1. Cutting must be concurrent for all species to be harvested.
2. All trails must be repaired to pre-harvest conditions before the start of each snow season.
3. All pine products cut between May 1 and September 1 must be removed from the sale area within three weeks from time of cutting. Pine products cut during the remainder of the year must be removed prior to May 1 of each year.
4. Operational Restriction: All harvesting activity in the PINE block, related to cutting and skidding, may only take place during daylight hours. All harvesting activity to include cutting and skidding may only take place between July 16 and April 14 for the NH/OAK block due to oak wilt considerations.
5. All cut products will be field scaled at the landing by the timber sale administrator. In addition, all mill scale tickets must be provided to the administrator upon completion of the contract for internal comparison purposes. Billings will be based on field scale.
6. Slash must be lopped to within 24” of ground within 100’ of Town road.
7. Limited skidding will be allowed across the paved bike trail with prior permission.
8. If the contract is to be worked on during multiple time periods a mid-contract “pull-off” inspection will be required. One-week notice shall be given by the contractor prior to moving equipment off-site. During the “pull-off” inspection provisions needing attention will be documented. The contractor, at this time, can decide to remedy them before pulling off or rectify them when moving back onto the site. If the latter is chosen documented items shall be addressed before harvesting can continue.
