Subject: Plover Wastewater Treatment Facility - WPDES Permit WI-0027995
Water Quality Trading Plan – CONDITIONAL APPROVAL

Dear Ms. Wojtalewicz:

The Wisconsin Department of Natural Resources (department) received a final draft of the updated water quality trading plan (WQT Plan) for compliance with phosphorus effluent limits at Plover Wastewater Treatment Facility on 02/06/2026. Based on WDNR review, the final WQT Plan is in general conformance with the WDNR Water Quality Trading Guidance and Section 283.84 of the Wisconsin Statutes. The WQT plan describes the conversion of cropland into permanent grassland from sod as part of a solar farm project. Credits generated from approved practices result in available credit quantities shown in Table 1. These credits will be incorporated into the reissued WPDES permit and will be used to demonstrate compliance with final phosphorus effluent limits.

Table 1: Total Phosphorus Credits Available per WQT-2026-0002

Year	Available Interim Credits (lbs/yr)	Available Long Term Credits (lbs/yr)	Available Credits (lbs/yr) Total
2025	0	0	0
2026	0	0	0
2027	26	63	89
2028	24	123	147
2029	15	135	150

The Department conditionally approves the WQT Plan as a basis for water quality trading during the next WPDES permit term. A condition of this certification is that prior to being implemented into the WPDES permit the city of Plover must enter into a signed written legal agreement with the credit generator. This certification will be rescinded if an agreement cannot be reached.

The Department has assigned the WQT plan a tracking number of WQT-2026-0002 and will be referenced as such in the WPDES permit. The final WQT plan will be included as part of the public notice package for permit reissuance. The WPDES permit will include a requirement for an annual trading report and effluent monitoring for total phosphorus.

If you have any questions or comments, please contact me at 715-492-4323 or at jenna.monahan@wisconsin.gov.

Thank You,

Jenna Monahan
