

eCMAR SECTION INSTRUCTIONS: Groundwater Quality

1. Groundwater Quality Standards

1.1 At any time in 2024 were there Preventative Action Limit (PAL) or Alternative Concentration Limit (ACL) exceedances of any groundwater parameters in any point of standards application groundwater monitoring wells?

NOTE: Groundwater monitoring well designations are listed in the discharge permit.

Click on either the "YES" or "NO" button as appropriate. The PALs or ACLs specific to your facility are within your WPDES permit. Additional information may be found in NR 140 of the Wisconsin Administrative Code.

If you have answered "YES", then list the exceedances in each point of standards application well and provide an explanation of actions taken to reduce concentrations.

***If you are unsure of what wells are identified as point of standard wells, contact your DNR District Wastewater Engineer or Specialist by clicking the 'REPORT ISSUE' button or by phone.*

1.2: At any time in 2024 were there Enforcement Standard (ES) or ES Alternative Concentration Limit (ACL) exceedances in any groundwater monitoring well designated as a point of standards application?

NOTE: Groundwater monitoring well designations are listed in the discharge permit.

Click on either the "YES" or "NO" button as appropriate. The ESs or ACLs specific to your facility are within your WPDES permit. Additional information may be found in NR 140 of the Wisconsin Administrative Code.

If you have answered "YES", then list the exceedances in each point of standards application well and provide an explanation of actions taken to reduce concentrations.

***If you are unsure of what wells are identified as point of standard wells, contact your DNR District Wastewater Engineer or Specialist by clicking the 'REPORT ISSUE' button or by phone.*

1.3: At any time in 2024 were there Enforcement Standard (ES) or ES Alternative Concentration Limit (ACL) exceedances in any groundwater monitoring well designated as non-point of standards application?

Click on either the "YES" or "NO" button as appropriate. The ESs or ACLs specific to your facility are within your WPDES permit. Additional information may be found in NR 140 of the Wisconsin Administrative Code.

If you have answered "YES", then list the exceedances in each point of standards application well and provide an explanation of actions taken to reduce concentrations.

***If you are unsure of what wells are identified as non-point of standard wells, contact your DNR District Wastewater Engineer or Specialist by clicking the 'REPORT ISSUE' button or by phone.*

2. Groundwater Evaluation Report

2.1: Has a comprehensive Groundwater Compliance Evaluation Report been done by either your consultant or the Department?

Click on the "YES" or "NO" button as appropriate. If you click on the "YES" button, you must include the date of the evaluation in the space provided immediately to the right of "DATE".

Groundwater Compliance Evaluations can be done at any time but are most frequently done around permit reissuance. They are designed to evaluate the impact your system's discharge is having to the groundwater. Dependent upon the impact, different responses will be appropriate.

If you answered "YES", briefly summarize the findings in the space provided. Groundwater findings can range from no impact, to increased monitoring, to changing operations, or in some cases a complete plant upgrade.
