NHAL - SF Master Plan: Mgmt. Area 6 - Oneida Sandy Plains - Forest Production

C12A - Stand 2 (45 Acres) is comprised of 98 year old well stocked red pine poletimber and sawtimber. This stand would benefit from an improvement thinning at this time. A free thinning technique will be applied to remove the highest risk and poorest quality trees.

C12A - Stand 6 (15 Acres) is comprised of 55 year old well stocked aspen poletimber with other associated species. The goal is to maintain aspen as a strong component across the landscape. A coppice with standards harvest will be prescribed to regenerate this stand.

There is a good network of woods roads throughout the area.
