C21A Stand 16 (122 acres) is comprised of well stocked aspen poletimber with associated maple, birch and pine. This stand originated in 1970. The goal is to maintain aspen on the landscape by regenerating it through a simple coppice with standards harvest prescription.

C21A Stand 17 (14 acres) is a 106 year old natural large sawlog sized red and white pine stand. This stand is somewhat clumpy with variable stocking densities. It will receive an improvement thinning to maintain growth and vigor.

There is a snowmobile trail located in the southwest corner of the proposed timber sale. The trail will be signed and kept snow covered if harvested during the winter. Biomass harvesting is restricted due to the soils. There is good access to County Hwy D.
