- ▨ Pine Area
- Lakes

C81H - Stand 5 (37 Acres) is comprised of 86 year old red pine sawtimber. This stand would benefit from an improvement thinning at this time. A free thinning technique will be applied to remove the highest risk and poorest quality trees.

C101H - Stands 5 & 9 (32 Acres) are comprised of 80-102 year old well stocked stands of red pine poletimber and sawtimber. These stands would benefit from an improvement thinning at this time. A free thinning technique will be applied to remove the highest risk and poorest quality trees.

C101H - Stand 12 (39 Acres) is comprised of 53 year old well stocked aspen poletimber with other associated species. The goal is to maintain aspen as a strong component across the landscape. A coppice with standards harvest will be prescribed to regenerate this stand.

There is a good network of woods roads and snowmobile trails throughout the area.
