Stand 5 (86 acres): This is a small sawlog size northern hardwood and hemlock stand with a diversity of forest regen. The stand will receive a selection harvest with gaps to promote growth and vigor.

Stand 19 (12 acres): This is a well stocked pole-sized northern hardwood stand that will be harvested following the even-age to uneven-age conversion steps.

Stand 20 (25 acres): Aspen stand of 1974 origin. The stand will receive a coppice with standards harvest to regenerate the aspen.
