Stand 5 (21 acres) is a 68 year old white birch stand with scrub oak, red maple, red and white pine and very few jack pine. This stand has no prior history of management. This stand is along the Manitowish River and was left unmanaged as a scenic strip along the river. The short lived jack pine as all but died out and the white birch are declining. The birch, maple and jack pine will be designated for removal and the red and white pine will be selectively marked. This sale will result in longer lived trees in the RMZ along the river.

Stand 9 (13 acres) is a 116 year old stand of well stocked small sawlog red and white pine. This stand will be selectively thinned to promote growth on the remaining trees.

BMP's along the Manitowish River will be implemented, and aesthetics will be addressed along Stiloski Lane. Green tree retention guidelines will be followed throughout the sale area.
