- Pine
- Lakes

Stand 2 (34 acres) is a 65 year old red pine plantation that is well stocked with small sawlogs. This stand was last thinned in 2012. This stand will receive another improvement thinning to maintain growth and vigor.

Stand 3 (5 acres) is a 65 year old white pine plantation that has a medium stocking of small sawlogs. This stand was last thinned in 2012. This stand will be treated with an improvement thinning at this time since it is a small stand and in close proximity to stand 2.

BMPs will be implemented along the adjacent waterways. Aesthetics will be maintained with a significant amount of residual red pine.
