Stand 2 (45 acres) is a well-stocked 96 year old large sawlog red oak stand with scattered red and sugar maple poletimber. A thinning will be conducted to encourage growth on the residual trees.

Stand 8 (57 acres) is a 98 year old stand of well stocked paper birch with a small amount of small sawlog white pine mixed in areas of the stand. Half of this stand was strip clear cut 10 years ago to try to regenerate the white birch. This sale will cut the remaining strips.

BMP's adjacent to Whitney Lake and wetlands will be implemented. Green tree retention guidelines will be followed through out the sale area. Seasonal restrictions will be required in the oak stand to prevent the establishment of oak wilt.
