date of the bid opening to submit an acceptable performance bond to the department. If the winning bidder fails to execute the contract and submit an acceptable performance bond, the bidder shall be required to forfeit to the department an amount equal to 10% of the total bid amount. Failure to forfeit the 10% penalty will result in the bidder being considered ineligible to bid on any state timber sales or GNA for a two-year period.
3. A sample contract is available upon request. Lack of contract knowledge will not be accepted as a reason to invalidate your bid(s).
4. Contract may contain additional provisions.
5. Contracts may not be assigned.

**CONDITIONS OF SALE:**

1. Contractor must complete a walk through with state forester prior to beginning sale. Advanced notice (>2 weeks) is required to schedule walk through prior to sale activity occurring, although all attempts will be made to meet as soon as possible.
2. Liability to pay double the stumpage value for unmarked or undesignated timber cut or damaged through negligence or carelessness. Damage to residual trees is to be kept at a minimum, and careless equipment operation will not be tolerated.
3. Trails must be restored to pre-sale conditions (including grading, seeding, water bars, etc.) following the guidance in the Wisconsin DNR Best Management Practices Manual for Water Quality. A copy is available upon request. No fill will be taken from the area without approval of the timber sale administrator. Any seed applied to the trails must be pre-approved by the DNR as well as rate of application.
4. Skid trails and landing locations must be approved by a DNR forester prior to use. Harvest may occur only on the times denoted in the contract and prospectus.
5. To minimize the spread of invasive plants, all equipment must be washed or cleaned prior to entering and leaving the sale. Additional guidance on invasive species Best Management Practices will be done utilizing the Wisconsin’s Forestry Best Management Practices for Invasive Species. A copy is available upon request.
6. Oak Wilt Restrictions: No cutting or skidding in stands managed for oak will be permitted from April 1-July 15, unless otherwise noted on the prospectus.
7. All slash shall be lopped and/or scattered to lie within two feet of the ground; slash must also be removed from all public access trails, field, parking lot and roads. Slash shall be removed from these areas so that it does not lie on OR protrude into the trail zone. Slash that may fall in these areas must be removed immediately. This is to be done concurrent with the cutting operation. Upland slash shall stay out of the lowlands.
8. Maximum stump height shall not exceed one foot.
9. Any dead trees that will not be cut and utilized should be left standing unless they pose a hazard.
10. DNR will ensure access to the timber sale; however, access across private property (if desired) is the responsibility of the contractor.
11. Do not cut any boundary trees painted with red, green, blue, yellow, pink, or purple paint throughout the timber sale areas.
12. Fuel refill and equipment maintenance must occur in an area approved by property manager or forester. Fuel and oil cans must be capped when not in use and stored off the ground utilizing a tarp or a type of containment surface. A spill kit shall be on site for the duration of the timber sale and is provided by the Buyer.
13. The cost of the repair or replacement of any land survey, monument or accessory that is removed, destroyed, or made inaccessible shall be withheld from the deposit. If the deposit is insufficient to cover such cost, the provisions of Statute 59.635 shall be enforced.
14. All pine cut from April 1 - September 1 must be hauled within 3 weeks of cutting. Pine products cut during the remainder of the year must be hauled prior to June 1 annually.
15. Heterobasidion root disease (Annosum root rot) Prevention Treatment: Unless otherwise stated on the prospectus, ALL sales requiring the cutting of conifers require the Purchaser to complete Annosum root rot preventive treatment from April 1 to November 30. Treatment must be performed by a Certified Pesticide Applicator. Treatment involves chemically treating all
fresh-cut stumps of pines of merchantable size by applying either Sporax (sodium tetraborate decahydrate) or CELLU-TREAT (disodium octaborate tetrahydrate). Treatment shall be made the same day as harvest and a dye product shall be added to liquid solutions for inspection purposes. The cost of this application can vary based on application method and harvest conditions but should be considered when submitting bids on these timber sales. Unless treated immediately after cutting and before the next tree is cut, ALL stumps shall remain clear of slash for application and administration purposes.

16. Department Staff reserve the right to terminate logging activities.

SCALING SPECIFICATIONS:

1. Unless otherwise stated on the prospectus, sale methods will be by “mill scale” in conjunction with “haul” ticket system. Mixed loads of species and/or products, of different stumpage values, will be charged at the higher dollar value.

2. If needed, the conversion factors below will be utilized.

3. Price per ticket (for contractors required to pre-pay, or those preferring this method) will be based on bid price per ton/cord and average tons/cords per haul.

4. A wood hauling ticket must be made out for each truckload of wood leaving the sale area.

5. The wood hauling ticket will be filled out, and the top copy detached and dropped in a lock box BEFORE the loaded truck leaves the sale area.

6. Truck driver must have corresponding and current sale hauling ticket in possession when transporting state harvested wood.

7. The Department of Natural Resources reserves the right to have its agents check scale at any time.

8. The third portion of the wood hauling ticket must be detached and deposited with mill scaler at the time of wood delivery and mailed back to the issuing DNR station.

9. Upon completion of the timber sale, all unused haul tickets will be returned to the issuing DNR station.

10. Hauling tickets may not be transferred between contractors.

11. Lock boxes will be provided by the Department of Natural Resources representative.

12. A list of all wood destinations will be given to the Forester by the operator. Any change in wood destination will be reported to the Forester before any wood products are hauled to the new destination.

13. Any firewood sold to a private entity must either be stick-scaled by DNR prior to leaving the timber sale or be sold via a triplicate ticket system. With the latter system, logger, landowner, and DNR will all receive a copy of each ticket. This will allow DNR to ensure the volume sold to the private entity is the same as that paid for by the contractor. Each triplicate ticket will have a unique assigned number for tracking purposes. Each ticket will also include the buyer’s name and contact information. Any such triplicate system shall be approved by DNR prior to initial implementation on a timber sale.

14. Failure to follow the above provisions invitation for bids will be a violation of the sale contract.

Note: The ash in the stand are infected with Emerald Ash Borer; the advertised value reflects that. White Pine tons includes 9.9 MBF. Ash tons includes 5.9 MBF. Silver Maple tons includes 3.4 MBF. River Birch tons include 2.7 MBF.

Sale Description
The timber harvest objectives are: 1) Intermediate thinning of bottomland hardwoods and salvage of all elm and ash and aspen in the stand. 2) Intermediate thinning of white pine strips located at southern end of the stand.

Specific Cutting Requirements:
1. An on-site meeting prior to harvesting is required to discuss operational methods, landings and design of the sale.
2. Inside the harvest area cut all ash, elm, aspen and trees marked with ORANGE paint. Utilize all trees 5” DBH and greater containing at least one 100” stick.
3. A remediation zone (RMZ) is marked in PURPLE paint on the north end. No equipment operations allowed north of the RMZ.
4. Do not cut trees marked as boundaries with RED or PURPLE paint.
5. Maximum stump height shall not exceed stump diameter. Damage to residual trees is to be kept at a minimum, and careless equipment operation will not be tolerated.
6. Equipment operation is allowed December 1st-March 1st during frozen or very dry conditions due to the wet nature of the soils and NH restrictions.
7. No equipment operations during the 9-day gun deer season to limit hunter impacts.
8. DNR owned timber mats may be available for use on this timber sale on a first come, first served basis. If timber mats are utilized, they need to be returned in like condition or replaced before the end of the contract.
9. The contractor must obtain free overweight permits from the Town of Caledonia and the Town of Fairfield in order to haul timber on Levee Road. The DNR can provide contact information for the appropriate points of contact.

Conditions of Sale:
1. Sale will be presented to bidders as a SCALED SALE. All hauled wood will be “mill scale” (weight or measured) for pulpwood and sawtimber with a “haul ticket” system. Mixed loads of species and/or products, of different stumpage values, will be charged at the higher dollar value. If wood is being hauled to a purchaser that cannot or will not return a scale slip to the DNR Forester, then the wood must be scaled by a DNR representative before being hauled.
2. The state does not guarantee volumes. Bidders are strongly encouraged to inspect sales to make their own volume and quantity determinations.
3. A payment schedule will be established at time of contract signing. This schedule will document payment schedule, species, price per unit, total volumes, etc.
4. Failure to follow the above provisions or the invitation for bids will be a violation of the sale contract.

Follow bidding instructions described in the bid package cover letter to bid on this sale.
“Timber Sale Sealed Bid-Levee Road Timber Sale” MUST be written on the outside of the envelope.

POND POPPLE PROSPECTUS

Department of Natural Resources Timber Sale
Rome Pond Wildlife Area (Jefferson County)

“Pond Popple” Timber Sale
Tract # 28-20  Sale # 2841-6
Pt. of SESE, Pt. of NESE Section 15, T6N, R16E, Town of Sullivan
Pt. of NWSW Section 14, T6N, R16E, Town of Sullivan

Sale Area 22 acres (See Attached Map for Location and Layout of Harvest Area)
Timber Sale Established by Nick Koltz & Zach Hylinski

Zach Hylinski (608-225-4076)
zachary.hylinski@wisconsin.gov
Fitchburg Service Center
3911 Fish Hatchery Road Fitchburg, WI 53711

Species | Estimated Volume | Conversion Rate
--- | --- | ---
Oak | 10 MBF | 
Mixed Hardwood | 12 MBF | 
Aspen | 500 tons (222 cords) | 2.25 tons/cord
Oak | 68 tons (25 cords) | 2.75 tons/cord
Ash | 317 tons (107 cords & 14 MBF log) | 2.3 tons/cord
Red Cedar | 12 tons (8 cords) | 1.575 tons/cord
Mixed Hardwood | 127 tons (53 cords) | 2.4 tons/cord

Minimum Acceptable Bid: $3,786
Sold wood will be mill scale for the pulp and logs

Conversion of MBF (thousand board feet) to cords or cords to MBF shall be 2.44 cords per MBF for softwoods and 2.20 cords per MBF for hardwoods

Estimated Volumes Only

There is no guarantee of volume accuracy, bidders are urged to examine this timber and make their own evaluation of quality and quantity

Cutting Specifications:

- Cut all stems in the harvest area down to 1” in diameter.
- Trees with green paint shall not be cut
- The exterior of the harvest area is marked in blue and red paint. This paint indicates either a change in ownership or an end to the harvest area. Trees marked with blue or red paint shall not be cut.
- There is a small vernal pool located within the sale area. This area is marked by pink paint with 3 dots facing outside of the pool (noted on timber sale map). No cutting will occur in this area.

1. Timber Harvesting is allowed from **September 15th – March 1st on dry or frozen ground conditions** because of NHI restrictions and oak wilt. Depending on the year extension beyond March 1st may occur if frost is still in the ground. No cutting in the 9-day gun deer season.
2. Adjacent private landowner Peter Klingler verbally agreed to allow logging equipment to cross his property for the timber sale. This would need to be secured by the successful bidder if desired and is their responsibility. DNR can provide a contact number and mailing address upon request.
3. All boxelder, ironwood and locust trees of commercial size throughout the sale area will be killed prior to harvest
4. The site will be forestry mowed and sprayed prior to logging. Timing is key for this activity and good communication is vital for timing when the harvesting will occur.
Timber Sale Contract Procedure

A. Bidding, Payment and Contract Procedures

1. The contract period will be for three (3) years, running approximately **July 1, 2022 to June 30, 2025** (3 winters). *There shall be no harvesting during the first year of the contract while necessary site preparation to control invasive brush and understory competition occurs.* Harvesting may commence during the first year of the contract pending completion of site preparation or in agreement and coordination with site preparation contractor.

2. Deferred payment for stumpage is allowed on this sale unless successful bidder is on the advance pay list.

3. Cutting of these areas shall be completed during the contract period. This includes the removal of the cut wood from the sale area. Extension may be granted by the DNR or its authorized representative for a period of one year, at their discretion. A reasonable effort must be shown to complete the sale during the contract period to warrant an extension. A one-time 15% stumpage increase penalty will be in place if an extension is need.

B. Cutting and Operational Requirements

1. All trees marked or designated for cutting shall be utilized to a four-inch top diameter that contain 1 stick.
   a. Sawlogs (minimum 10” small end) will be sold using a “woods run” price per species or one price per MBF for all grades. Logs will be scaled on Scribner Decimal C, mill scale.
   b. Pulpwood (minimum 4” small end) will be sold per ton, mill scale with the ticket system.
   c. If wood is being hauled to a purchaser that cannot or will not return a scale slip, then the wood must be scaled by a Department representative before being hauled.

2. Communication is vital for this sale to time forestry mowing and regeneration work. Harvesting will occur when this is completed, and timeliness is key. With the mowing most sub-merchantable stems should be mowed with a follow-up herbicide spraying.

   Follow bidding instructions described in the bid package cover letter to bid on this sale.

   “Timber Sale Sealed Bid – Pond Popple” Must be written on the outside of the envelope

Minimum Acceptable Bid: $ 16,086
Sold wood will be mill scale for the pulp and logs

There is no guarantee of volume accuracy, bidders are urged to examine this timber and make their own evaluation of quality and quantity.

Cutting Specifications: Blue paint on 3 sides indicated boundary with private lands, Pink paint is RMZ, Red paint on 3 sides is harvest boundary, Yellow paint band is a change in cutting specifications. Colors and markings explained further below.

Thinning (17 acres) Yellow paint band separates from other cutting prescriptions:

- Cut all stems marked with orange paint. Ash, aspen, boxelder, ironwood, mulberry and locust designated for removal in the thinning area. Many of these species will be chemically treat & dead prior to the harvest.
- Do not cut trees marked with yellow, pink, blue, red or green paint.
- Specifically, off W. Brandherm Rd., both sides of the ditch will be cut (cut up to the prairie edge).

Shelterwood (94 acres) Yellow paint band separates from other cutting prescriptions:

- Cut all stems except trees marked with green paint
- Do not cut trees marked with yellow, pink, blue, red or green paint.
- There is a lower spot within this sale area. Green tree retention was higher here.
• There is a wet drainage within this area. This area is marked by pink paint with 3 dots facing outside of the drainage (noted on timber sale map). No cutting or equipment activity will occur in this area unless part of the designated crossing.

Clearcut / Ditch Cleaning:

• Cut all merchantable stems.
• This area can be very wet with seasonal water issues along the ditch & beaver activity. Goal is to remove all trees here to reduce beaver activity as well as further prairie habitat.

1. Timber Harvesting is allowed from **November 15** - **March 1st** on dry or frozen ground conditions because of NHI restrictions and oak wilt. Depending on the year extension beyond March 1st may occur if frost is still in the ground. No cutting in the 9-day gun deer season.
2. Adjacent private landowner Peter Fruin verbally agreed to allow logging equipment to cross his property for the timber sale. This would need to be secured by the successful bidder if desired and is their responsibility. DNR can provide a contact number and mailing address upon request. This landowner is near the Avon Town Hall off West Beloit-Newark Road.
3. Adjacent private landowner Joe Ryan verbally agreed to allow logging equipment to cross his property for the timber sale. This would need to be secured by the successful bidder if desired and is their responsibility. DNR can provide a contact number and mailing address upon request. This landowner is near West Brandherm Road.
4. All boxelder, ironwood, mulberry and locust trees of commercial size throughout the sale area will be killed prior to harvest
5. The site will be forestry mowed and sprayed prior to logging. Timing is key for this activity and good communication is vital for timing when the harvesting will occur.

**Timber Sale Contract Procedure**

A. **Bidding, Payment and Contract Procedures**

1. The contract period will be for three (3) years, running approximately **July 1, 2022** to **June 30, 2025** (3 winters). **There shall be no harvesting during the first year of the contract while necessary site preparation to control invasive brush and understory competition occurs.** Harvesting may commence during the first year of the contract pending completion of site preparation or in agreement and coordination with site preparation contractor.
2. Deferred payment for stumpage is allowed on this sale unless successful bidder is on the advance pay list.
3. Cutting of these areas shall be completed during the contract period. This includes the removal of the cut wood from the sale area. Extension may be granted by the DNR or its authorized representative for a period of one year, at their discretion. A reasonable effort must be shown to complete the sale during the contract period to warrant an extension. A one-time 15% stumpage increase penalty will be in place if an extension is need for one year.

B. **Cutting and Operational Requirements**

1. All trees marked or designated for cutting shall be utilized to a four-inch top diameter that contain 1 stick.
   a. Sawlogs (minimum 10” small end) will be sold using a “woods run” price per species or one price per MBF for all grades. Logs will be scaled on Scribner Decimal C, mill scale.
   b. Pulpwood (minimum 4” small end) will be sold per ton, mill scale with the ticket system.
   c. If wood is being hauled to a purchaser that cannot or will not return a scale slip, then the wood must be scaled by a Department representative before being hauled.
2. It is advised that the sale is walked prior to bidding as some areas have patches of mortality from oak wilt & two lined chestnut borer.
3. Communication is vital for this sale to time forestry mowing and regeneration work. Harvesting will occur when this is completed, and timeliness is key. With the mowing most sub-merchantable stems should be mowed with a follow-up herbicide spraying.

Follow bidding instructions described in the bid package cover letter to bid on this sale.

“Timber Sale Sealed Bid – Avon” Must be written on the outside of the envelope
Avon Timber Sale (Tract 1-21 Sale # 5406-05)

The award shall be based on this TOTAL BID AMOUNT:

**Performance Bond**

Will be in the form of: (select one)

- Personal Check
- Certified Check/Money Order
- Irrevocable Letter of Credit
- Assurance Bond
- Certificate of Deposit
- Assignment of Savings Account
I understand that any or all bids may be rejected and that consideration and awarding of a contract will be based upon my past performance and ability to complete contracts. I also understand that if I am the winning bidder, I have 6 weeks from the date of the bid opening to submit an acceptable performance bond. I also understand that if I am awarded the contract and fail to execute it or work under it, I will be required to forfeit to the Department an amount equal to 10% of my total bid amount. Failure to forfeit the 10% penalty will result in being considered ineligible to bid on any state timber sales for a two-year duration. In the event the highest bidder can not or will not sign the contract, the award will be made to the next highest qualified bid.

Notice: I understand:

Utilization specifications and estimated volumes are listed in the prospectus which is available upon request from the Department.

A copy of the standard timber sales contract which must be entered into is available upon request from the Department.

There is no guarantee of volume accuracy, bidders are urged to examine this timber and make their own evaluation of quality and quantity

Cutting Specifications: Blue paint on 3 sides indicated boundary with private lands, Pink paint is RMZ, Red paint on 3 sides is harvest boundary. Colors and markings explained further below.

Cutting Specifications: Blue paint on 3 sides indicated boundary with private lands, Pink paint is RMZ, Red paint on 3 sides is harvest boundary. Colors and markings explained further below.

Thinning (30 acres) Yellow paint band separates from other cutting prescriptions or is the pine stand along access trail:
- Cut all stems marked with orange paint. Aspen, boxelder, basswood, cedar and black cherry are designated for removal in the thinning area.
- Do not cut trees marked with yellow, pink, blue, red or green paint.
- Trees with more than one color mark the change in cutting prescription.

Shelterwood (14 acres) Yellow paint band with Yellow Dot facing into Shelterwood area:
- Cut all stems except white oak, hickory and trees marked with green paint.
- Also cut trees with orange paint in this area (mainly white oak).
- Do not cut trees marked with yellow, pink, blue, red or green paint.
- Trees with more than one color mark the change in cutting prescription.
• There is a wet seep in this area. This area is marked by pink paint with 3 dots facing outside of the seep (noted on timber sale map). No cutting or equipment activity will occur in this area unless part of the designated crossing.
• 3 pink paint dots mark the northern most edge of the harvest area that abuts a drainage ditch.

Salvage Oak Wilt Pocket (14 acres) Red paint X facing in denotes the Salvage area:
• Cut all stems, including snags, except white & bur oak, hickory and trees marked with green paint.
• Do not cut trees marked with yellow, pink, blue, red or green paint.
• Trees with more than one color mark the change in cutting prescription.
• There is a wet seep & stream within this area. This area is marked by pink paint with 3 dots facing outside of the pool (noted on timber sale map). No cutting or equipment activity will occur in this area unless part of the designated crossing. Crossing will be needed unless access is gain through private lands.

Aspen Coppice Cut (8 acres) Red paint band & X face into the coppice area:
• Cut all stems within the harvest area down to 1” in diameter.
• Trees with green paint shall not be cut.
• Do not cut trees marked with yellow, pink, blue, red or green paint.
• Trees with more than one color mark the change in cutting prescription.
• 3 pink paint dots mark the northern most edge of the harvest area.

Clearcut (10 acres) Yellow band & X facing into the Clearcut area:
• Cut all merchantable stem except trees marked with green paint.
• Do not cut trees marked with yellow, pink, blue, red or green paint.
• Trees with more than one color mark the change in cutting prescription.

1. Timber Harvesting is allowed from November 15th – March 1st on dry or frozen ground conditions because of NHI restrictions and oak wilt. Depending on the year extension beyond March 1st may occur if frost is still in the ground. No cutting in the 9-day gun deer season.
2. There is a stream crossing noted on the map. This area will require Ch. 30 permit which the DNR will complete. Access through private land is preferred.
3. Adjacent private landowner Gene Lauderdale verbally agreed to allow logging equipment to cross his property for the timber sale. This might also be a possible landing. This is a separate landowner than the stream crossing. This would need to be secured by the successful bidder if desired and is their responsibility. DNR can provide a contact number and mailing address upon request.
4. All boxelder, ironwood and locust trees of commercial size throughout the sale area will be killed prior to harvest
5. The site will be forestry mowed and sprayed prior to logging. Timing is key for this activity and good communication is vital for timing when the harvesting will occur.

Timber Sale Contract Procedure

A. Bidding, Payment and Contract Procedures
1. The contract period will be for three (3) years, running approximately July 1, 2022 to June 30, 2025 (3 winters). There shall be no harvesting during the first year of the contract while necessary site preparation to control invasive brush and understory competition occurs. Harvesting may commence during the first year of the contract pending completion of site preparation or in agreement and coordination with site preparation contractor.
2. Deferred payment for stumpage is allowed on this sale unless successful bidder is on the advance pay list.
3. Cutting of these areas shall be completed during the contract period. This includes the removal of the cut wood from the sale area. Extension may be granted by the DNR or its authorized representative for a period of one year, at their discretion. A reasonable effort must be shown to complete the sale during the contract period to warrant an extension. A one-time 15% stumpage increase penalty will be in place if an extension is need for one year.

B. Cutting and Operational Requirements
1. All trees marked or designated for cutting shall be utilized to a four-inch top diameter that contain 1 stick.
   a. Sawlogs (minimum 10” small end) will be sold using a “woods run” price per species or one price per MBF for all grades. Logs will be scaled on Scribner Decimal C, mill scale.
   b. Pulpwood (minimum 4” small end) will be sold per ton, mill scale with the ticket system.
   c. If wood is being hauled to a purchaser that cannot or will not return a scale slip, then the wood must be scaled by a Department representative before being hauled
2. Topography can be an issue on parts of this sale. It is advised that the sale is walked prior to bidding.
3. Communication is vital for this sale to time forestry mowing and regeneration work. Harvesting will occur when this is completed, and timeliness is key. With the mowing most sub-merchantable stems should be mowed with a follow-up herbicide spraying.

Follow bidding instructions described in the bid package cover letter to bid on this sale.

The award shall be based on this TOTAL BID AMOUNT:

**Performance Bond**

Will be in the form of: (select one)

- Personal Check
- Certified Check/Money Order
- Irrevocable Letter of Credit
- Assurance Bond
- Certificate of Deposit
- Assignment of Savings Account
I understand that any or all bids may be rejected and that consideration and awarding of a contract will be based upon my past performance and ability to complete contracts. I also understand that if I am the winning bidder, I have 6 weeks from the date of the bid opening to submit an acceptable performance bond. I also understand that if I am awarded the contract and fail to execute it or work under it, I will be required to forfeit to the Department an amount equal to 10% of my total bid amount. Failure to forfeit the 10% penalty will result in being considered ineligible to bid on any state timber sales for a two-year duration. In the event the highest bidder can not or will not sign the contract, the award will be made to the next highest qualified bid.

**Notice:** I understand:

Utilization specifications and estimated volumes are listed in the prospectus which is available upon request from the Department.

A copy of the standard timber sales contract which must be entered into is available upon request from the Department.

Advertised Value: $23,270.20

SPECIFIC CUTTING REQUIREMENTS:
- An on-site meeting is required prior to any harvesting to discuss operational concerns.
- Harvest only trees marked in orange paint within the sale boundary.
- Timber sale boundaries are marked with blue at private boundaries and red at stand boundaries.
- Utilize sawlog size trees to a 10” top and pulpwood to a 4” top (diameter inside bark)
- Any standing dead snags are to be left if they do not pose a hazard to logging contractors.
- Residual tress shall not be excessively damaged. Residual damage will not be tolerated and excessive damage to residual trees will be subject to penalty.
- Haul roads, skid trails, and landings must be approved by local DNR Forester and must conform to DNR Best Management Practices.

These lands are 3rd party certified

SEASONAL RESTRICTIONS:
- Cutting, skidding or hauling must take place on frozen ground only.
CONDITIONS OF SALE:

- Sale will be presented to bidders on a LUMP SUM basis. FULL PAYMENT will be required prior to cutting and a 15% performance bond will also be required.
- Contract length will allow for 3 full winters to cut and may not be sub-contracted or assigned. Contract extensions will be a 15% penalty unless there are extenuating circumstances preventing the harvesting of timber. A contract must be signed within 30 days of bid acceptance, and state contract may contain additional provisions not listed in this prospectus (copies available upon request). Contract will begin immediately after signing.
- The volume offered for sale is estimated but not guaranteed. If there is less timber than estimated, there is no obligation of the DNR to make up the “shortage”.

OTHER CONDITIONS:

- Logging roads, skid trails and landings must be approved, graded smooth, and seeded at completion and will be restricted to the harvest area whenever possible.
- Soil and Water Quality: roads and trails must be installed and shut down according to BMPs (Best Management Practices); any new roads must be approved by the local DNR Forester; news roads should be laid out for approval as soon as possible after purchase; excessive ruts will not be allowed; some existing roads are shown on the map; roads shall be seeded with a DNR approved seed mix upon completion of sale.
- A contract must be signed within 30 days of bid acceptance or bid/bond will be forfeited. Copy of state contract available upon request; contract may contain additional provisions.
- Upon arrival on site, logging equipment shall be clean of soil or debris from other sites to minimize the chance for introduction of exotic plants.
- Liability to pay double for stumpage value for undesignated timber cut or damage through negligence or carelessness.

The above items listed will continuously be scrutinized and evaluated for compliance throughout the time of the contract. Failure to comply with the above listed or other contract conditions may result in contract closure and may jeopardize your opportunity to bid on future timber sales.
Theresa Hardwoods Sale
TRACT #01-20
37 ACRES

Contract Ending Date: June 30th 2024
Sale Method: Lump Sum

- All cut trees are painted with orange horizontal bands. All horizontally banded trees must be cut down.
- Blue Paint denotes the sale boundary/private ownership boundary.
- Red Paint denotes the stand boundaries for state owned property.
- The orange hatched area on the map shows the entire sale area where trees are marked.
- In total there are 5 separate harvest areas within the sale.

Performance Bond

Will be in the form of: (select one)
- Personal Check
- Certified Check/Money Order
- Irrevocable Letter of Credit
- Assurance Bond
- Certificate of Deposit
- Assignment of Savings Account

I understand that any or all bids may be rejected and that consideration and awarding of a contract will be based upon my past performance and ability to complete contracts. I also understand that if I am the winning bidder, I have 6 weeks from the date of the bid opening to submit an acceptable performance bond. I also understand that if I am awarded the contract and fail to execute it or work under it, I will be required to forfeit to the Department an amount equal to 10% of my total bid amount. Failure to forfeit the 10% penalty will result in being considered ineligible to bid on any state timber sales for a two-year duration. In the event the highest bidder can not or will not sign the contract, the award will be made to the next highest qualified bid.

Notice: I understand:

Utilization specifications and estimated volumes are listed in the prospectus which is available upon request from the Department.
