[1]Volume includes 11 MBF of potential logs.
[2]Volume includes 464 MBF of potential logs.
[3]Volume includes 86% jack pine, 10% balsam fir, 3% white spruce and 1% scotch pine. (Wt. Ave 2.125 tons/cord)
[4]Volume includes 122 MBF of potential logs.
[5]Volume includes 68% red maple, 31% white birch and 1% other. Volume also includes 6 MBF of red maple and 5 MBF of white birch potential logs. (Wt. Ave. 2.317 tons/cord)
  The total sale volume equates to approximately 41.83 tons/acre or 17.83 cords/acre.

Special Conditions:
1. Do not harvest or operate equipment within 15 feet of any ephemeral pond or the unnamed lake. No equipment allowed within 30 feet of Blueberry Lake. Cutting must be concurrent for all species to be harvested.

2. Biomass harvesting is not allowed. Do not cut, knock down, or utilize any dead standing snags. All harvesting and skidding activity will only be allowed between March 15 and December 15. In Oak Area; no harvesting, skidding or road building allowed April 15 – July 15.

3. No tops or slash allowed across any red line, town road right-of-way or within any wetland. Slash within 50 feet of the town roads and all trails must be lopped and scattered within 2 feet of the ground and pulled back into the sale area at least 10 feet from the edges of those areas.

4. All trails must be repaired to pre-harvest condition upon sale completion or before removal of equipment from the sale area. All wood decked on any trail must be removed by December 15th during every year of the contract. All landings and any new woods roads must be approved prior to sale start-ups. All pine products cut between May 1 and September 1 must be removed from the sale area within three weeks from time of cutting. Pine products cut during the remainder of the year must be removed prior to May 1 of each year.

6. If the contract is to be worked on during multiple time periods a mid-contract "pull-off" inspection meeting will be required. One-week notice shall be given by the contractor prior to moving equipment off-site. During the "pull-off" inspection, provisions needing attention will be documented. The contractor at that time can decide to remedy them before pulling equipment off or rectify them when moving back onto the site. If the latter is chosen, documented items shall be addressed before harvesting can continue.
