**NHAL - SF Master Plan: Mgmt. Area 4 - Vilas Sandy Plains Central - Forest Production**

C11H - Stand 1 (193 Acres) is comprised of 53 year old well stocked aspen poletimber with other associated species. The goal is to maintain aspen as a strong component across the landscape. A coppice with standards harvest will be prescribed to regenerate this stand. This stand is adjacent to similar aged aspen which has been split into three separate stands in order to diversify age class distribution.

There is a good network of woods roads and snowmobile trails throughout the area.
