

Pre-Application to Inform Sediment Sampling:

Dredging General and Individual Permits

Required by Chapter NR 347.05

Form 3500-178 (03/22) Page 1 of 2

Please complete the form and include all applicable attachments and e-mail it to the Waterways Water Management Specialist for the County the project is located in. Please visit <https://dnr.wisconsin.gov/topic/Waterways/contacts.html> for contact information. This completed form and information will then be sent to resource managers to review if sediment sampling and testing are needed prior to submitting a dredging permit application. Not all dredging will need sediment sampling and testing. You will need correspondence from the Department informing if sediment sampling and testing is needed OR a waiver to testing requirements prior to submitting your dredging application. This documentation must be included with proof that a pre-application communication (email, conversation, meeting, etc.) occurred or was waived by the Department. If sediment sampling and testing is needed, the sampling report will need to be submitted and evaluated prior to applying for a dredging application.

1. Specific location information:

a. Name of Waterbody:

b. County of proposed project location:

c. Township, Range, and Section of proposed project location (if available):

d. Nearest Address(es) to the proposed project location:

e. Coordinates of proposed project location (if available):

2. Area (square feet) of proposed dredging:

3. Volume (cubic yards of proposed material to be dredged):

4. Description of proposed dredging method and equipment:

5. Description of proposed disposal method of removed material and placement site (include address of facility if licensed disposal facility is used):

6. Nearest Address(es) to the location of proposed disposal site that is unlicensed and a picture or map showing the surroundings of the site if available

7. Description of any known historical chemical use in the waterbody for vegetation/algae control. Include year, chemical and amount applied for/used and any known aquatic invasive species.

8. Any previous sediment sampling and analysis data from the dredge area (**please attach all associated data and maps**).
9. A map showing the area to be dredged. Include water depth, proposed depth of cut, surface area and volume estimate of dredge material. Include any sample locations proposed by DNR.

10. If feasible, please provide a brief description of historical and current known land use types adjacent to the project area, such as industrial, commercial, residential. If industrial, specify the type to the extent possible.

-
11. Desired project start and completion dates of proposed project:
-
