Area 6: Oneida Sandy Plains

C20 Stand 1 (98 Acres) is an aspen stand with an origin year of 1973. This stand will be regenerated using a coppice with standards to maintain aspen on the landscape.

C20 Stand 2 (30 Acres) is a tamarack stand that will be regenerated using strip clearcuts or group clearcuts where practical.

C20 Stand 4 (42 Acres) is comprised of large and small sawlog size red pine with an origin year of 1899. This stand will be regenerated by clearcutting and replanting to red pine.

C20 Stand 5 (37 Acres) is a large sawlog size red pine stand with an origin year of 1905. This stand will be thinned to promote the health and vigor of the remaining stems.

C20 Stand 10 (18 Acres) is comprised mainly of oak along with associated species. This stand will be thinned and short lived species removed to promote the health and vigor of the remaining stems.

C20 Stand 13 (146 Acres) is comprised of large sawlog size white pine over 50 year old aspen. In areas dominated by pine, a shelterwood harvest will be conducted to promote regeneration. In aspen areas, a coppice with standards will be utilized to maintain the aspen on the landscape.
