Section 9: Decision Making Process

- The Committee will use a system of consensus in its advisory capacity to make recommendations to the State Forester.
 - Committee consensus is a satisfactory level of general agreement, but not necessarily complete agreement. It is an outcome which is "close enough" to

be acceptable. All or most team members can support it, and few or no members totally oppose it. Often, when a team achieves general agreement, not all members are completely satisfied, but everyone accepts or "lives with" the group's prevailing view.

- Consensus is not a unanimous decision. Unanimity essentially gives each team member veto power.
- The Committee will strive for consensus by ensuring every member has the opportunity to express their views and influence the decision.
- In the event that the Committee is unable to reach consensus on an issue:
 - Committee Members agree to clearly articulate the basis for their inability to reach consensus and to articulate what could be done to allow them to reach consensus.
 - If consensus still cannot be reached, the issue will be brought to the State Forester for a decision, and will be accompanied by a description of the differing positions.

Section 10: Approval and Amendments

- These Operating Procedures shall be deemed approved, and may be amended at any time, based on consensus by the Committee.
