Stand 1 (10 acres) is a white spruce stand of 1960 origin. This stand will be marked for a thinning.

Stand 4 (68 acres) is northern hardwoods. The silviculture will be single tree selection with variable gap sizes to promote forest diversity.

Stand 9 (31 acres) is northern hardwoods and balsam fir. The proposed timber sale will harvest balsam fir and early successional tree species and thin the hardwoods.

Stand 14 (31 acres) is northern hardwoods with white birch. The proposed timber sale will harvest early successional species and thin the hardwoods.

Stand 16 (6 acres) is a hemlock stand of 1910 origin. The stand will be thinned.

Stand 17 (15 acres) is swamp hardwoods of 1935 origin. The stand will be thinned during very dry or frozen conditions only.
