C133H Stand 8, C134H Stand 4 and C148H Stand 4 (372 acres): These three red oak sawlog stands are very similar to one another. They originated in 1912 and have a BA of 33 square feet. The stands in compartments C133H and C134H were cut in 2010, and the stand in C148H was cut 2014; each undergoing a shelterwood harvest. This sale will remove the overstory. Prior to the harvest an attempt will be made to conduct a prescribed fire in a portion of the proposed sale. The objective will be to set back the aspen and maple and release the red oak seedlings.
