Area 6 - Oneida Sandy Plains - Forest Production Area

C44A Stands 7, 8, 11 & 16 are comprised of various ages of well stocked red pine poletimber and sawtimber. Stand ages range from 56 to 123 years of age. The prescription for these stands will be a thinning, following the standard order of removal, to reduce stocking levels and promote the growth and vigor of the remaining crop trees. A small portion, of stand 16, lies within the scenic lake designation of McNaughton Lake. This area will be lightly thinned to encourage large diameter trees. These stands have been thinned in the past.

C45A Stands 8, 12 & 16 are comprised of various ages of well stocked red pine poletimber and sawtimber. Stand ages range from 67 to 122 years of age. All of these stands were thinned in the past and are well stocked at this time. The prescription for these stands will be a thinning following the standard order of removal to reduce stocking levels and promote the growth and vigor of remaining crop trees.

There is a snowmobile trail that runs through a portion of the sale. The trail will be signed and kept snow covered if harvested during the winter. Biomass harvesting is not allowed. There is good access to Hwy 47.
