- ▨ Jack/Mixed Pine Area

C230H - Stand 1 (87 acres) is a 50-year-old aspen and mixed hardwood stand with scattered mature pine. The prescription will be a coppice harvest with standards to regenerate the aspen and retain mature scattered hardwoods and pine for aesthetic and wildlife habitat purposes.

C230H - Stand 3 (66 acres) is a 102-year-old natural white pine stand that is ready for a thinning. The prescription will be a free thinning to reduce stocking levels and promote the growth and vigor of remaining crop trees

C230H - Stand 4 (18 acres) is an 84-year-old red pine plantation with large areas of natural pine that is ready for a thinning. The prescription will be a free thinning to reduce stocking levels and promote the growth and vigor of remaining crop trees

C230H - Stand 6 (14 acres) is an 81-year-old red pine plantation that is ready for a thinning. The prescription will be a free thinning to reduce stocking levels and promote the growth and vigor of remaining crop trees

C230H - Stand 8 (15 acres) is a 47-year-old stand with scattered jack pine and mixed hardwoods. The prescription will be a coppice harvest with standards to regenerate the aspen and retain mature scattered hardwoods and pine for aesthetic and wildlife habitat purposes.

C230H - Stand 9 (30 acres) is an 47-year-old jack pine plantation with strong components of aspen, red pine, and white pine that is ready for a clearcut with standards. Scattered red and white pines will be retained and the rest of the stand will be replanted to jack pine.

All stands lie within Mgmt. Area 3:
Vilas Sandy Plains Northl -
Forest Production

Note: This area is not suitable for biomass harvesting.
