Other species not mentioned will be charged at the mixed hardwood price.

The performance bond will be 15% of the total sale value. **The contract end date is June 30, 2027**

SPECIAL SALE CONDITIONS:

Equipment use is restricted to very dry or frozen ground conditions due to wet soil conditions. All parts of the sale that require a stream crossing to access will take place during frozen ground conditions only.

Area a is located in the Flambeau River Scenic Management Area. Harvesting operations within this area are limited to very dry or frozen conditions during leaf-off (October 15th – March 31st).

To make areas of the sale operable during dry conditions, existing trails and new stub roads will most likely need gravel. The state will provide the gravel, but it is the responsibility of the contractor for loading, hauling, and leveling any gravel needed for decking on these existing roads and new stubs.

Access within the sale will require up to four stream crossings. The permits for these crossings have been obtained by the Flambeau River State Forest. All components of the stream crossings will occur during frozen ground conditions only. All conditions of the permits will be followed by the contractor.

All additional restrictions listed in prospectus and standard contract apply unless specified.
