Area 6: Oneida Sandy Plains

C59 Stand 2 (64 Acres) is comprised of large sawlog size white pine that will be thinned to improve the health and vigor of the remaining stems.

C59 Stand 3 (105 Acres) is an aspen stand with an origin year of 1976. This stand will be regenerated using a coppice with standards to maintain aspen on the landscape.

C59 Stand 4 (14 Acres) is comprised of small sawlog size white pine. This stand will be thinned to promote the health and vigor of the remaining trees.

C59 Stand 7 (20 Acres) is comprised mainly of large and small sawlog size oak. This stand will undergo a shelterwood cut to promote the regeneration of red oak.

C59 Stand 19 (17 Acres) is comprised primarily of white birch. This stand will be thinned using single tree selection to maintain aesthetics and remove high risk trees while promoting longer lived species.

C61 Stand 15 (15 Acres) is comprised of large sawlog size red and white pine with an origin year of 1890. This stand will be regenerated naturally using a modified shelterwood or seedtree harvest.
