List the practices that will be used to generate credits:

Filter strips (Natural Resources Conservation Service Code 393) will be installed down gradient of agricultural practices to reduce runoff and associated phosphorus from entering the receiving stream. Credit generating practices will be installed on tax parcels 2300600840000 and 2300600850000 in Green County. Assuming a trade ratio of 2:1 for filter strips, the phosphorus credits generated per year are approximately 403 to 517 lb/year. It is intended that water quality trading will be used in conjunction with wastewater treatment plant improvements for compliance with the water quality based effluent limit. Credit generating practices will be installed in the future on tax parcel 2300600897000.

Method for quantifying credits generated:  Monitoring  
 Modeling, Names: SNAP Plus
