Area 6 - Oneida Sandy Plains - Forest Production

C45 Stand 4 (5 Acres) is comprised of well stocked red pine small sawtimber and red pine poletimber. This stand originated in 1963 and was previously thinned in 2011. This stand will be thinned again to improve health and growth rates of remaining crop trees.

C45 Stand 20 (17 Acres) is comprised of well stocked red pine sawtimber and red pine poletimber. This stand originated in 1972 and was acquired by the State, in 2008. The last time it was thinned was in 2007. The stand will receive another improvement thinning at this time to improve health and vigor.

A snowmobile trail runs through the proposed sale area and will need to be signed for caution if harvesting takes place during the winter. Aesthetics, along Hwy 47, will be maintained with a significant number of residual red pine trees.
